# 3M<sup>TM</sup> Electrical Spring Connectors 512

# Data Sheet

### Application

Use a 3M<sup>TM</sup> Electrical Spring Connector 512 connector to electrically connect two or more wire ends in a pigtail application and insulate the connection, or to insulate a single wire end.

### Wire Range

AWG Range: Solid or stranded copper conductors only. No. 20 thru No. 8 (0,75 mm<sup>2</sup> thru 6,0 mm<sup>2</sup>).

### Construction

Spring - Spring Steel, Corrosion-Resistant Coating Insulator - Flame-Retardant Nylon Color - Red

### Weight

.006 lb. (2,7 gm)

### **Engineering Specification**

3M Electrical Spring Connector 512 shall be capable of connecting wires within the range of No. 20 thru No. 8 solid or stranded copper

conductors in a pigtail application. The connector shall be constructed of an active (live) spring and covered by a flame-retardant nylon insulator. The spring shall have a corrosion resistant coating. The connector shall be UL Listed as a pressure cable connector and be CSA Certified. The connectors shall be voltage rated 600 volts maximum, building wire, 1000 volts maximum signs, fixtures, and luminaires. The connector shall have a maximum operating temperature of  $105^{\circ}$ C.

### **Regulatory Agencies**

**UL Listed** as a Pressure Cable Connector Tested per UL Standard 486C UL File No. E23438

**CSA Certified**-CSA Standard C22.2 No. 0, 188-M1983 CSA File No. LR15503 Operating Temperature: 105°C (221°F) Voltage Rating: 600 volts max. building wire 1000 volts max. signs and luminaires. Flammability Rating: C22.2 No. 0.6 V-2

### **Classified** in accordance with **IEC** (International Electrotechnical Commission) publications 685-1 and 685-2-4. UL-IEC file No. E95240. Operating Temperature: 105°C (221°F) Voltage Rating: 600 volts max. building wire;

1000 volts max. signs and fixtures Flammability Rating: UL94 V-2

### **Installation Instructions**

### 

Turn power off before installing or removing terminal. All electrical work should be done according to appropriate electrical codes.

- 1. Strip wire insulation to length specified in chart to the right, according to conductor size.
- 2. Firmly grasp wires, making sure insulation ends are even and tightly bundled. (wires may be twisted or untwisted). Slip connector over wire tips.
- 3. Turn connector onto wires in a clockwise direction until secure.
- 4. To remove, turn connector counter-clockwise.

Conductor Size	Strip Length
20-16 AWG (0,75-1,5 mm <sup>2</sup> )	3/4" (19,0 mm)
14-8 AWG (2,5-4,0 mm <sup>2</sup> )	5/8" (15,9 mm)

## Metric Wire Combinations

### International Electrotechnical Commission

Rated Capacity: 2,0-16,0 mm<sup>2</sup> Voltage Rating: 600 volts maximum Reusability: Reusable for same capacity or larger Wire Type: Copper only

See installation instructions for conductor strip lengths.
