

Stainless steel conduit, cable & wire management solutions

For hazardous, harsh industrial and commercial applications

Powering Business Worldwide

Stainless steel conduit, cable and wire management products

The ultimate in corrosion resistance, durability and aesthetics

Crouse-Hinds series stainless steel conduit, cable and wire management products deliver power where you need it, saving you time and money throughout the life of your facility.

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel a long-term, economical solution for the most extreme environments.

Our stainless steel products are manufactured using high grade 316 stainless steel, and there are solutions for hazardous area, harsh industrial, and commercial applications.

Our comprehensive stainless steel portfolio is virtually immune to rust, corrosion and discoloration, greatly lowering cost of ownership through reduction in maintenance and reinstallation costs.

This long life, low maintenance solution is ideal for:

- Oil & gas extraction and refining
- Food and beverage manufacturing
- Power generation
- Chemical, Petrochemical & Pharmaceutical plants
- Waster & Wastewater treatment
- Marine applications
- Pulp and paper
- Infrastructure and airports

Why choose stainless steel in areas where corrosion is a concern?

Built-to last

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel a long-term, economical solution for the most extreme environments.

The fittings are even self-healing. If scratched or nicked, the chromium in the stainless steel will combine with oxygen to reseal its protective layer and maintain its corrosion protection properties.

Lower lifetime cost

The lifespan of stainless steel is typically equal to the lifespan of the structure, eliminating maintenance and reinstallation costs.

Easier installation, lower weight and less environmental impact over PVC-Coated alternatives

Our stainless steel conduit, cable and wire management products require no specialized installation training to ensure proper service life.

Plus, unlike PVC plastic, stainless steel does not pose serious threats to the environment and human health during its production and use.

Stainless steel conduit bodies, boxes and covers

Condulet stainless steel fittings deliver power where you need it, saving you time and money throughout the life of your facility.

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel Condulet bodies and boxes a long-term solution for even the most extreme environments.

Applications:

Conduit outlet bodies are installed in conduit systems to:

- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Act as mounting outlets for lighting fixtures and wiring devices
- Connect conduit sections
- Provide taps for branch conduit runs
- Make 90° bends in conduit runs
- Provide for access to conductors for maintenance and future system changes

Features:

- Self-healing properties of stainless steel fittings help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Stainless steel fittings retain their strength in extreme heat and extreme cold conditions
- Fitting surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement of fittings – this will lower your total cost of ownership and increase your return on investment
- Stainless steel fittings do not require harsh environment-damaging cleaners to keep them looking like new
- Conduit hubs have tapered threads and feature integral bushing for protection of wire insulation
- Outlet bodies designed to match conduit size for neat, compact installations

Certifications and compliances:

- UL standard: 514A
- CSA standard: C22.2 No. 18.1-04
- Raintight – when installed with cover and gasket

Standard materials:

- Bodies and covers – 316 stainless steel
- Cover screws – 316 stainless steel
- Gasket – neoprene

Stainless steel VXF junction boxes

Applications:

For use where high quality, durable products that withstand corrosion, chemical treatments and wash downs are required, including:

- Wastewater treatment plants
- Food and beverage facilities
- Pharmaceutical plants
- Pulp and paper mills
- Mines

VXF stainless steel junction boxes are installed in threaded rigid conduit systems to:

- Act as junction boxes for making terminations
- Act as pull outlets

Features:

VXF junction box

Includes:

- Four tapped conduit openings with three 316 stainless steel installed recessed hex plugs
- Four 1/4-20 x 1" stainless steel hex head bolts for mounting box to surface
- One 10-32 x 1/4" installed green ground screw with slotted head

VXF hub cover

Includes:

- Fixture rated up to 130 lbs. with VXF body
- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts and lock washer for cover attachment to box
- One 10-24 x 5/8" Phillips pan head set screw

VXF blank cover

Includes:

- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts for cover attachment to box
- GRF10SS comes with PVC protective peel off coating

GRF replacement gasket

Includes:

- Neoprene gasket

Certifications and compliances:

- UL/cUL Listed, File No. E-15022
- NEC/CEC
 - Class I, Division 2
 - Class II, Divisions 1 & 2
 - Class III
- Fixture rated (with pendant cover)
- UL514A
- Wet locations
- NEMA 4X
- Assembled in the USA

Standard materials:

- Body, plugs and cover – 316 stainless steel
- Nuts and washers – stainless steel
- Gasket – neoprene

Standard finishes:

- Body, plugs, nuts and washer – natural
- GRF10SS – natural with #4 brushed finish

Stainless steel FS and FD device boxes and covers

Applications:

Cast device boxes are installed in conduit systems to:

- Accommodate wiring devices
- Act as pull boxes for conductors in a conduit system
- Provide openings to make splices and taps in conductors
- Provide access to conductors for maintenance and future system changes
- Connect conduit systems

Features:

- Self-healing properties of stainless steel fittings help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Stainless steel fittings retain their strength in extreme heat and extreme cold conditions
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Stainless steel fittings do not require harsh environment-damaging cleaners to keep them looking like new
- Internal green grounding screw standard
- Tapered threads for protection of wire insulation
- Wide selection of covers available
- Single or double conduit entry
- Ample wiring room provided for easy installations

Stainless steel Myers hubs

MYERS HUBS

Applications:

- Myers™ hubs are used in the termination of electrical circuits through wall of the enclosure
- Designed for use indoors or outdoors with rigid conduit and IMC
- Ideal for pharmaceutical, chemical and food processing, pulp/paper, nuclear, solar and commercial construction applications
- Resistant to a variety of chemicals, including acetic, citric and salt water
- Special design of o-ring gasket provides excellent environmental ratings and chemical resistance
- Hub is provided with a stainless steel ground nut

Features:

- Wide range of styles, trade sizes and materials to meet customer requirements and preferences
- Multiple certifications provide users peace of mind
- Easy installation and smooth pulling service for labor savings
- Tapered female threads for rigid/IMC conduit, NPSM male threads

Certifications and compliances:

Stainless steel fittings and accessories

LIQUIDTIGHT CONDUIT FITTINGS

Applications:

- Used in tough, industrial and standard applications
- Made of strong, corrosion-resistant, 304 stainless steel for long, dependable service where superior corrosion resistance and/or strength is required

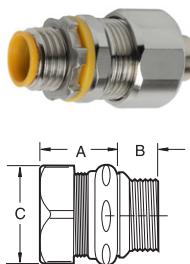

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight and 90 degree configurations
- Available in sizes $\frac{1}{2}$ " to 2"

Certifications and compliances:

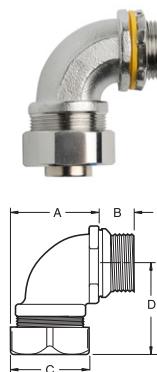

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes $\frac{3}{8}$ " through $1\frac{1}{4}$ " under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

LOCKNUTS (ORDER SEPARATELY)

Applications:

- 316 stainless steel locknuts can be used with conduit or NPS threaded pipe

Features:

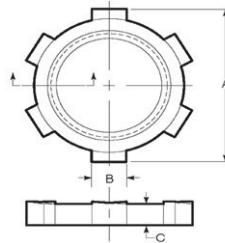

- Precision machined threads allow for easy installation
- Heavy stock thickness and specially designed tabs tighten securely and will not easily loosen even in the most severe applications

Standard material:

- Locknut – stainless steel

Standard finish:

- Stainless steel – natural

THREE-PIECE COUPLINGS

191SS

Features:

- Designed to join and connect threaded ends of rigid conduit where neither length of conduit can be turned
- These stainless steel three-piece couplings are polished to a bright finish for increased corrosion resistance and improved appearance
- 316 stainless steel

Features:

- This heavy duty "electrician's" style beam clamp is cast in stainless for superior strength and corrosion resistance
- Designed for use on I-beams, channels and other structural members, this beam clamp provides firm fixturing without drilling holes
- Attachment holes in the back and bottom permit a wide variety of applications

Standard materials:

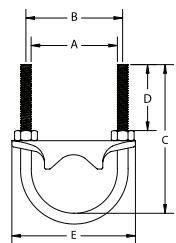

- 316 stainless steel

Stainless steel fittings and accessories

RIGHT ANGLE CLAMPS

RAC50SS

Features:

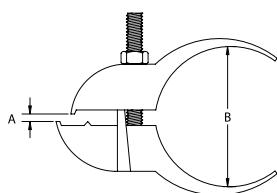

- Designed to fit pipe/rigid conduit as well as PVC coated rigid conduit, right angle clamps firmly fix pipe to the flange of a structural member without drilling holes
- Cast in CF8M (316) with 316 stainless steel U-bolt and nuts, these clamps are designed for both strength and corrosion resistance

Cat. #	Size	Unit qty.	Std. pkg.	Wt. lbs. per 100	A	B	C	D	E

PARALLEL CLAMPS

PARC75SS

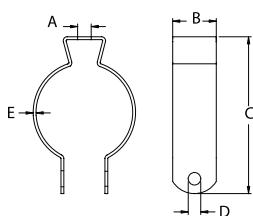

Features:

- Used to run pipe or conduit along the flange of I-beams or channels simply and easily without drilling holes
- The 100% stainless (CF8M and 316 stainless steel) design offers superb corrosion resistance and strength
- These clamps will fit both rigid conduit and PVC coated rigid conduit and are available in 3/4" and 1" trade sizes

Features:

- Designed for use with stainless threaded rigid conduit
- These stainless steel elbows are polished to a bright finish for increased corrosion resistance and improved appearance

Stainless steel EYS conduit sealing fittings

Applications:

EYS sealing fittings:

- Restrict the passage of gases, vapors or flames from one portion of the electrical installation to another at atmospheric pressure and normal ambient temperatures
- Limit explosions to the sealed off enclosure
- Limit pre-compression or "pressure piling" in conduit systems

Sealing fittings are required:

- At each entrance to an enclosure housing an arcing or sparking device when used in Class I, Division 1 and 2 hazardous locations; to be located as close as practicable and, in no case, more than 18" from such enclosures
- At each conduit entrance of 2" size or larger to an enclosure or fitting housing terminals, splices or taps when used in Class I, Division 1 hazardous locations; to be located as close as practicable and, in no case, more than 18" from such enclosures
- In conduit systems when leaving Class I, Division 1 or Division 2 hazardous locations
- In cable systems when the cables either do not have a gas/vaportight continuous sheath or are capable of transmitting gases or vapors through the cable core when those cables leave the Class I, Division 1 or Division 2 hazardous locations

Features:

EYS sealing fittings include:

- Minimum turning radius
- Large openings with threaded closures to provide easy access to conduit hubs for making dams
- Integral bushings in conduit hubs to protect conductor insulation from damage
- Taper tapped hubs to ensure ground continuity

EYS sealing fittings are available for installation in both horizontal or vertical positions.

Stainless steel benefits:

- Retain strength in extreme heat and extreme cold conditions
- Surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement – this will lower your total cost of ownership and increase your return on investment
- Do not require harsh environment-damaging cleaners to keep them looking like new

Certifications and compliances:

NEC/CEC:

- Class I, Divisions 1 & 2, Groups A, B, C, D
- Class II, Division 1, Groups E, F, G
- Class III

Standard material:

- Bodies and plugs – 316 stainless steel

Standard finish:

- Passivated

Ordering information:

For sealing in vertical or horizontal positions

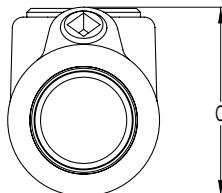

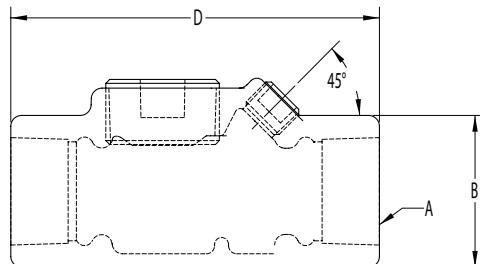

Hub size	Cat. # Female hub
3/4"	EYS21 SS
1"	EYS31 SS

Accessories (ordered separately):

Description	Cat. #
• 3/4" to 1/2" reducer	RDU303029 <i>See page 92 for more information</i>
• 1/2" conduit nipple	NPL50CL 316SS
• 3/4" conduit nipple	NPL75CL 316SS
• 1" conduit nipple	NPL100CL 316SS

See Commercial Products Catalog for more information

Dimensions (in inches):

Hub size	A	B	C	D
3/4"	0.75	1.50	1.95	3.63
1"	1.00	1.75	2.20	4.25

Stainless steel Condulet GUA conduit outlet boxes

Applications:

GUA conduit outlet boxes are installed within hazardous area conduit systems to:

- Protect conductors in threaded rigid conduit
- Act as pull and splice boxes
- Connect lengths of conduit
- Change conduit direction
- Provide access to conductors for maintenance and future system changes

Features:

GUA conduit boxes have:

- Neoprene o-ring standard to meet NEMA 4X requirements
- Cast ears on cover to permit easy removal and tightening
- Internal green ground screw #10
- Threaded cover openings
- Five different hub arrangements
- Taper threaded hubs to provide grounding continuity
- Smooth integral hub bushing protects conductor insulation when pulling
- Surface covers furnished with boxes
- Cover threads are 12 pitch

Stainless steel benefits:

- Self-healing properties help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Retain strength in extreme heat and extreme cold conditions
- Surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement – this will lower your total cost of ownership and increase your return on investment
- Do not require harsh environment-damaging cleaners to keep them looking like new

Certifications and compliances:

NEC/CEC:

- Class I, Divisions 1 & 2, Groups C, D
- Class II, Division 1, Groups E, F, G
- Class II, Division 2, Groups F, G
- Class III

UL standard:

- UL1203

ANSI standard:

- C33.27

CSA standard:

- C22.2 No. 30

Environmental ratings:

- NEMA/EEMAC 3, 4X

Standard material:

- Bodies and covers – 316 stainless steel

Accessories (ordered separately):

Engineered for long service life and low maintenance

Cable & wire management

- Conduit bodies, boxes and covers
- Rigid and IMC fittings
- Cable glands
- Myers hubs
- Liquidtight fittings
- Explosionproof sealing fittings

Cable tray & support systems

- Cable tray
- Metric cable ladder
- Flextray wire basket tray
- Pan tray
- Series 3 & 4 cable tray
- Strut systems
- Cable cleats

Power distribution/control & connectivity

- Panelboards
- Interlocked receptacles
- Disconnect switches and main breakers
- Control stations safety switches and starters
- Transformers

Environmental enclosures

- NEMA 4X enclosures
- Wall mount enclosures
- Ground mount enclosures
- Feed-through wireway

Communication & security

- CCTV Camera systems
- Work stations/remote terminals
- Beacons
- Call points

LED and fluorescent lighting

- V-Spring safety light poles
- LED lighting
- Fluorescent lighting

Available materials and finishes for corrosion protection:

- Stainless Steel
- Feraloy iron alloy, electrogalvanized with aluminum acrylic paint

- Copper-free aluminum
- Marine brass
- Silicon bronze

- Hot-dipped galvanized
- Epoxy powder coatings
- Krydon
