Wall Plates
TradeMaster® Thermoplastic Nylon
One & Two Gang

TP1, TP2, TP8, TP82, TP26, TP262, TP13, TP23, TP7, TP720

Maximum durability in plastic wall plates.

Self-extinguishing nylon construction makes these TradeMaster® wall plates virtually unbreakable. They will not crack if excessive torque is applied to installation screws. They are 3/16" higher and wider than typical plastic wall plates — not enough to be apparent to the eye, but the extra size cuts costs by reducing dry wall rework.

Features & Benefits

An extra 3/16" width and height than standard size wall plates for more tolerance in covering ragged sheet rock openings.

Molded of rugged, virtually unbreakable self-extinguishing .070 inch thick thermoplastic Nylon 6.

Aesthetically pleasing contour design.

TP26-W, TP2-I, TP8-LA

Pre-installed mounting screws on single gang toggle, duplex receptacle and decorator openings.

Field Uses/Vertical Markets

- Health Care
- Education
- Institutional
- Retail
- Office
- Hospitality/Lodging
- Multiple Dwelling
