51606 ALUMINUM CONDUIT BENDER 1/2" EMT W/ANGLE SETTER

KLEIN TOOLS

Catalog Number	51606
Manufacturer	KLEIN TOOLS
Description	Aluminum Conduit Bender Full Assembly, 1/2-Inch EMT with Angle Setter™
Weight per unit	4.3 (lbs/each)
Product Category	Tools & Testers

Features

Conduit Size	1/2"
Conduit Type	EMT
Handle Length	38" (96.5 cm)
Material	Aluminum
Overall Height	43.1" (109.5 cm)
Overall Width	8.1" (20.6 cm)
Included	51427 Aluminum Bender Head, Handle; 51611 Angle Setter™
Media	Yes

Dimensions and Weight

Overall Length	1.7" (4.4 cm)

Descriptions

Description	ALUMINUM CONDUIT BENDER 1/2" EMT W/ANGLE SETTER
Long Description	Aluminum Conduit Bender Full Assembly, 1/2-Inch EMT with Angle Setter™
Product Type	Aluminum Conduit Bender 1/2" Emt
Special Features	Patent Pending Angle Setter™ Technology
Extra Long Description	KLE 51606 Aluminum Conduit Bender 1

Manufacturer Information

Brand	Klein Tools
GTIN	00092644516061
Manufacturers Part Number	51606
UPC	783523

Taxonomies, Classifications, and Categories

Category Description	HAND TOOLS
Type	Aluminum Conduit Bender

Packaging

Carton	1
Weight	4.3 lb (2 kg)
Weight Per Each	4.3 (lbs/each)

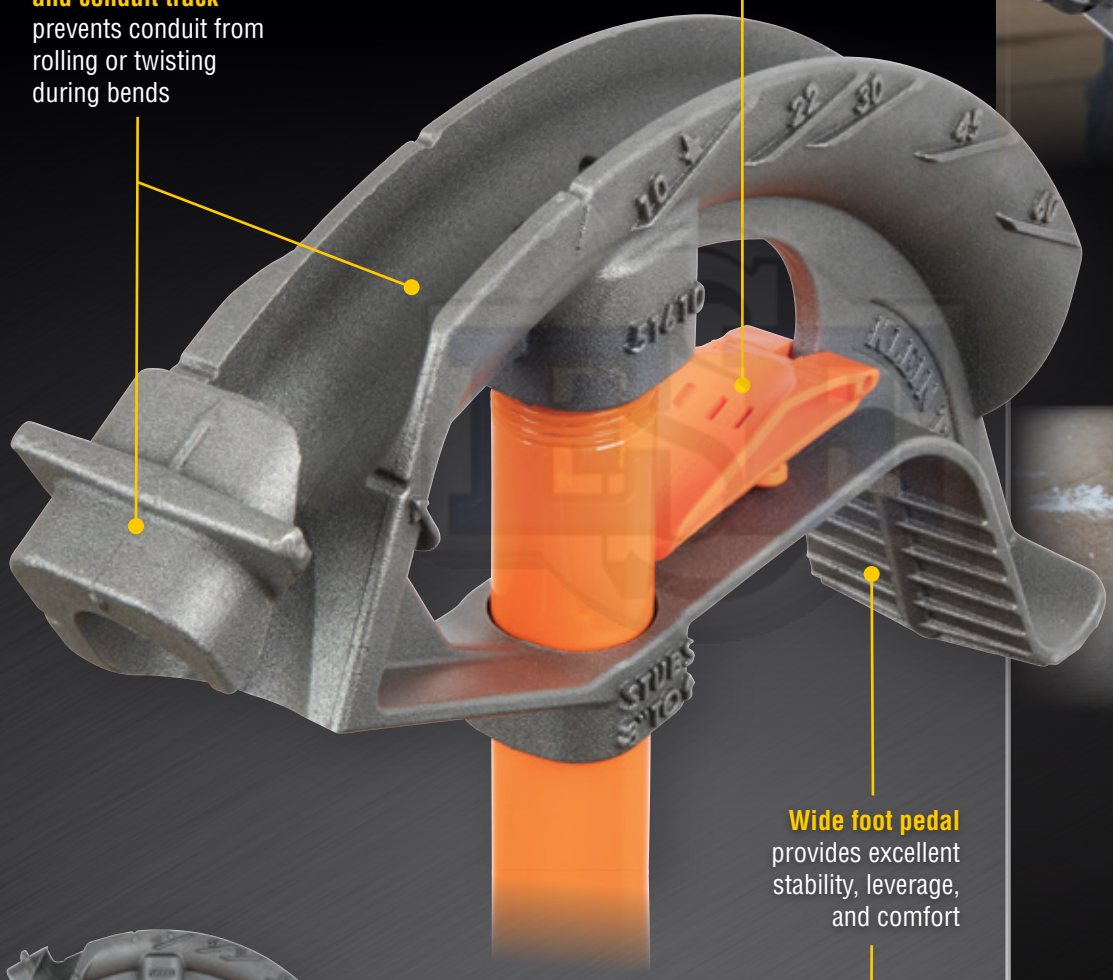
KLEIN TOOLS

KLEIN CONDUIT BENDERS ARE MAKING THE JOB A LITTLE EASIER FOR YOU

Klein Tools' conduit benders with patent pending Angle Setter™ technology allows for quick, accurate repeated bends, including common bend types such as offsets and saddles. The wide foot pedal provides excellent stability and features angled grooves for extra traction. With easily visible bold cast-in benchmark symbols, degree scales and multiplier scales help save time on the job.

Assembled Conduit Benders include Klein's unique Angle Setter™ technology for quick, accurate repeated bends saving time on the job (patent pending)

Interior hook surface and conduit track prevents conduit from rolling or twisting during bends



Includes markings for 10 degrees, 22.5 degrees, 30 degrees, 45 degrees, and 60 degrees

Wide foot pedal provides excellent stability, leverage, and comfort

Bold cast markings and symbols make for fast, easy conduit alignment to make all bend types, including saddle and back-to-back bends

IRON BENDERS (CAT. NOS. 51603, 51604, 51605) Heavy duty cast ductile iron has the durability needed on the jobsite

ALUMINUM BENDERS (CAT. NOS. 51606, 51607) have an easy handling head reinforced for added strength

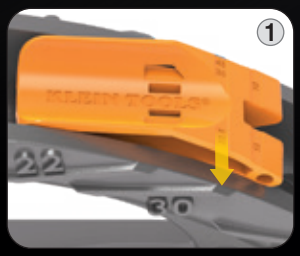
ANGLE SETTER™*

Klein's unique Angle Setter™ (CAT. NOS. 51611, 51612, 51613) creates a hard stop for quick, accurate, and consistent floor or air bends

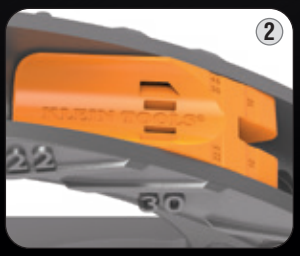
1. Conduit Stop Track
2. Angle Alignment Grooves
3. Alignment Tabs
4. Lanyard Hole

*For use with EMT Conduit

Use markings for desired bend angle (10°, 22.5°, 30°, 45°)



1. Align the Angle Setter™ alignment groove with end of bender head angle line (30° shown).



2. Using your palm, press Angle Setter™ firmly into place, until it is flush with the sides of the bender channel - ensure alignment tabs are fully seated into alignment notches.

3. Insert conduit into bender head and prepare to bend as usual.

4. Bend conduit until contact with the Angle Setter™ is felt. Will work for floor and air bends.

Caution: Bending past Angle Setter™ can result in kinks in conduit

See KleinTools.com for Zip Guide™ tables for Offset, Saddle, and Stub-Up Bends
