

# xEnergy Basic Low-voltage Distribution boards up to 630 A

**EATON**

*Powering Business Worldwide*

# Energizing a world that demands more.

## We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

## Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2016 sales \$19.7 billion, Eaton has approximately 95.000 employees around the world and sells products in more than 175 countries.

# xEnergy Basic

Wall-mounted and floor-standing enclosures for electrical distribution up to 630A

The smallest distribution board of our xEnergy family is the most flexible and variable system in the entire range. The diversity of different types and sizes makes the use in almost every application possible. Thanks to its certification as low-voltage distribution board intended to be operated by ordinary persons acc. to IEC/EN 61439-1/3 as well as to IEC/EN 62208, the xEnergy B is the first choice for electrical distribution in residential and functional buildings.

## Benefits:

- Wide range of products
- Pre-assembled or flat-pack
- The interior is completely flexible
- Large number of accessories
- Mounting kits are compatible with other products

## Features:

- Sheet steel enclosure polyester powder-coated (grey or white)
- Floor-standing, surface-mounted or flush-mounted version
- Three different ways of assembling the interior fitting
- Degree of protection IP30, IP43 or IP54
- Impact resistance IK07
- Protection class I

# xEnergy Light

Power distribution board and control panel up to 1600A

The proven xEnergy Light cabinet system is suitable for a wide range of applications. Thanks to its incredible versatility, xEnergy Light can be used both as a power distribution board and as a control panel in industrial applications and in functional buildings.

The robust 2mm thick, multiple-folded sheet-steel frame provides the stability required for any application, in stand-alone enclosures as well as in add-on enclosures which are common in power distribution.

Flat-pack orders allow for space-saving and therefore cost-efficient deliveries. xEnergy Light can also be ordered as a pre-assembled cabinet. xEnergy Light meets of course the requirements of the latest IEC 61439/1-3 and IEC/EN 62208 standards.

## Benefits:

- Pre-assembled or flat-pack
- Wide range of enclosure sizes to choose from
- Easy to handle
- Robust frame construction
- Flexible and easy to mount
- Same screw head throughout the system
- Corrosion-resistant powder coating
- Straight-forward industrial design

## Features:

- IEC 61439/1-3 and IEC/EN 62208
- Combination options with different installation systems such as EP, xEnergy Light, SASY60i,..
- Degree of protection IP40 and IP55
- Stand-alone cabinet or add-on system
- Foam-shaped door sealings
- Consistent system up to 1600A

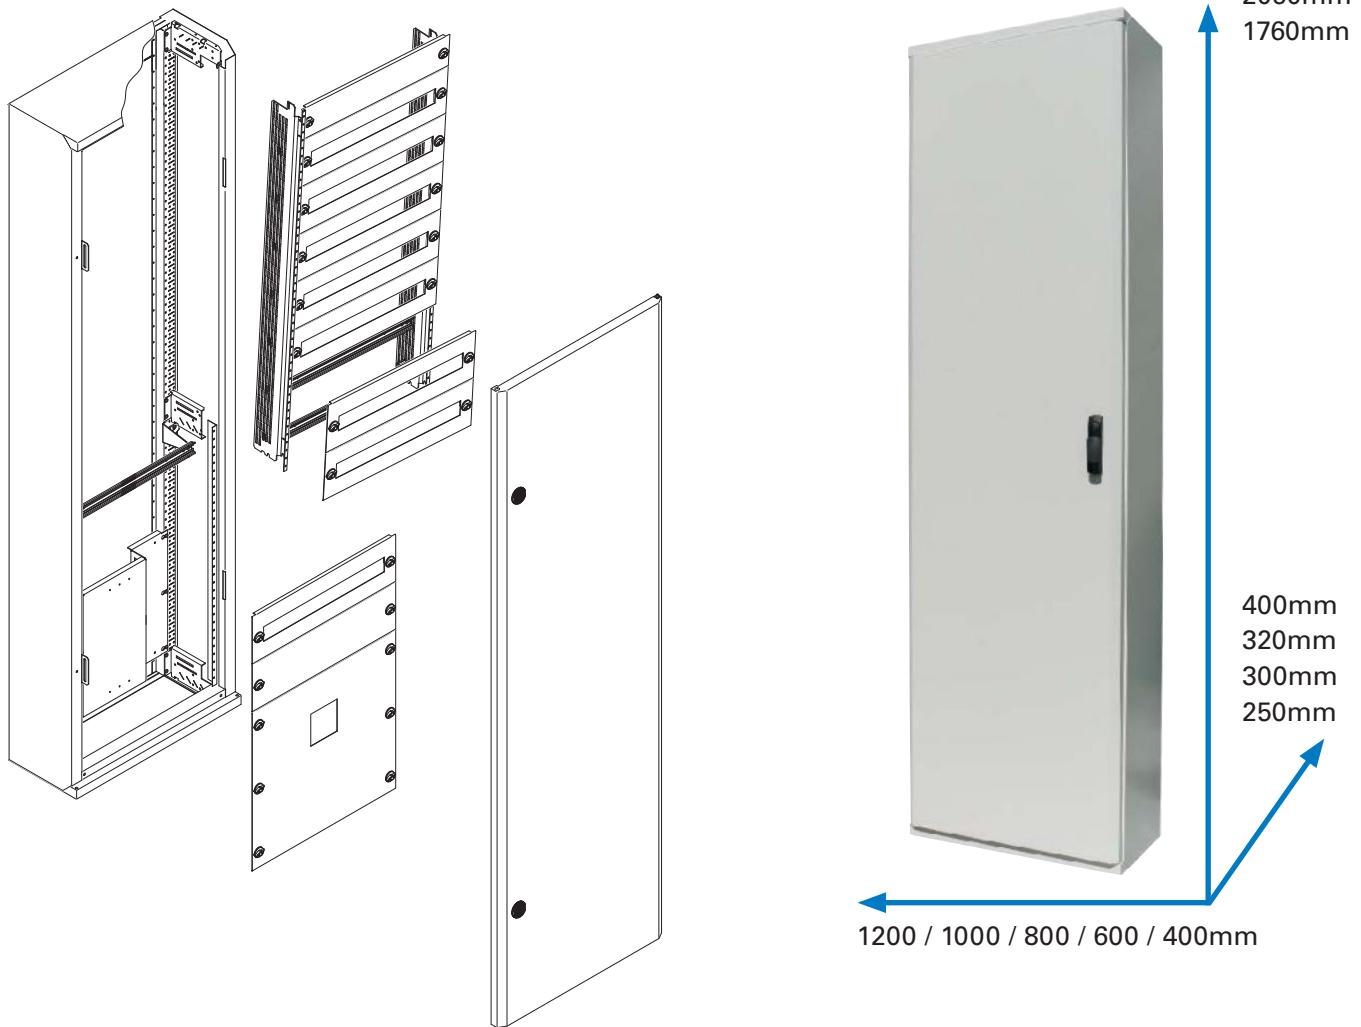

# xEnergy Basic

## Floor-standing cabinet IP30 / IP54

Typical applications for that kind of cabinet:

- Sub-distribution board in functional buildings like hotels, offices, shopping centers, schools and hospitals...
- Multiple meter applications in residential buildings
- Control cabinet in small manufacturing areas

### System architecture (IP30 design)

### Key-features / Sales arguments:

- Robust welded construction
- RAL 7035 (grey) or RAL 9016 (white)
- Transparent or non-transparent door version available
- Two different locking mechanism
- Variable interior fitting
- Divisible interior space for different compartments (vertical section)
- Flexible DIN-rail installation possible
- Universal mounting plates
- NZM/BZM mounting kits
- SASY 60i busbar system capable of being integrated
- Components for clear and organized wiring routing
- Front cover latch with self-acting earth connection

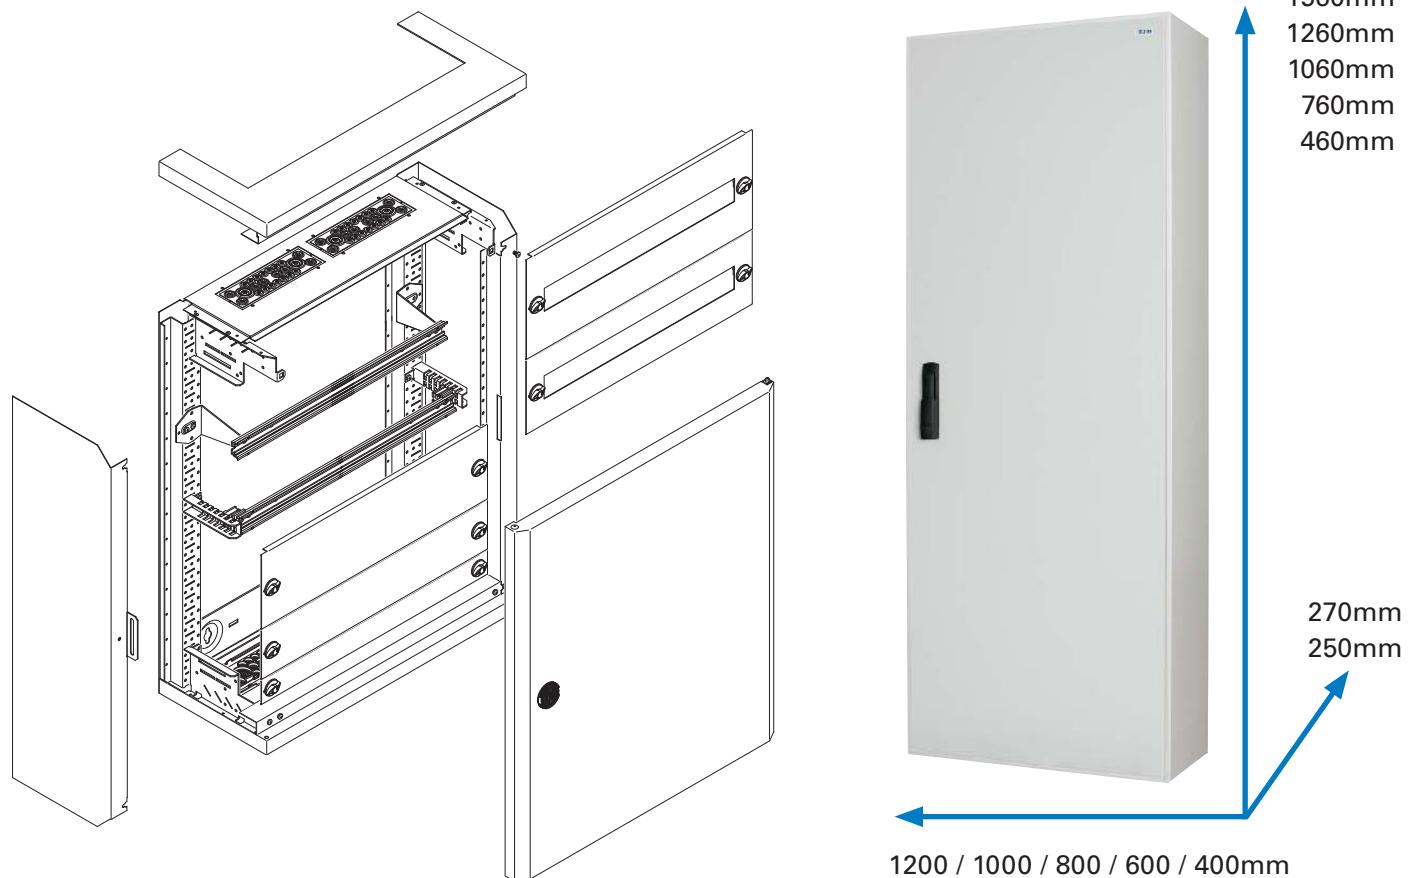

# xEnergy Basic

## Surface-mounted cabinet IP30 / IP54

Typical applications for that kind of cabinet:

- Sub-distribution board in functional buildings like hotels, offices, shopping centers, schools and hospitals...
- Combined meter and distribution cabinet in classic households and apartments

### System architecture (IP30 design)

### Key-features / Sales arguments:

- Individual components as flat-pack (IP30)
- Robust welded construction (IP54)
- RAL 7035 (grey) or RAL 9016 (white)
- Transparent or non-transparent door version available
- Two different locking mechanism
- Variable interior fitting
- Divisible interior space for different compartments (vertical section)
- Flexible DIN-rail installation possible
- Universal mounting plates
- NZM/BZM mounting kits
- SASY 60i busbar system capable of being integrated
- Components for clear and organized wiring routing
- Front cover latch with self-acting earth connection

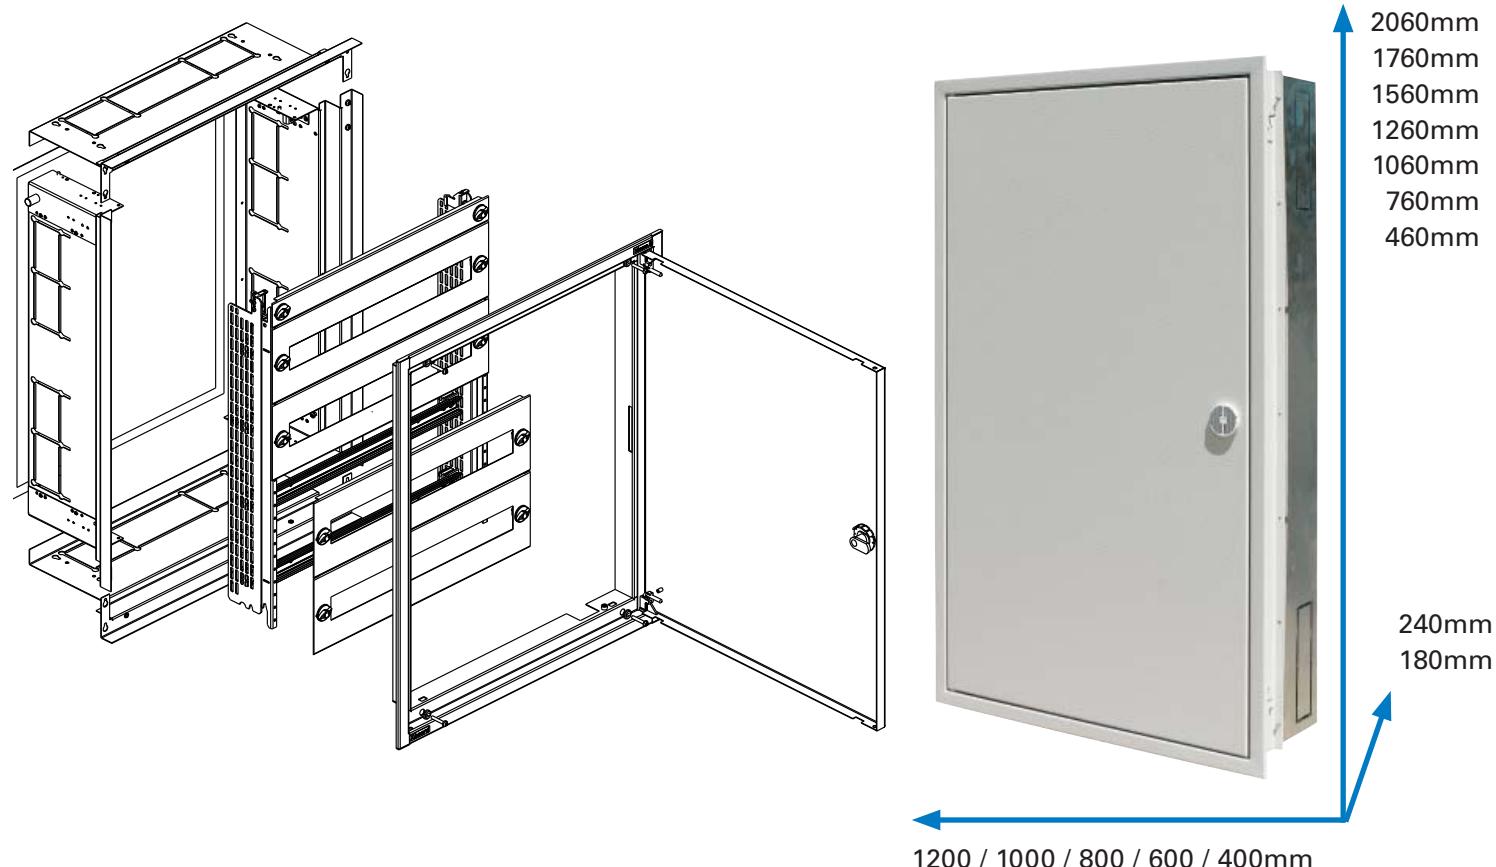

# xEnergy Basic

## Flush-mounted cabinet IP30 / IP43 / IP54

Typical applications for that kind of cabinet:

- Sub-distribution board in functional buildings like hotels, offices, shopping centers, schools and hospitals...
- Combined meter and distribution cabinet in classic households and apartments
- Installation in the outdoor area of a house/building for public access (e.g. energy provider)

### System architecture (IP30 design)

### Key-features / Sales arguments:

- 3-step-system consists of wall-box, door + frame and mounting insert
- Aluminium construction for outside wall installation available
- Individual configurable
- RAL 7035 (grey) or RAL 9016 (white)
- Two different locking mechanism
- Flexible DIN-rail installation possible
- Universal mounting plates
- NZM/BZM mounting kits
- SASY 60i busbar system capable of being integrated
- Components for clear and structured wiring routing
- Front cover latch with self-acting earth connection

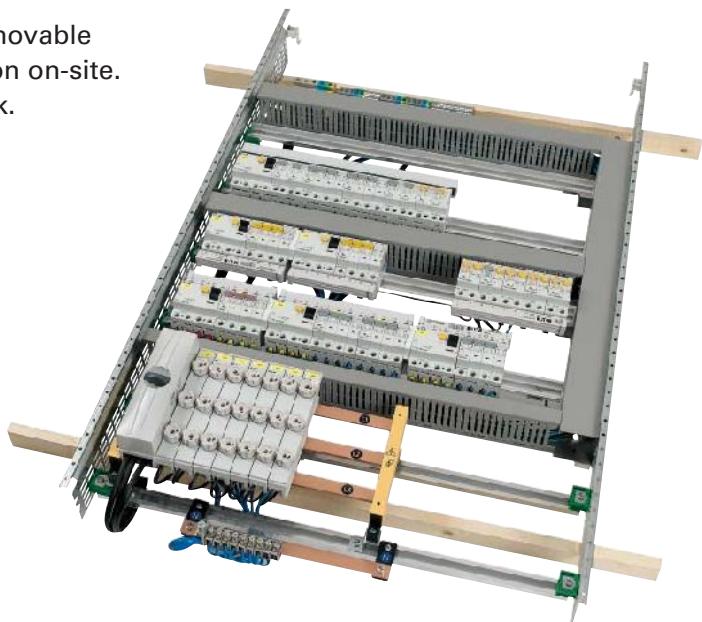

# Different ways of assembling the interior fitting

## Option 1: using "MSW" for simple wiring in the workshop

Efficient pre-installation in the workshop thanks to our removable mounting insert (BPZ-MSW) guarantees smooth connection on-site. All connection points are fully accessible and easy to check.

### Benefits:

- Fast and reliable
- Time-saving solution
- Easy access from 360° view
- No housing around the insert

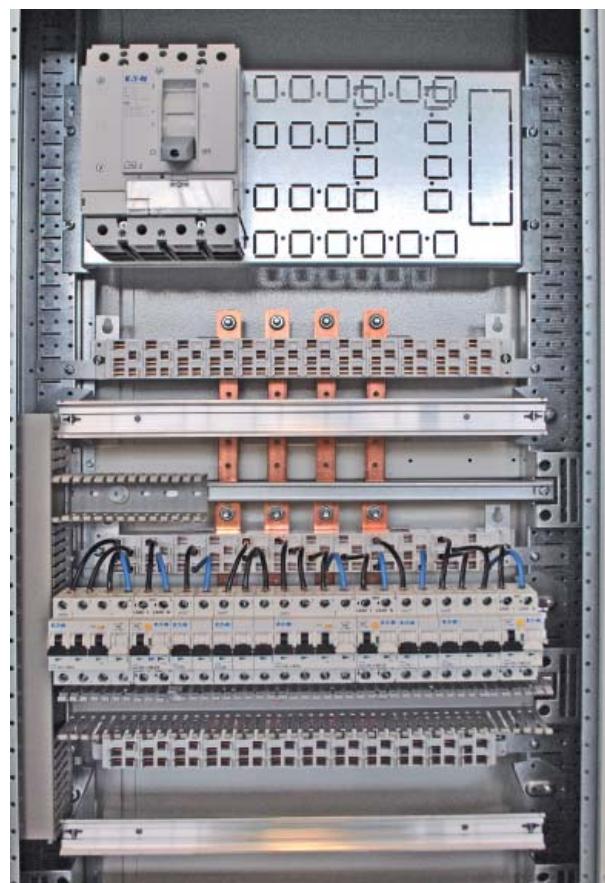

## Option 2: using fixed installation material for direct mounting inside the enclosure

Well-considered cabling and connection work directly in the enclosure thanks to different components for a clear and structured "multilayer" assembling.

All interior parts are directly linked to the installation profiles on the back side of the enclosure.

### Benefits:

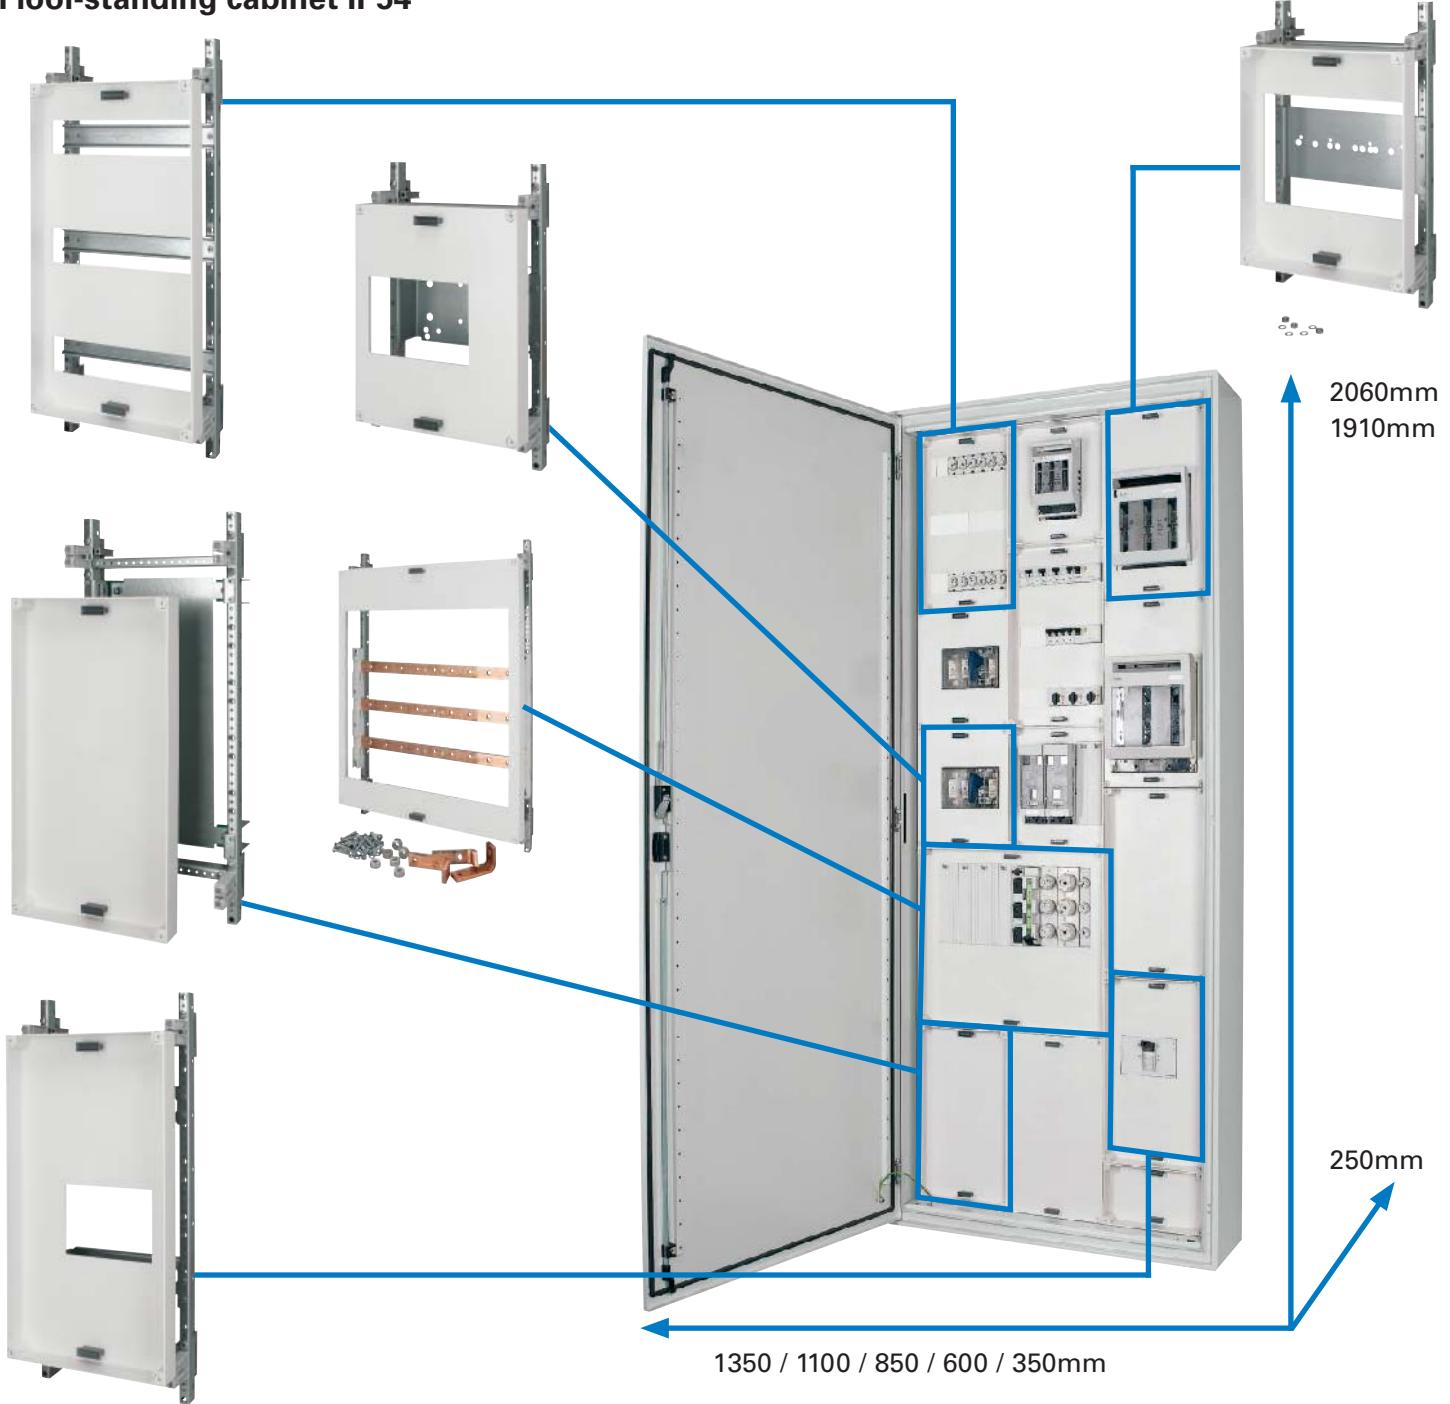

- Robust design
- Multilayer assembling possible
- Internal connection to separate cable room / busbar compartment
- Mounting kits for multiple MCCB installation available

# xEnergy Basic with standardized fitting-system EP

Option 3: using standardized modules for a clear and structured planning

Floor-standing cabinet IP54

## Key-features / Sales arguments:

- Based on standard floor-standing cabinet IP54
- Prepared for standardized fitting-system EP
- Efficient in planning and project development phase
- Flexible and easy-to-mount design
- Wide range of different modules for MCBs / MCCBs / busbar systems / fuse switch disconnectors / meters
- Quick and easy installation thanks to high percentage of factory-assembled components
- The configuration is selectable by the customer and can completely differ from one project to another

# xEnergy Basic with standardized fitting-system EP

## Surface-mounted cabinet IP43 / IP54

The family of EW wall-mounted enclosures is now complemented by re-engineered versions of the EWS and EWP type series. The new generation of the proven EWS surface-mounted, wall-mounted IP43 enclosure of 210 mm depth and of the EWP IP54 enclosure of 225mm depth is particularly interesting because of the fast and easy-to-install EP installation sections.

The 2K membrane flanges at the top/bottom, the 270° door opening angle of the EWP, a lead-sealable rotary bolt and a 3-point rod lock for large-size enclosures, as well as the RAL 9016 colour are the main features of the

new generation. As they are graded as protection class 2 and approved according to the IEC/EN 62208 empty enclosures standard, the EWS and EWP surface-mounted, wall-mounted enclosures are above all used in public buildings as a sub-distribution board according to IEC/EN 61439-2. In combination with a large number of most varied EP installation units used as assembly carriers and with Eaton switchgear and protective devices, Eaton provides a universal installation solution from a single source.

### Benefits:

- Increased safety in combination with fully insulated functional units, EP installation units and Eaton switchgear and protective devices
- Compact thanks to the torsion-resistant construction
- Easy cable management thanks to membrane flange plates at the top and bottom
- Wide range of enclosures in many standardized sizes

### Key-features / Sales arguments:

- EWS degree of protection IP43, IK09
- EWP degree of protection IP54, IK09
- Protection class II, fully insulated
- 210/225mm enclosure depth
- Complete with door and 2K membrane flanges
- Empty enclosure for accommodating EP installation units
- 270° door opening angle with EWP, and 110° with EWS
- Single and double-wing doors
- Larger enclosures come with a 3-point rod lock
- Stable and torsion-resistant construction
- Direct wall-fastening possibility with EWS
- Quick and easy reversing of the door hinges with EWS
- Body RAL 9016, door made of sheet steel, non-transparent
- Wide range of accessories

# Variable compartments in one enclosure realizable

The construction of the xEnergy Basic enables a very flexible partition from 1 to max. 3 different sections inside one distribution board! Typically 200mm compartments are used for separate cable connection room and the 400mm wide section can be used e.g. for vertical busbar system up to 630A.

The arrangement and division of the interior is completely arbitrary and is mainly up to the installation behavior from the panel builder / installer.

## Example for illustration:

xEnergy Basic type BPM-O-1200/12-P divided into

- 400mm busbar compartment (with SASY 60i busbar system)
- 600mm section for installing circuit breakers (MCBs, MCCBs)
- 200mm cable room for placing outgoing terminals / auxiliary wiring

# xEnergy Basic offers a wide range of accessories

## Power Distribution Blocks (distributor assembly terminal blocks)

- Prepared for reliable and fast connections inside the switchboard
- Installation on modular rail or mounting plate
- Screw-terminal connections

### 1-phase types

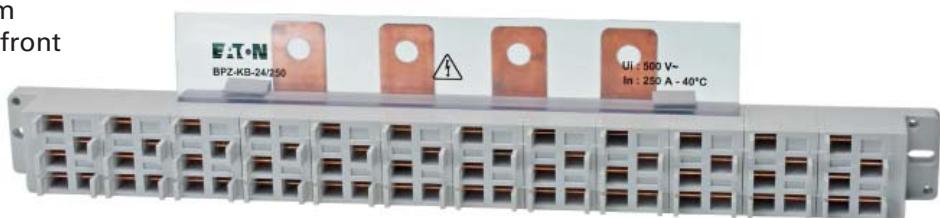

### 3-/4-phase types

### 4-phase busbar system (easy to connect)

- Connection to the vertical busbar from the back, outgoing distribution in the front
- Installation with special brackets or directly on mounting plate
- For 600 / 800mm wide compartments
- Snap-in connections

### Modular busbar system SASY 60i

- 1- up to 5-phase systems realizable
- Prepared mounting kits for horizontal installation
- Vertical integration in separate compartment possible

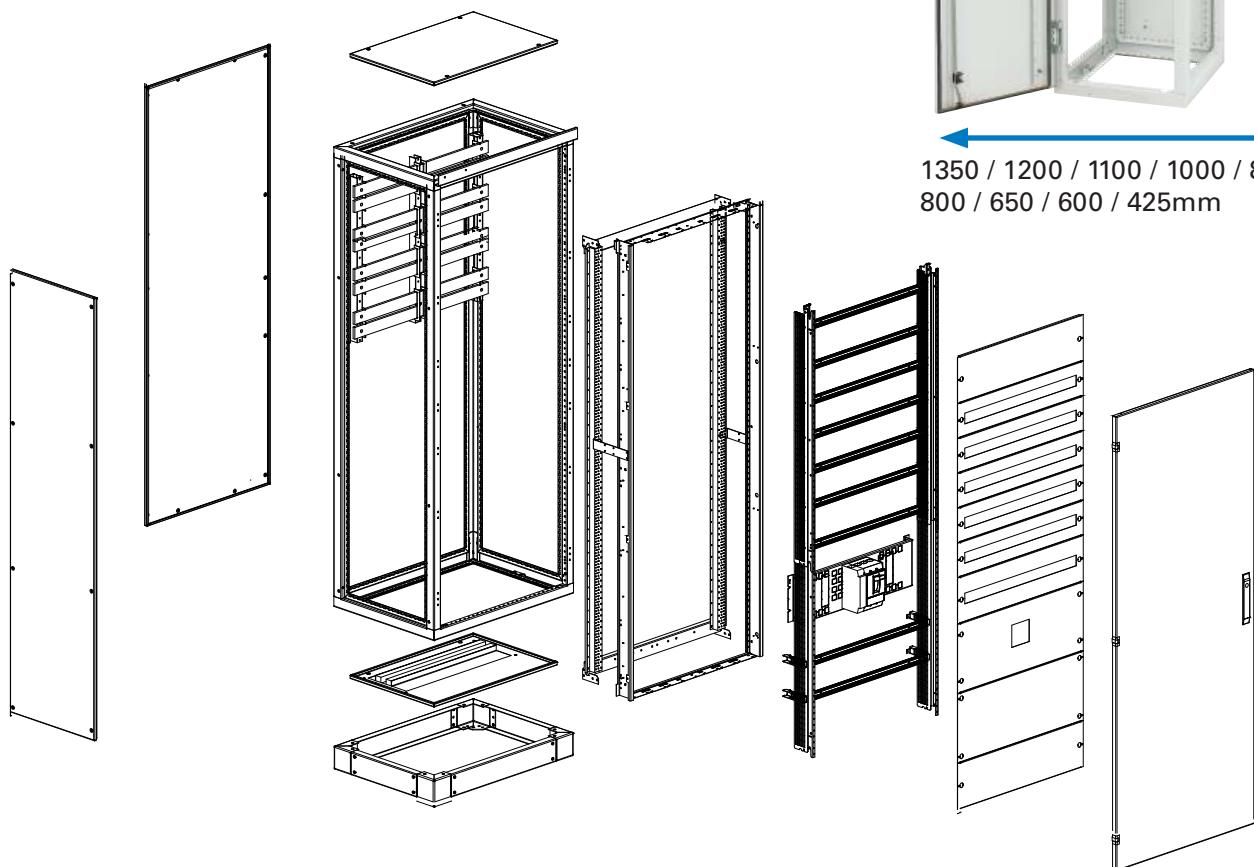

# xEnergy Light

## Floor-standing enclosure in IP40 and IP55

xEnergy Light floor-standing cabinets can be used as energy distribution boards and as control panels. For energy distribution, xEnergy Light offers all components required for realizing interior fittings for up to 1600A / Form 2. Sub-distribution boards can perfectly be implemented with combinations of our EP and Profi+ installation systems.

For general setups we provide a large number of mounting plates in different sizes. So there is a suitable solution whatever the requirements may be.

### Key-features / Sales arguments:

- Robust push-fit / screw-fixed frame construction
- Frame parts and covers are powder-coated in RAL 7035
- Easy to assemble
- As a stand-alone or add-on cabinet
- Cost-efficient transportation due to high packing density based on delivery as individual parts
- Delivery as flat-pack or as pre-assembled distribution board
- Wide range of enclosure sizes (76 combination options)
- Covers are prepared for accommodating air conditioning devices, fans and filters
- Consistent grounding concept
- Transparent section doors
- Section plinths available in 100 and 200mm height
- Compatible with xEnergy Main
- Compatible with xEnergy Basic
- Compatible with EP installation system
- Compatible with SASY60i

# xEnergy Light

## As a power distribution board

The xEnergy Light cabinet is typically used as low-voltage main distribution board which can be realized as

- Power section
- Feeder and outgoing section
- Coupler-switch section
- Outgoing sections for fuse strips

in a vertical installation position.

For all section variants you can freely choose the direction of connection, which can be done from top or bottom or both sides.

### Power sections

- Feeders, outgoers, couplers up to 1600A
- Fitting kits for air circuit breakers of the IZMX16/40 series, 3-pole, 4-pole or 3P+N, fixed or withdrawable
- Fitting kits for compact circuit breakers of the NZM3+4 series, 3-pole, 4-pole or 3P+N, fixed or withdrawable / plug-in module technology
- Cable connection system without the need for drilling holes
- Plain copper-plating
- Variable mounting heights of the fitting kits

The cable connection system without the need for drilling holes provides more safety and convenience.

### Sections for fuse strips

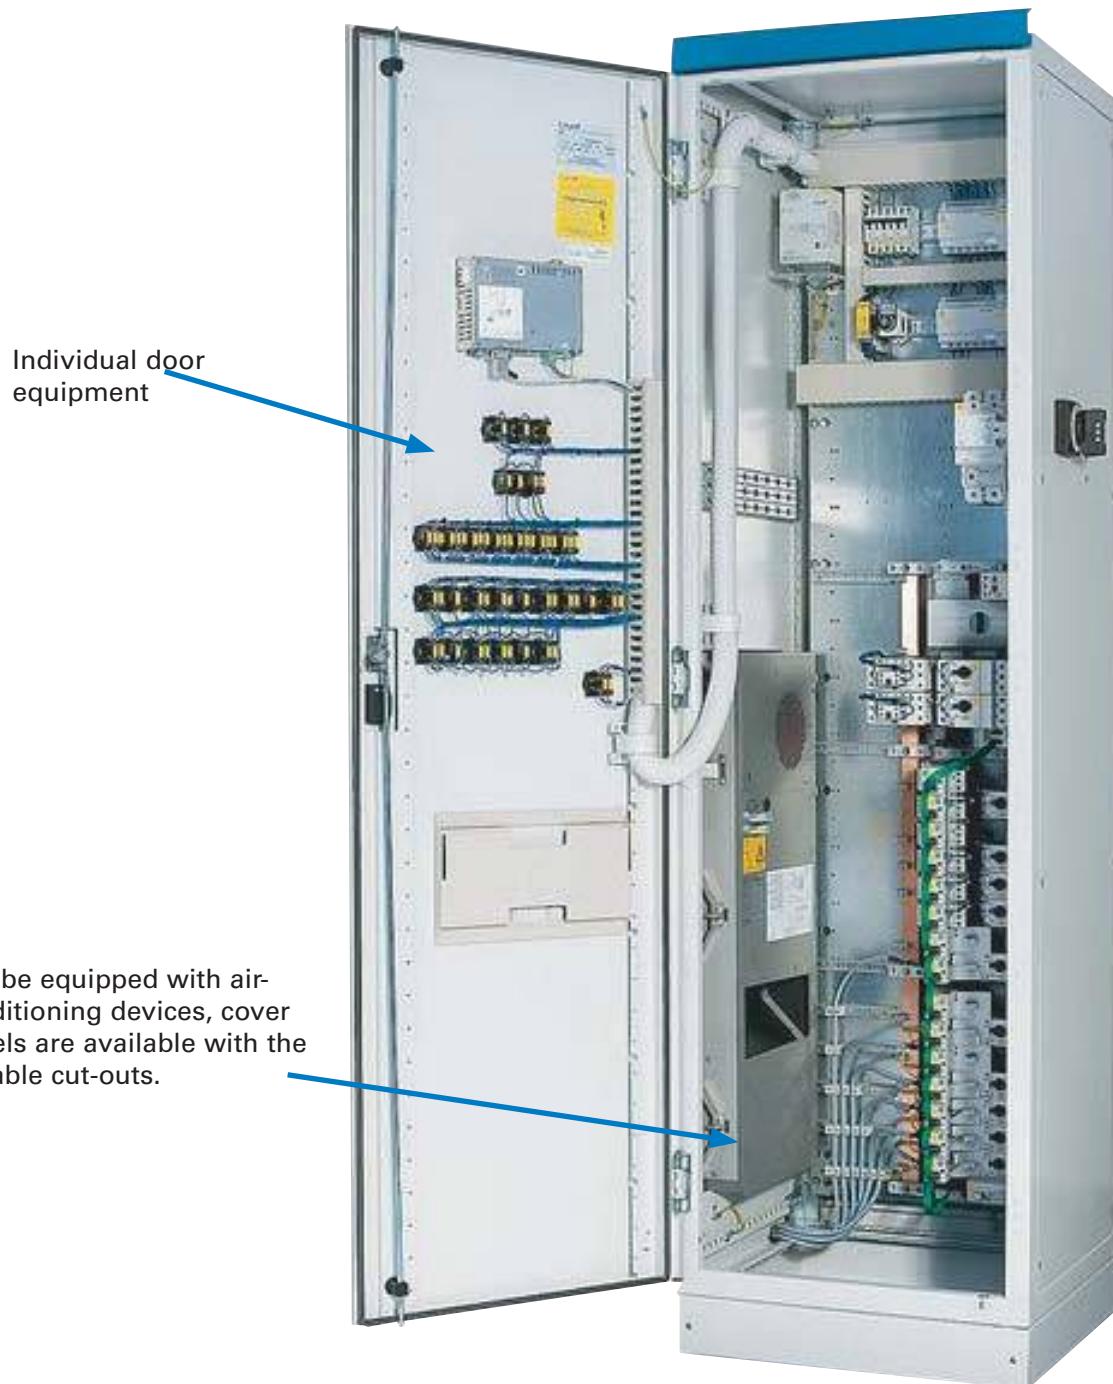

- Cost-efficient combinations of fuse strips
- Direct fixing of fuse strip combinations on the main busbar is possible
- Therefore there is no need for an additional dropper bar
- Variable height setup of the sections for fuse strips
- Fuse strips can be covered with front panels of the Profi+ series

# xEnergy Light

## As a control cabinet

xEnergy Light is the perfect basis for control cabinets. Mounting plates as high as the section can be ordered in 2 or 3 mm material thickness. There are mounting plates available as of a height of 100 mm for setup variants in different mounting heights.

In order to ensure sufficient cooling, we offer cover panels with suitable cut-outs for ventilation or air-conditioning equipment for all enclosure sizes.

### Key features / Sales arguments:

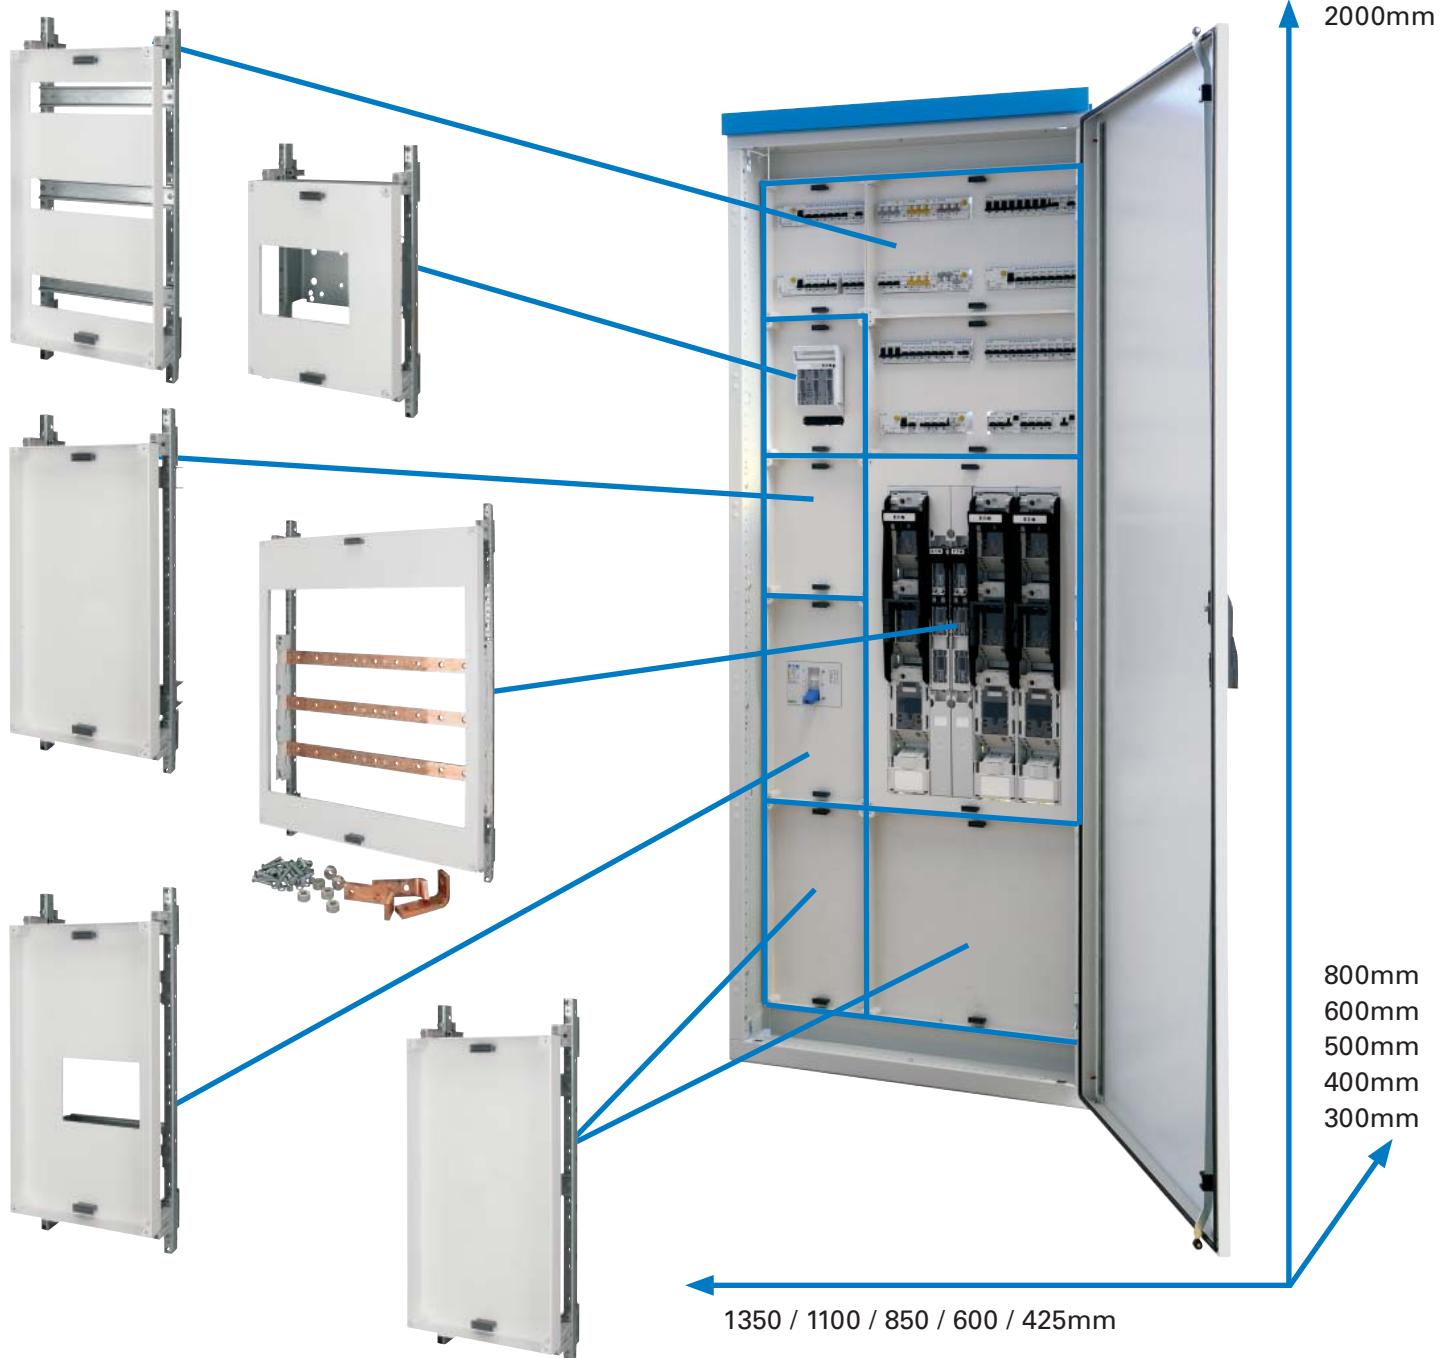

- As a typical control cabinet with different mounting plates as well as mounting plates as high as the section.
- Door equipment is possible
- Transparent doors are available
- Individual setup options
- Setups with divided mounting plates are possible
- Position of the mounting plates can be adjusted according to the requirements
- Massive mounting plates in 2 or 3mm thickness
- Can be combined with Smart-Wire-DT

# xEnergy Light

## With standard section EP installation system

The standard section installation system is a system for setting up factory-built, type-tested switchgear assemblies.

- A universal and stable system
- Rational in planning and project development
- Flexible and easy-to-mount interior fitting
- Flexibility in project development thanks to individual combination options with standard inserts for standard sections or standard components for different fields of application.

### Key-features / Sales arguments:

- A universal and stable system
- Rational in planning and project development
- Flexible and easy-to-mount interior fitting
- Individual module combination options
- Time-saving module mounting thanks to terminal/screw-type technology
- Robust front covers thanks to fibre-reinforced material

# xEnergy Light

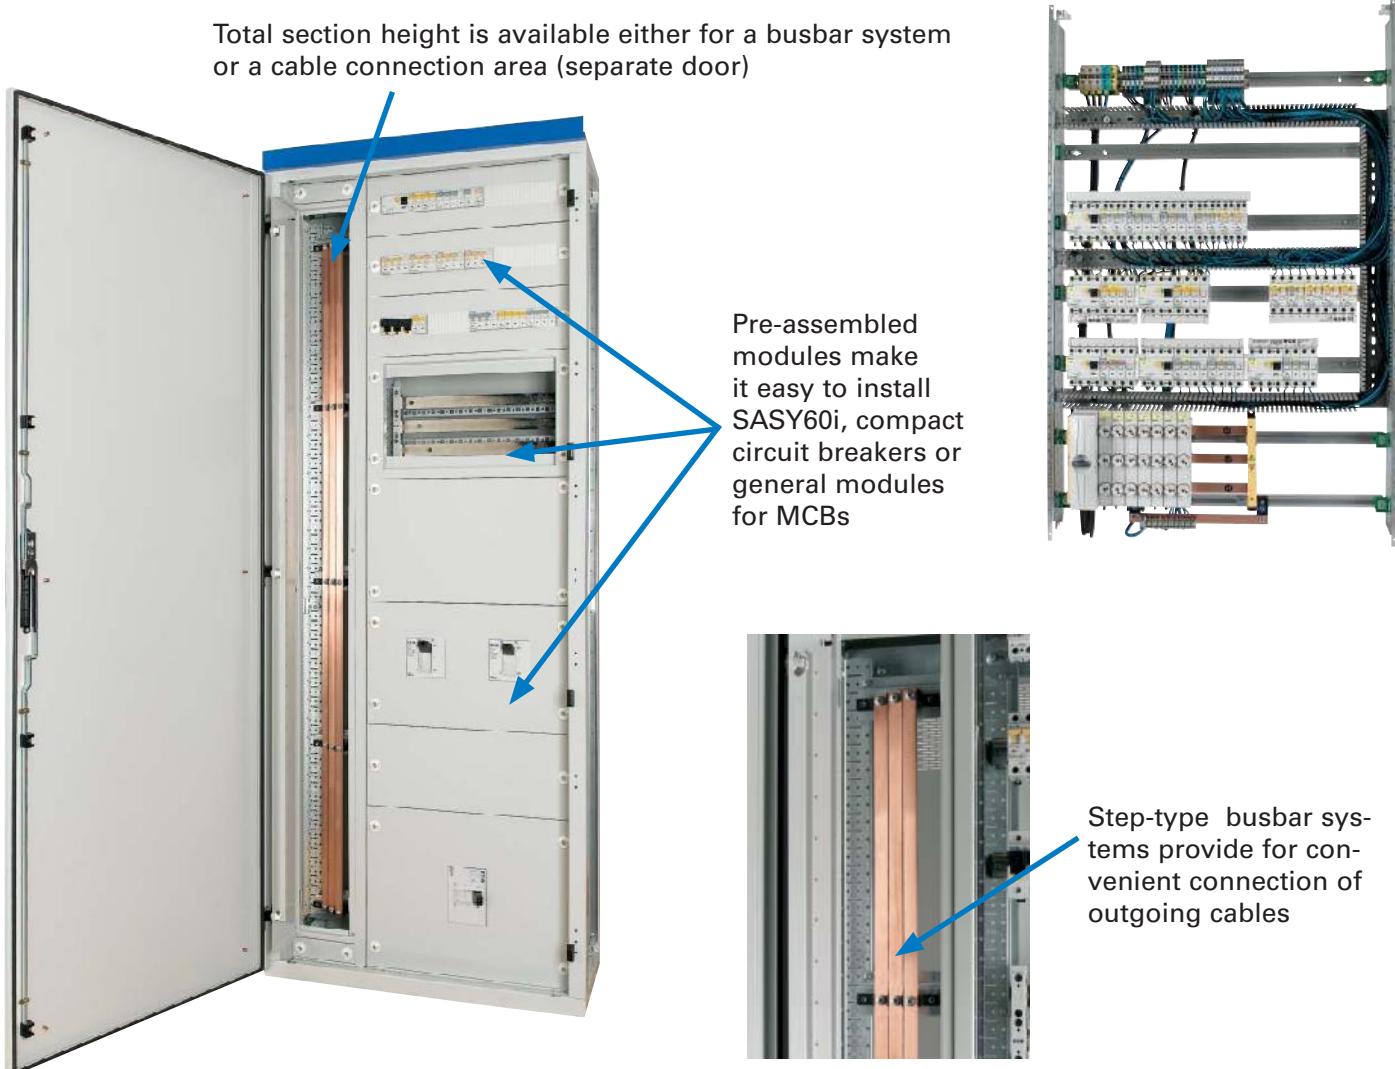

## In combination with the Profi+ installation system

Divided setups can now be equipped with a separate 200 mm or 400 mm wide vertical module. This type of module can either be used as a cable connection area or as a dropper bar area which can safely and conveniently be closed with a door made in one part. Step-type busbar carriers allow for easy connecting of outgoing cables. There are different modules available for ACBs, MCBs and MCCBs, but we also provide general modules for any type of requirements.

Combinations of air circuit breakers and Profi+ installation inserts are now possible too (both with MSW as a pivot-type mounting frame and on a fixed mounting

frame). So you can fully integrate IZM circuit breakers in a Profi+ setup and cover them perfectly with front panels. The height-related position of the circuit breakers can be freely selected within the grid. The carrier plate for circuit breakers can directly and safely be screw-fixed on horizontal profiles and on the frame.

This provides the required stability which is a crucial feature for large and heavy switchgear of this type. IZM circuit breaker modules are prepared for the IZMX16 and 40 series, fixed and withdrawable, 3- and 4-pole and 3P+N. The switchgear can also be positioned next to each other.

### Key-features / Sales arguments:

- Fixed installation components with BPZ-MSW as a removable insert
- Time-saving setup of mounting inserts (which can be fully fitted and wired outside the cabinet)
- An easy and self-explanatory system
- Divided setups with fixed installation equipment and with removable Profi+ inserts
- Setups horizontally and vertically divided
- Modules prepared for accommodating compact circuit breakers

# xEnergy Light

## In combination with xEnergy Basic

Combined system setups with air circuit breakers and the Profi+ installation system offer the possibility to cover the entire section setup with front panels in a finger-safe way. An air circuit breaker that can be fully integrated into the system architecture provides safety and at the same time it is a convenient solution for

using the entire performance range of our wide variety of circuit breakers in one and the same section. This application is used in low-voltage main distribution systems where the area above and below the circuit breakers can be equipped with control components or MCBs.

Air circuit breakers of the IZMX16/40 series can now be combined with xEnergy Basic mounting inserts in a mixed setup. Front plates coming with suitable cut-outs allow for easy covering of the circuit breakers.

Suitable recess openings in the carrier plate make it possible to realize a combination with the pivot-type mounting frame of the xEnergy Basic series.

A stable mounting frame ensures safe and reliable mounting even of heavy equipment (e.g. NZM3). The appropriate cut-outs in the carrier plate are already included.

The carrier plate of the circuit breakers is solidly screw-fixed at horizontal profiles and at the rack frame. The mounting height of the carrier plate can be freely selected within the 25mm grid over the entire section height.

# Eaton Online Tools – find product details quickly and efficiently!

You can find comprehensive up-to-date product information at <http://ecat.moeller.net/catalog>

## Online Catalogue

### Lookup

You can search by keywords, product names, article numbers, technical data: The search understands everything and takes you straight to the product you're looking for.

### Graphical navigation

Graphical representation of the fields of application and product groups.

### Selection aids

Tailored to the typical expert's approach, this search aid helps you quickly find the product you need.

### Data sheets

## Wall-mounted enclosures EWP, IP54 for EP installation units

VT94714

EWP-...

- Degree of protection IP54, IK09
- Protection class II, fully insulated
- 225 mm enclosure depth
- Empty enclosures for accommodating EP installation units
- 29 different enclosure sizes
- Versions with single-wing and double-wing doors
- All enclosures come with a 3-point rod lock
- Brackets for wall-fixing are included in the scope of delivery
- 270° door opening angle
- 2K membrane flanges
- Body RAL 9016, door made of sheet steel, non-transparent

## System overview EWP -...

Compact distr. board Version	Protection class II (fully insulated)	Meets the require- ments of European Standard EN 62208 <sup>1)</sup>	IP43	IP54	RAL 9016	N/PE Terminals included	Installation sections included
EWS-...		<sup>1)</sup>		-	<sup>2)</sup>	-	-
EWP-...		<sup>1)</sup>	-		<sup>2)</sup>	-	-

<sup>1)</sup> Pre-requisite for transforming empty enclosures into distribution boards according to IEC/EN 61439.

<sup>2)</sup> Body and door.

## Legend EWP -...

Symbols	Explanation
	Protective insulation
	Approved for indoor applications only.
	Glow-wire test according to IEC/EN 62208.

## EWP Wall-mounted enclosures IP54 for EP

### IP54 (IK 09)

- Degree of protection IP54, IK09
- Protection class II, fully insulated
- Surface-mounted, enclosure depth 225mm
- Empty enclosures for accommodating EP installation units
- 29 different enclosure sizes
- Brackets for wall-mounting included
- Door opening angle 270°
- All enclosures come with a 3-point rod lock, as of a width of 1050mm with a double-wing door
- Standard lock with a 3 mm two-way key-bit, other lock systems are optionally available as accessories
- 2K membrane flanges, at the top and bottom
- Body and door RAL9016, sheet steel powder-coated
- According to the EN 62208 standard for empty enclosures

## Distribution Boards BP-... for installation system EP

VT04110

- Installation Distribution Boards (floor-standing and surface-mounting boards)
- IP54
- Protection class I
- Sheet steel enclosure, polyesterpowder coated
- Frontplates useable as trayer or coater lid
- Modular construction EP
- Depth 250 mm
- Generous wiring space
- Protection against mechanical impact up to IK08
- Grey (RAL 7035)

## Floor Standing Distribution Board

- Distribution Installation board
- Degree of protection IP54
- Powder coated RAL 7035
- Protection class I
- Closed enclosure with 3 point clip down handle
- Changeable door hinges
- Prepared top/bottom cable entry for F3A flanges (flanges not in the scope of delivery)
- Prepared for norm insert system EP
- BPZ-TW mounting angles included (left and right) with left and right vertical rail
- BPZ-WW wall brackets included
- Depth 250 mm

## Installation distribution boards BP-... for installation system EP

### System description

Profi+ boards are tailored to meet the customers need with a bottom of the line manufacturing, stable construction and flexible application possibility. The distribution board is a tested system that can be used as power distribution board or control distribution board. A stand alone or add-on solution is possible. The installation system EP with it factory assembled devices sum up the whole system.

### The design principle of Profi+, 250 mm depth

The enclosure consists of a welded construction. The rear wall is welded on the board as well. To add on the board there have to be done cut outs at the side walls according to requirements. The doors and the double doors at a width of 1100 mm are containing a 3 point lock and got a 100 degree opening angle. The standard solution got a clip down handle which can be activated with different half cylinder.

### Standard configuration

The board system is configured for the type EP. At the EP board system there is a left or right assembly kid already factory-provided. At this assembly kid it is possible to adjust the system EP within a modular grid of 12,5 mm. Therefore, devices with deeper mounting depth can be used. Furthermore, the enclosure got mounted a sheet steel protection against contract and the outer rails.

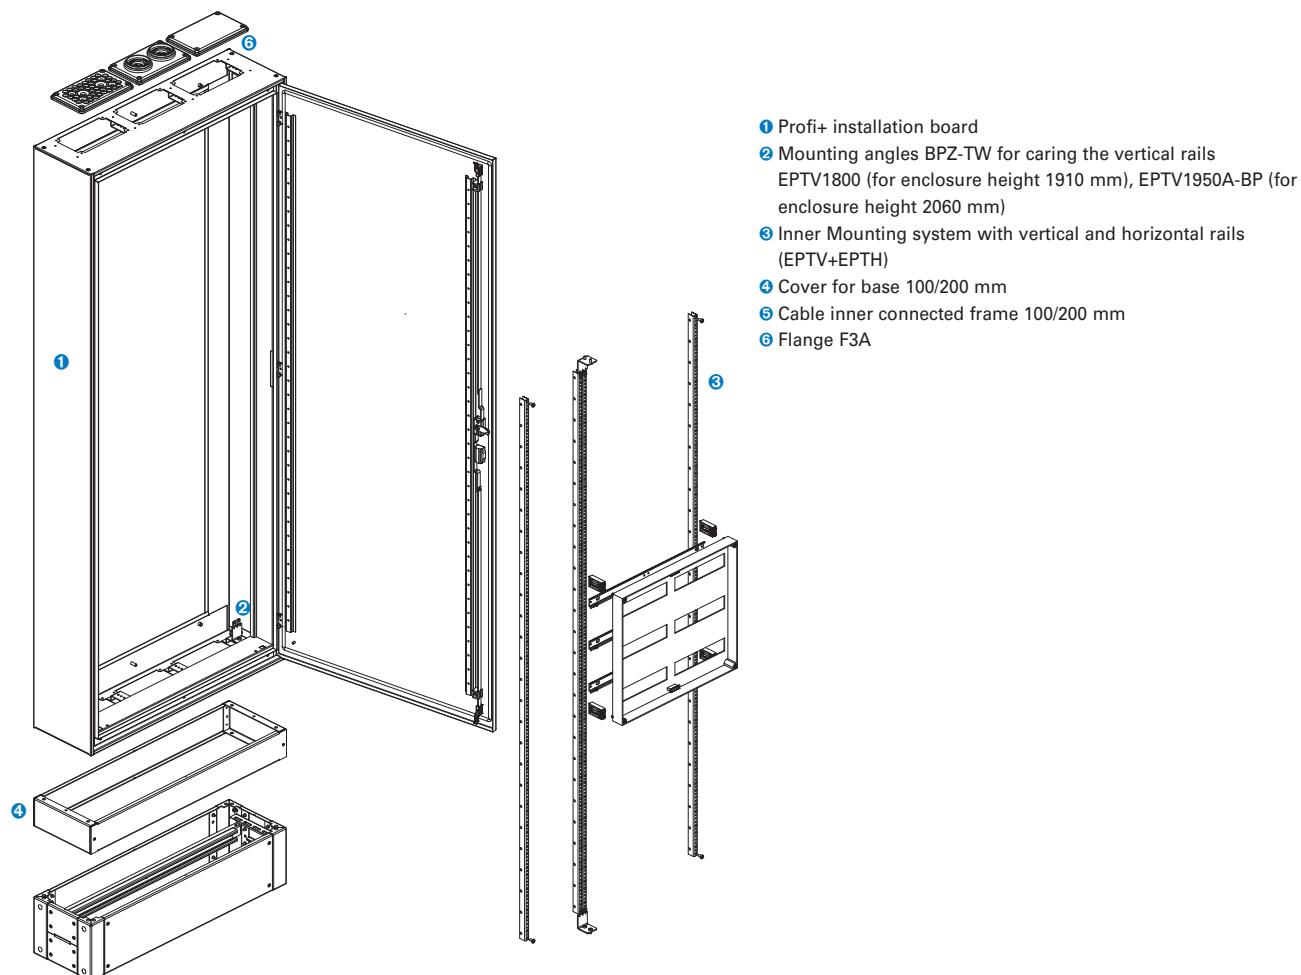

### Further mounting options

A 100/200 mm front and side covers are available for the base. In addition there can be used a cable interconnected frame too.

### The system EP with Profi+

The inner disassembly of the board Profi+ take place with the mounting system EP. For this, there are vertical rails EPTV within a grid of 250/500/750 mm mounted in order to mount the devices into the board.

For the grid spacing are two vertical rails (EPTV1800 for enclosure height 1910 mm, EPTV1950A-BP for enclosure height 2060 mm) mounted to connect the insert.

## Technical data of Profi+

### Application:

Stand alone or add-on distribution board.

### Construction:

The board consist of a 1.0 – 1.25 mm thick welded sheet steel. The rear wall is welded on the board as well. Roof- and bottom cable entries are prepared for F3A flange.

### Material:

Board: side parts 1.25 mm sheet steel, Top- Bottom panel 1.25 mm sheet steel

Door: 1.25 mm sheet steel

Rear wall: 1.0 mm sheet steel

### Surface area:

Board incl. rear wall: power coated, thickness >50µm

Door: power coated >50µm

### Door:

Sheet steel 1.25 mm, curb 18 mm

Right hinged (reversible door hinging possible)

2 doors up to 1100 mm width

Opening angle till 100°

### Door lock:

Standard: 3 point lock with clip down handle

Optional: Two way bit and different cylinder locks

### Insert rail system:

Prepared to carry the system EP

Mounting set BPZ-TW and EPTV1800 (for enclosure height 1910 mm), EPTV1950A-BP (for enclosure height 2060 mm) mounted left and right.

Protecting covers are included within the board. The outer rails also.

### Accessories:

Ventilation louvers, mounting plates, flanges, lifting eye bolt, spray RAL 7035, set of wall brackets

### Cable entry:

F3A flange at the bottom and top of the board

### Protection class:

Protection class I

### Degree of protection:

Standards VDE0100, part 410 and IEC-EN 60529

Closed door IP54, open door IP31

Shock resistant IK08

### Color:

Board, door, base cover: RAL 7035 light grey

### Dimensions:

Inside:

Height 1800, 1950 mm

Width 250, 500, 750, 1000, 1250 mm

Outside:

Height 1910, 2060 mm

Width 350, 600, 850, 1100, 1350 mm

### Cover for base:

Standard: 100/200 mm

Cable interconnect frame: 100/200 mm

### Scope of delivery:

Complete board with door

Top- bottom part prepared to mount F3A flange

The angle BPZ-TW for mounting the left and right rail EPTV1800 (for enclosure height 1910 mm), EPTV1950A-BP (for enclosure height 2060 mm) is already pre-mounted, wall brackets BPZ-WW are included

### Electrical data:

Rated isolation voltage AC

$U_i = 440 \text{ V}$

Rated voltage AC

$U_e = 415 \text{ V}$

Rated Frequency

$f = 50-60 \text{ Hz}$

Rated current

$I_e = 630 \text{ A}$

Isolation voltage

$U_{imp} = 4 \text{ kV}$

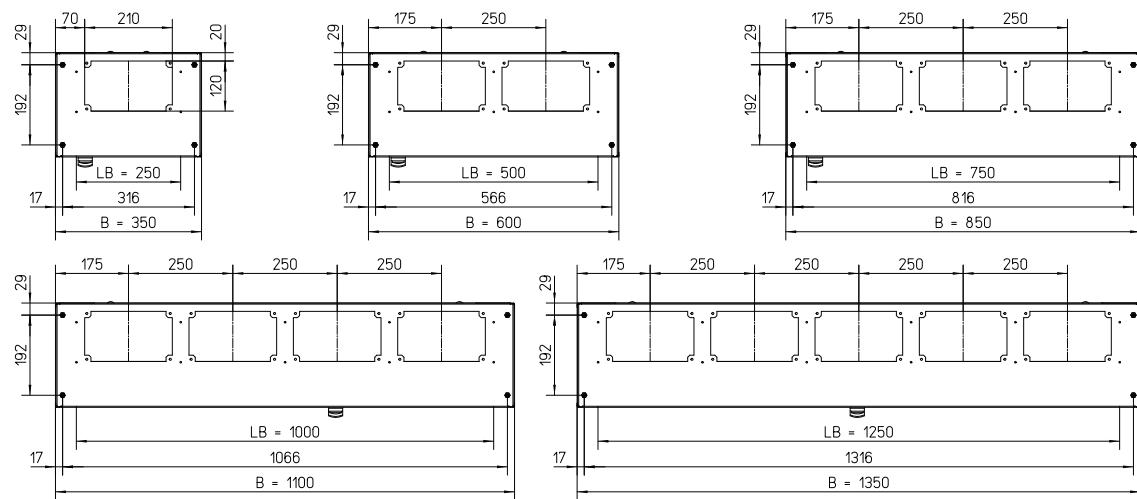

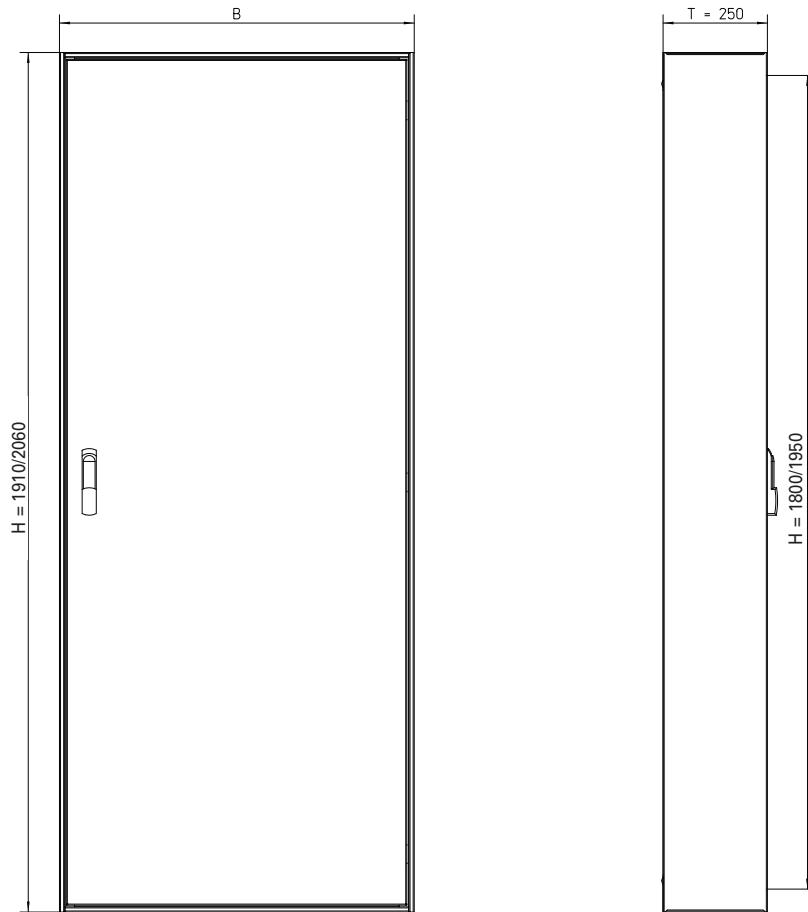

Ambient temperature

-5 up to +45 °C

### Design according to:

Type tested device combination according to IEC/EN 61439-1/2, IEC/EN 62208

## Dimensions

## Standard-Section EP Fitting-System

VT04110

- The standard-section fitting-system is a system for the set-up of factory-built, type-tested switchgear assemblies
- Universal and stable system
- Efficient in planning and project development
- Flexible and easy-to-mount design
- Flexibility in project development thanks to individual assembly options with standard inserts for standard sections or standard parts for different areas of application
- Time-saving mounting of individual standard-section modules and components thanks to screw-type or clamping technique
- A large number of type-tested assemblies for standard-section modules do not require any further mechanical handling
- Quick and easy mounting thanks to a high percentage of factory-assembled components
- High level of safety and security in operating and service is guaranteed thanks to type-tested distribution systems conforming to the IEC/EN 61439-1/2 standard

For meter, installation and power distribution boards in our cabinet systems:

- Wall-mounted distribution cabinets EWS up to 250 A and EWP up to 250 A
- Floor-standing distribution cabinet BPM-F up 630 A
- Floor-standing distribution cabinet xVTL up to 2500 A
- Floor-standing distribution cabinet xEnergy up to 4000 A

## Remarks

- 1) Do not place in top or bottom enclosure.
- 2) When next to door lock, maximal 3 fuse switches.

3)

In EWS till max. 250 A.

## NH Load Disconnector Fitting Unit Size 00 Empty

- Mounting plate structure for NH load disconnector, size 00, up to 160A, 3 and 4 poles, type XNH00
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module

## NH Load Disconnector Fitting Unit Size 3 Empty

- Mounting plate structure for NH load disconnector, size 3, up to 630A, 3 poles, type XNH3
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module

	Width x Height (mm)	Number	Type designation	Article no.	Pack (Pcs.)
VT06610	500x450	1 x XNH3 3-pole	EP53XNH31-0G	184536	1

## NH Load Disconnector Fitting Unit Unit Size 000 Empty

- Busbar mounting
- Fitting unit without devices, for NH load disconnector size 000 and size 00, type LTS-100/C00/3-R and XNH00
- Fuse elements for 5mm Cu can also be used for 10 mm Cu thanks to the conversion option
- Busbar support type SL63032 with a center-to-center distance of 60 mm between the phases and Cu is not included in the scope of delivery
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module
- There is no option for lugging the fitting unit

	Width x Height (mm)	Number	Type designation	Article no.	Pack (Pcs.)
VT06110	250x300	3 x size 000	EP22GRT3000R-OG	143947	1
	500x300	6 x size 000	EP52GRT6000R-OG	143948	1

## NH Load Disconnector Fitting Unit Size 00 - 2 Empty

- Busbar mounting
  - for NH load disconnector size 00, up to 160A, 3-pole, type XNH00, on copper bar with thickness 5 or 10 mm
  - for NH load disconnector size 1, up to 250A, 3-pole, type XNH1, on copper bar with thickness 4 - 10 mm
  - for NH load disconnector size 2, up to 400A, 3-pole, type XNH2, on copper bar with thickness 4 - 10 mm
- Busbar support SL63032 and Cu are not included in the scope of delivery
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module

	Width x Height (mm)	Number	Type designation	Article no.	Pack (Pcs.)
VT05110	250x300	1 x XNH00 3-pole	EP22XNH001R-OG	184537	1

## NH In-line Fuse Switch-Disconnector Fitting Unit Size 00 Empty

- Busbar mounting prepared for NH in-line fuse switch-disconnectors size 00, up to 160A, 3-pole, busbar system type TN630/3-R10 with a center-to-center distance of 100 mm between the phases and Cu (lcw 35 kA/1s) is included
- The fitting unit is fed-in at the center
- The NH in-line fuse switch-disconnectors are mounted on the busbar system either with screws (not included in the scope of the delivery) or with claws (included in the scope of delivery of the NH in-line fuse switch-disconnector)
- The fitting unit can be mounted with cable connection either from above or from below
- Hood version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module

## NH In-line Fuse Switch-Disconnector Fitting Unit Size 1-3 Empty

- Prepared for NH in-line fuse switch-disconnectors size 1-3, up to 630A, 3-pole, type FCFSNDH...
- Busbar system T2000/3-R185VT Cu up to 100x10 with a center-to-center distance of 185 mm between the phases is not included in the scope of delivery
- The fitting unit can be fed-in at the center or it can directly be used as a main bus bar system
- The fed-in at the bus bar system can also be accessed through the separate infeed module EP25AP-GTL with closed cover
- NH in-line fuse switch-disconnectors are screw-mounted on the busbar system (input screws not included in the scope of delivery)
- Hood version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module
- Note: can be used as of a cabinet depth of 400 mm

## Busbar-Mounting Fuse Base Fitting Units Empty

- Busbar-mounting fitting unit without devices, for fuse bases D02, DII and DIII 3-pole
- Thanks to the conversion option, fuse elements for 5 mm Cu can also be used for 10 mm Cu
- Busbar support type SL63032 with a center-to-center distance of 60 mm between the phases and Cu (not included in the scope of delivery)
- The fitting unit is fed-in from the side
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module
- There is no option for lugging the fitting unit

## Modular Installation Devices Fitting Unit

- For modular installation devices with snap-on fixing, 3 DIN support rails 35x7.5 mm are included
- Distance between terminal blocks is 150 mm
- Cover plate with a cut-out, 45 mm frame size
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- No fitting restrictions

## DIN Rail Fitting Unit

- For modular installation devices with snap-on fixing or for block terminals, 3 DIN support rails of 35x7.5 mm are included
- Distance between terminal blocks is 150 mm
- Cover plate without a cut-out
- Pan or hood version is possible
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- No fitting restrictions

## Mounting Plate Fitting Unit

- With mounting plate for devices with screw-fixing, mounting level down to 67.5mm is possible in 12 steps thanks to suitable drop-down shackles
- Cover plate without a cut-out
- Pan or hood version is possible
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- No fitting restrictions
- Incorporation of energy meter modules is possible as of EPMP51
- Incorporation of terminal boxes is possible

## Load Disconnector Fitting Unit Dumeco Equipped Empty

- Mounting plate structure for load disconnectors up to 1600 A, 3 and 4 poles
- for assembly version with a rotary drive directly on the cover plate
- For using a door coupling-handle you need to order a switch position display separately
- Pan version
- Handles and quick-acting fastening pins are not included in the scope of delivery
- Cover plate holders and support rails are not included in the scope of delivery
- Cover plate is RAL 9002, cover plate handle is RAL 7024
- Power loss  $P_v$  relates to the max. fitting capacity of the module

	800	xEnergy, xVTL	XVTL-TE800	143822	1

# Standard-Section EP Fitting-System - Accessories

**xEnergy  
Basic**

## Cabinet Connector

- Fixed on depth support rails for mounting the vertical and horizontal support rail types EPTV and EPTH

	Cabinet Type	Type designation	Article no.	Pack (Pcs.)
VT08410	xEnergy, xVTL	XVTL-SV	143834	1
	xEnergy, xVTL width 425	XVTL-SV425	143836	1

## Support Rail Connector

- For fixing the vertical and horizontal support rails
- type EPTV (4 fixing screws included in the scope of delivery)
- type EPTV-E (no fixing screws included in the scope of delivery)

	Type designation	Article no.	Pack (Pcs.)
VT08510	EPTV	143860	1
	EPTV-E	143861	1

## Support Bracket Connector, Half Version

- For fixing the vertical and horizontal support rails
- type EPTV05 (2 fixing screws included in the scope of delivery)
- type EPTV05-E (no fixing screws included in the scope of delivery)

	Type designation	Article no.	Pack (Pcs.)
VT08610	EPTV05	143862	1
	EPTV05-E	143863	1

## Support Rail Bracket, 250mm Depth, for BPM-F

- For mounting the vertical support rail type EPTV
- Fastening material included
- 1 package = 2 units

	Depth (mm)	Cabinet Type	Type designation	Article no.	Pack (Pcs.)
VT08710	250	BPM-F	BPZ-TW	143864	1

## Adapter Set for EW

- For fixing the inner vertical support rails type EPTV  
type EWADI includes two double adapters for use in the internal set-up  
type EWADA includes two double adapters fixed as four half adapters in the left and right cabinet corners to accommodate the EPTV type of support rails
- For each enclosure you will only need one EWADA type of adapter sets
- The number of EWADI type of inner adapter sets may vary depending on the set-up
- 1 package = 2 units

	Description	Type designation	Article no.	Pack (Pcs.)
VT09110	Inside	EWADI	0660017003	1
	Outside	EWADA	0660017013	1

## Universal Bracket

- For fixing horizontal support elements

	Type designation	Article no.	Pack (Pcs.)
VT08910	WEQV	143993	10

## Special Bracket

- For fixing horizontal support elements

	Type designation	Article no.	Pack (Pcs.)
VT09010	WMPO	143994	10

## Raising Bracket for Support Rail

- For increasing the mounting level by 40 mm from the top edge of the system support rail type EPTH
- Fastening material included
- 1 package = 2 units

	For DIN Support Rail	Type designation	Article no.	Pack (Pcs.)
VT10210	35 x 7,5 mm	EPAW-TS	143986	1
	35 x 15 mm	EPAW-TS15	172759	1

## Drop-down Shackle for Support Rails and Mounting Plates

- For reducing the mounting level in steps of 12 mm down to a max. of 60 mm from the top edge of the system support rail
- Fastening material included
- 1 package = 2 units

	Type designation	Article no.	Pack (Pcs.)
VT11010	EPAB-TSMP	143985	1

## Fitting Bracket

- For fixing support elements such as EPTV support rails or horizontal type EPTH support rails
- As double and EPTHD type

	Type designation	Article no.	Pack (Pcs.)
VT08810	XVTL-EW	143995	10

## Cover Plate Holder, as Double Tower, Standard Version

- Double tower version with fixing screw
- For fixing the electric shock protection cover plate

	Type designation	Article no.	Pack (Pcs.)
VT10710	APH	143981	20

## Cover Plate Holder, as Double Tower, High Version

- Double tower version with fixing screw
- 7.5 mm higher allowing to use the 15 mm high support rails (type EPTS15)
- For fixing the electric shock protection cover plate

	Type designation	Article no.	Pack (Pcs.)
VT10610	APHL	143982	10

## Cover Plate Holder, Half, Standard Version

- Single tower version with fixing screw
- For fixing the electric shock protection cover plate
- For use in the 4 cabinet corners

	Type designation	Article no.	Pack (Pcs.)
VT10910	APH05	143983	20

## Cover Plate Holder, Half, High Version

- Single tower version with fixing screw
- 7.5 mm higher to allow using the 15 mm high support rails (type EPTS15)
- For fixing the electric shock protection cover plate
- For use in the 4 cabinet corners

	Type designation	Article no.	Pack (Pcs.)
VT10810	APHL05	143984	10

## Insulation Piece

- For insulated mounting of DIN support rails on the support framework
- Screws included
- 1 package = 2 units

	Type designation	Article no.	Pack (Pcs.)
vt57016	UI-TS	144022	1

## Spacer Pins

- For the set-up of DIN support rails and cable strain relief rails on a higher level
- Hexagonal shape, thread M4

	Height (mm)	Type designation	Article no.	Pack (Pcs.)
VT10410	35	AB30	144023	1
	55	AB60	144024	1

## Tool-type Quick-acting Closure Handle

- Set of 4 units of tool-type quick-acting closures and 2 handles

	Type designation	Article no.	Pack (Pcs.)
VT10010	APZB	144025	1

## Tool-type Quick-acting Closure with Sealing Cap

- For diagonal sealing of a cover plate
- 1 package = 2 units

	Type designation	Article no.	Pack (Pcs.)
VT10110	APWSVP	144026	1

## M4 Insertable Anchor

- M4 x 16 mm screw type EPLHS-M4X16 is included
- 1 package = 4 units

	Type designation	Article no.	Pack (Pcs.)
VT10310	EPGE4	144027	1

## Support Rail 35 x 7.5 mm

- Similar to DIN EN 60715, used as a support rail for block terminals and installation built-in devices for snap-on fixing

	Length (mm)	Type designation	Article no.	Pack (Pcs.)

## Technical features, standard-section fitting-system type EP

### Application

As a standard-section fitting-system for use as a switchgear assembly in cabinet systems EWS/EWP, BPM-F, xEnergy/XVTL

### Standards and regulations

The system conforms to IEC/EN 61439-1/2

### Construction for fixing standard-section fitting-kits

Basis for fixing the standard-section fitting-kits are the support profiles. Standard-section fitting-kits with electrical switchgear are mounted on these support profiles. This complete unit is protected by an electric shock protection cover plate.

### Support elements for fixing standard-section fitting-kits

Basis of the internal framework in the type EWS/EWP, BPM-F, xEnergy/XVTL system are the vertical (type EPTV) and horizontal (type EPTH) support profiles. These support profiles are fixed to each other by means of a "Support rail connector" which provides for a reliable and stable construction.

The support profile is designed with a 25 mm high fold, set up in a grid pattern of 250x150 mm according to DIN 43870, part 2, for accommodating mounting plates and support elements.

### Material and coverings

Support profile: 25 mm high, 16 mm wide

2 mm sheet steel

Cover plate: Polystyrene, shock-resistant according to VDE 0304  
low inflammability, self-extinguishing

### Standard-section fitting-kits type-coding

The following main groups are available:

- Modules for modular installation devices	EP_RG
- Modules for block terminals	EP_RK_
- Modules with mounting plate	EP_MP_
- NH fuse load disconnector modules	EP_XNH_
- NH In-line fuse switch-disconnector modules	EP_GTL_
- Modules with D-fuse elements	EP_GRC_
- Modules with Dumeco load disconnector	EP_GLD_
- Modules with load disconnectors using fuses type QSA	EP_QSA
- Modules for NZM compact circuit breakers	EP_NZM

### Colour

- Cover plate: RAL 9002 - grey-white
- Handle: RAL 7024 - graphite-grey

### Protective measures

- Protected against tools, wires or similar with Ø > 2.5 mm, IP31
- Protected against the penetration of foreign bodies > 2.5 mm, protected against vertically dripping water

### Standard-section fitting module dimensions

Support profiles are set up in a grid pattern of 250x150 mm.

Width: 250 mm

Height: 150, 300, 450, 600, 750 mm

Width: 500 mm

Height: 150, 300, 450, 600, 750 mm

Width: 750 mm

Height: 150, 300, 450, 600, 750 mm

Width: 1000 mm

Height: 300, 450 mm

### Delivery

The package contains all parts (cover plate and quick-fixing included) to be mounted on the support profile. Electric shock protection cover plates can be fixed one or the other way round and can therefore be used as a pan or as a hood.

Standard-section fitting-kits are delivered complete with handles and captive snap-in tool-type closures for quick fixing. Cover plate holders need to be ordered separately.

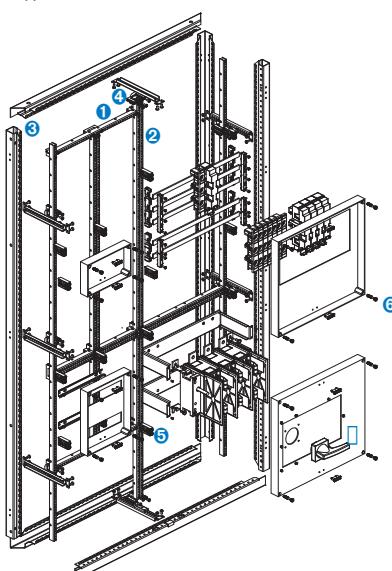

Device cover plates can be used one or the other way round to increase the installation depth. Manual opening is impossible. A sealing for each cover plate is available as an option.

Completely packed in a cardboard box ex-factory with clearly legible product designation.

## Product features of standard-section fitting-system, Type EP

Standard-section fitting-kits have the following technical characteristics:

- High stability thanks to the use of a 25 mm high U-fold profile support rail
- Dynamic resistance thanks to support rail connectors made of zinc diecast
- Flexible when it comes to the set-up of both plain and complexe cabinet distribution boards
- Easy to install as there are only few system parts
- Pleasant design with calm, warm colours
- Rational planning and project development
- Standard-section fitting-kits can be used in the entire Eaton distribution board range, except in type EWK

### 1. Support rail, horizontal, type EPTH\_

Support rail, horizontal, with the same profiling as the vertical support rail.

### 2. Support rail, vertical, type EPTV

Support rail, vertical with high dynamic resistance thanks to a 25 mm high fold, also suitable for mounting heavy switchgear.

### 3. Cabinet connector, type XVTL-SV

A zinc diecast component for connecting the horizontal and/or vertical support rails with the cabinet, depth-adjustable in a 12.5 mm grid pattern according to DIN 43660.

Cabinet connectors for other distribution board systems are:

EWS and EWP: Type EWADI and EWADA

BPM-F 250 mm: Type BPZ-TW

xVTL: Type XVTL-SV

### 4. Support rail connector, type EPTV\_

A zinc diecast component for connecting the horizontal and/or vertical support rails with each other in a grid pattern WxH = 250x150 mm.

### 5. Cover plate holders, type APH\_

Cover plate holders for fixing the electric shock protection cover. Designed as double-holders (Type APH) to reduce the number of individual parts. Also available as single holders (Type APH05). The cover plate holder provides for stable screw-fixing of the cover plates on a horizontal or vertical support rail.

### 6. Tool-type closure, type APWSV

For quick fixing of the electric shock protection cover. Locking through a 90° turn. Lead sealing at a later point in time is possible with all covers.

### 7. Cover plate handle, type APGR\_

Beautiful and handy design for better handling of the electric shock protection covers.

## System set-up of a standard-section fitting-system, Type EP

### System support rails

The standard delivery of a cabinet of the series EWS/EWP, BPM-F, xEnergy/xVTL prepared for a standard-section fitting-system is variable (see delivery details). A left and right side system support rail of type EPTV are the basis for the further inside equipment with vertical and horizontal support rails (Fig. 1).

Additional mounting of a horizontal support rail (type EPTH) and a vertical support rail (type EPTV) provide the framework for further inside equipment with standard-section fitting-kits of type EP (see Fig. 2).

### Finish of wall-mounted cabinets - type EW

Wall-mounted cabinets of type EW do not come with external support rails (type EPTV) and accommodation adapters (type EWADA) when delivered.

### Finish of floor-standing cabinet system - type BPM-F

Floor-standing cabinets BPM-F come equipped with a mounting kit (type BPZ-TW) on the left/right top and bottom, including a left and right support rail of type EPTV1950A-BP and EPTV1800 respectively.

### Finish of floor-standing cabinet system - type xVTL

Cabinet system xVTL come equipped with the left/right mounted support rails EPTV1800-xVTL in combination with the depth fitting kits for stability purposes (xVTL-TE).

### Depth fitting kits

For even more stability with xVTL you can also retrofit additional depth fitting kits (type xVTL-TE) on the framework.

All cabinets come equipped with an all-around electric shock protection and provide the required protection of people in the combination of assembly groups and cabinet housing.

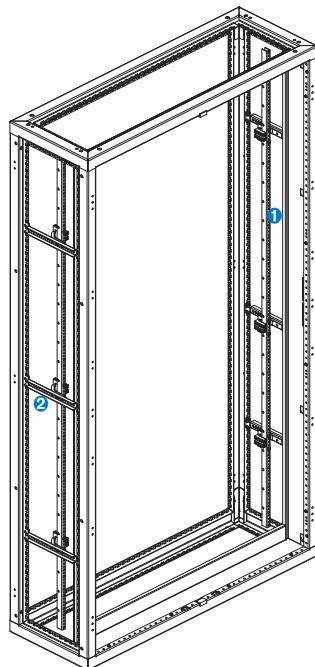

Fig. 1: Standard delivery of distribution board cabinet type xVTL with left and right mounted support profiles.  
1) Vertical support profile. 2) Depth fitting kits

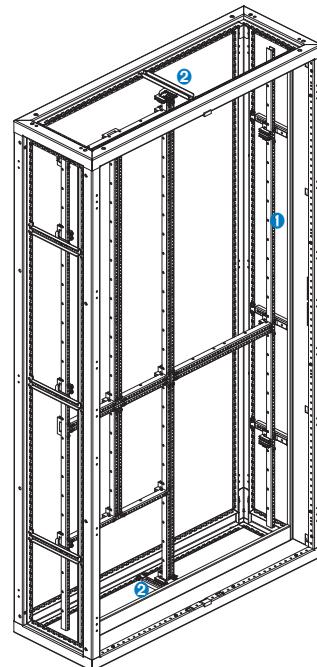

Fig. 2: Distribution board cabinet type xVTL with inside support framework thanks to support profiles for using and fixing standard-section fitting-kits type EP.  
1) Vertical support profile. 2) Depth fitting kits.

## System description of the standard-section EP fitting-system

The inside equipment with further horizontal and vertical support rails of type EPTH and EPTV depends on well-considered planning and project development regarding the system assembly groups. Subsequently you will find an example of the framework for a low-voltage distribution board.

### Support rails and depth fitting kit (Fig. 1 and 2)

For optimal equipment of an xVTL cabinet framework it is reasonable to use as many vertical support rails of type EPTV1800A-XVTL as possible. They need to be fixed at the top and bottom of the depth fitting kit type XVTL-TE. This means that the support rails are directly fixed at the framework which in turn increases the load-bearing capacity of the framework and is especially favourable for installing

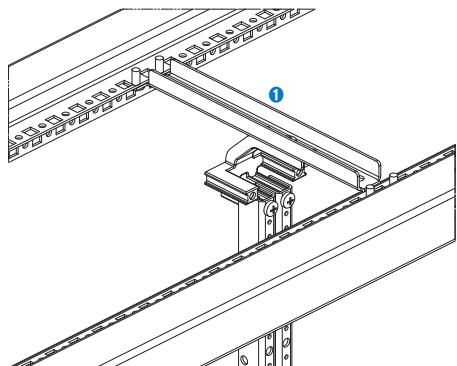

Fig. 1: Depth fitting kit type XVTL-TE - installation at the top  
1) Depth fitting kit

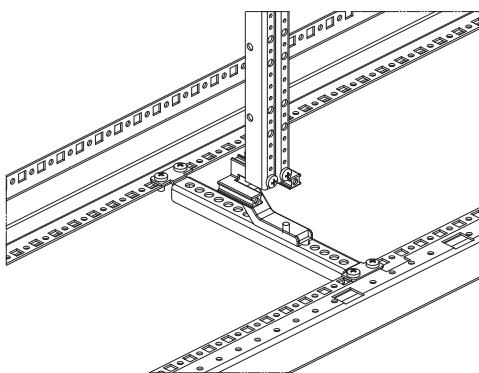

Fig. 2: Depth fitting kit type XVTL-TE - installation at the bottom

heavy system assembly groups or devices.

Note: If inside a cabinet, as shown in Fig. 1/2, two outer vertical support rails of type EPTV1800A-XVTL are used, you can only use halves of the cover plate holders (type APH05) on each top/bottom end of the support rails to set up the assembly groups. However, if you use inside support rails, you can mount an additional EPTV65 horizontally underneath the two vertical support rails to accommodate a cover plate holder of type APH.

### Support rail connector (Fig. 3 and 4)

You need to use the support rail connector for connecting horizontal and vertical support rails with each other. The zinc diecast component is extremely stable and provides a high level of dynamic resistance to the connection.

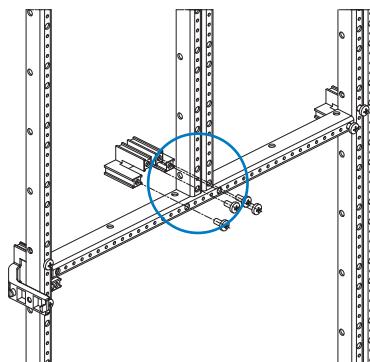

Fig. 3: Support rail connector (type EPTV) - for horizontal installation

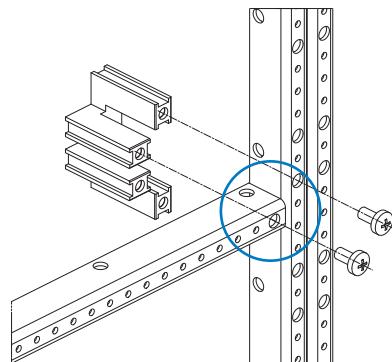

Fig. 4: Support rail connector (type EPTV) - for vertical installation

### Support rail connector - half (Fig. 5)

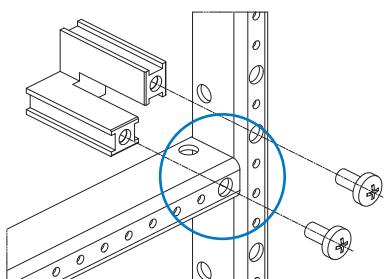

Fig. 5: Support rail connector half (type EPTV05) - for vertical installation

## System description of the standard-section fitting-system, type EP

On the inner side of the system support framework you can fix different electrical equipment using different mounting elements such as DIN profile support rails, device carrier plates, meter plates, busbar system etc., depending on the project design and on the required equipment (see Fig. 1).

Thanks to the predetermined fixing grid of  $vh = 75$  mm according to DIN 43660, the vertical support rails (type EPTV) allow for a variable set-up of the electrical equipment and the corresponding mounting elements.

For this purpose and with the aid of the corresponding building instructions, the mounting elements are directly mounted on these vertical system support rails (type EPTV).

The cover plate holder is designed as a double holder (type APH or APHL) and is screwed onto the horizontal and vertical system support rails in a grid pattern of 250x150 mm. In the respective cabinet corners you have to use halves of the cover plate holders (type APH05 or APHL05).

The electric shock protection cover can simply be fixed using a tool-type closure as a quick fastener through a 90° turn on the cover plate holder.

The complete cabinet system equipped with assembly groups is interconnected with the electrical shock protection running all around the cabinet, it is therefore fully protected against electric shock and offers best operator protection (Fig. 2).

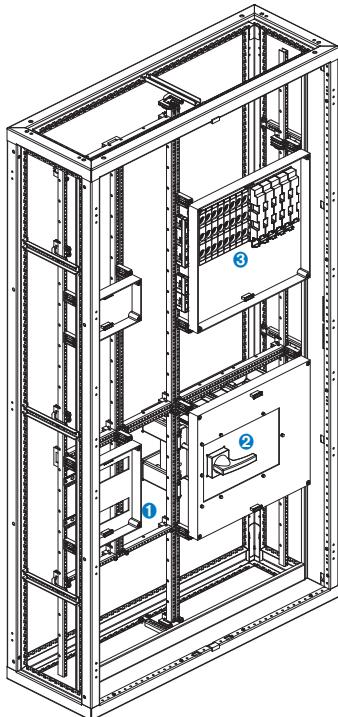

Abb. 1: Cabinet distribution board, partly equipped with standard-section EP fitting-kits  
 1) Fitting module type EP for DIN-modular components  
 2) Fitting module type EP for Dumeoco load disconnector  
 3) Fitting module type EP for busbar-mounting fuse

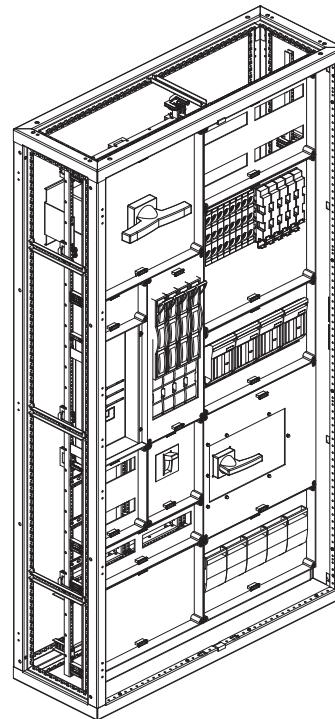

Fig. 2: Cabinet distribution board, fully equipped with the fitting module type EP

## Set-up and mounting of a standard-section fitting-system, type EP

### Electric shock protection cover plate

Electric shock protection cover plates can be inverted, so they provide for a different mounting level regarding depth:

- as a pan (Fig. 1) 40 mm top edge system support rail 55 mm
- or mounted as a hood (Fig. 2) 93.5 mm top edge system support rail

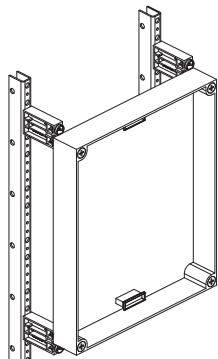

Fig. 1: Electric shock protection used as a pan

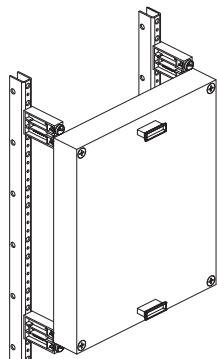

Fig. 2: Electric shock protection used as a hood

### Set-up bracket for DIN support rails (Fig. 4 and 5)

If you use set-up brackets (type EPAW\_TS) you can increase the level of the device support rail by 40 mm. In this case the electric shock protection cover plate is mounted as a hood, so the clearance between the device support rail and the device cover is 45 mm again.

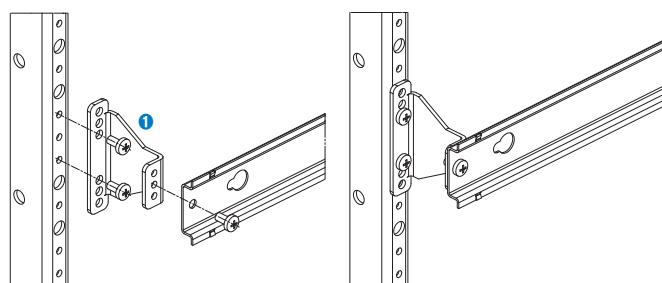

Fig. 4/5: Principle of DIN support rails combined with a set-up bracket and cover plate as a hood  
1) Set-up bracket

### DIN support rails (Fig. 3)

Mounting of built-in installation devices according to DIN 43880, e.g. miniature circuit breakers, D0 and D fuse elements, timers, disconnectors, remote switches, contactors etc. with quick fastening on support rail 35x7.5 mm similar to DIN EN 60715.

Depending on the section they rest on, support rails are screwed onto the vertical support rails (type EPTV) using self-tapping screws.

Usually the fitting height between device support rails and device cover is 45 mm, sufficient for all built-in devices with a frame size of 45 mm. In this case the electric shock protection cover plate is mounted as a pan.

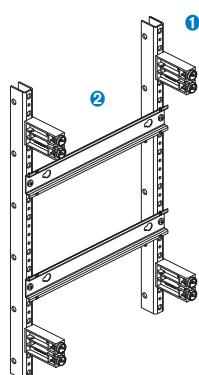

Fig. 3: Fixing of DIN support rails when using the electric shock protection cover plate as a pan  
1) Cover plate holder 2) DIN support rail

### Drop-down shackle (Fig. 6 and 7)

Thanks to the drop-down shackle (type EPAB-TSMP) the mounting level of the device support rail (and of the mounting plates) can be reduced to 60 mm in steps of 12 mm from the top edge of the system mounting frame (system support rail).

In this case the electric shock protection cover plate is used as a hood so as to increase the fitting depth.

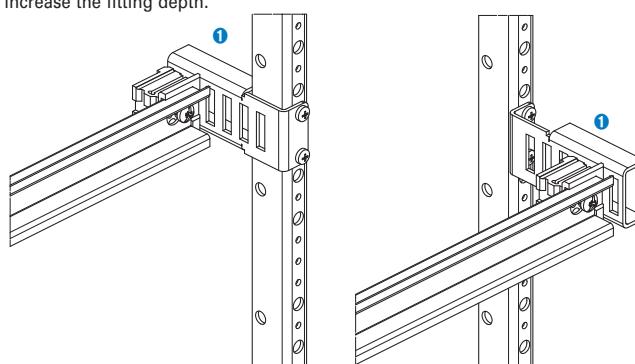

Fig. 6/7: DIN support rails can be brought down in steps of 12 mm  
1) Set of drop-down shackles

### Mounting plate with drop-down shackle (Fig. 8)

Used for fitting the devices through screw-fastening, such as switchgear, protective assemblies, regulators, converters and other devices. Where depth-adjustable drop-down shackles are used together with standard mounting plates, it is no problem to install switchgear, contactors or other depth-installed devices in steps of 12 mm down to 67.5 mm from the top edge of the system support rail.

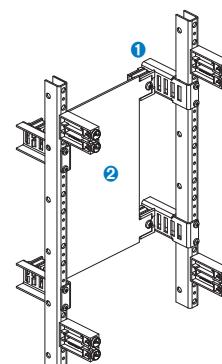

Fig. 8: Mounting plate with a set of drop-down shackles  
1) Set of drop-down shackles 2) Mounting plate

## Set-up and mounting of a standard-section fitting-system, type EP

### Selection of the required low-voltage cabinet system

For selecting the right cabinet system the following aspects need to be considered:

- System assembly group and device inserts?
- Electric shock protection covers required?
- How can they be combined in the switchboard cabinet to be selected?

You also need to take into account:

1. Total volume of the built-in components and device inserts to be used
2. Rated current of the busbar system in case you plan to install one
3. Type of placement - either as a
  - Wall-mounted cabinet distribution board or as a
  - Floor-standing cabinet distribution board, stand-alone

Depending on the above criteria and using the selection tables and the overview of predefined variants, you can find out and determine the suitable solution for the set-up or combination of the device fitting kits and the appropriate electric shock protection covers for the switchboard cabinet system.

Once this has been done, you will know the required number and the arrangement of the support rails; the same applies to the size of the individual switchgear system assembly groups and their device covers.

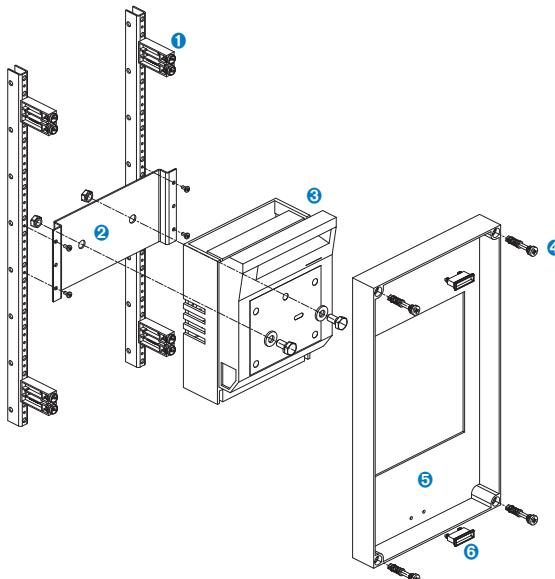

Fig. 1: Standard-section fitting-kits type EP with NH in-line fuse switch-disconnector mounted on a device carrier plate

- 1) Cover plate holder
- 2) Prepared device carrier plate
- 3) NH fuse load disconnector
- 4) Quick fastener
- 5) Cover plate
- 6) Handle

### Fitting of high-current switchgear on a prepared mounting plate, with screw fastening

For mounting the switchgear on the corresponding, serially manufactured, single-part device carrier plate you will find appropriate drill holes for placing threaded drive-in nuts at the rear. This will allow you both to fix the switchgear and to replace them from the front whenever necessary, without any aids or additional fastening elements.

### Material of the switchgear carrier plate

Sheet steel, 2.0 mm sendzimir zinc-plated

Electric shock protection cover plates come ex-factory with the required device cut-outs and so they provide for optimal electric shock protection according to VDE 0106, T. 100 / BGV A2 in the IP3X degree of protection.

The appropriate cover plate holders are simply snapped onto the vertical support rail (type EPTV) in the predefined distance from the switchgear carrier plate.

### Set-up and mounting of the fusebox on the busbar system

With fuseboxes in horizontal and vertical design, the busbar supports are fixed directly and immediately or between two vertical system support rails (type EPTV). The 20x5 mm copper current rails are positioned from the front and fixed on the upper part of the support.

The 3-pole busbar-mounting fuse bases are placed on these copper current rails from the front and locked in place with a fastening screw.

The individual strip covers can only be removed after the central electric shock protection cover has been taken off.

The electric shock protection and switchgear covers comprise the captive snap-on tool-type quick closures for quick fastening.

“Manual opening” is impossible.

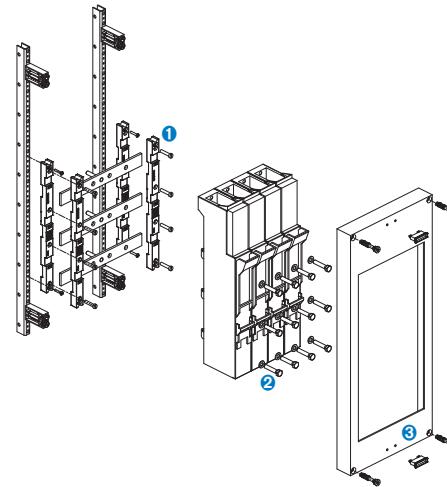

Fig. 2: Standard-section fitting-kits with NH in-line fuse switch-disconnector, 3 poles, vertically mounted on the busbar support. Center-to-center distance between the phases is 100 mm, with Cu busbar system 30x5 or 30x10 mm

- 1) Special rail support
- 2) Terminals
- 3) Cover plate

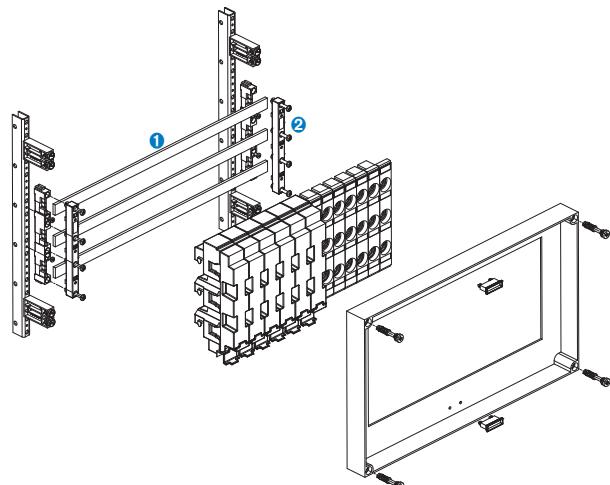

Fig. 3: Busbar-mounted D fuse base, 3 poles, mounted on busbar support. Center-to-center distance between the phases is 60 mm, with Cu busbar system 20x5 or 30x10 mm

- 1) Busbar system
- 2) Rail support

Material: Polystyrene, shock-resistant, self-extinguishing  
Colour: RAL9002 (grey-white)

The snap-on handles as a mounting aid are also included in the scope of delivery.

Self-adhesive transparent pockets for frontal placement of labelling strips at a later point in time can be provided as an option.

## Wall-mounted enclosures BP-O, IP30 for Profi+ installation units

wa\_vt07813

wa\_vt32613

### BP-O...

- Sheet-steel enclosure, degree of protection IP30, IK07
- Protection class I
- 262,5 mm enclosure depth
- Empty enclosures for accommodating Profi+ installation units  
Special types for assembling on the base frame or MSW assembling
- Available as flat-pack (full range) or fully assembled enclosure (limited range)
- Single-wing (till 800 mm wide) and double-wing door versions
- Hinged handle with rotary lock;  
Larger enclosures 3-point rod lock with clip down handle
- Possibility of direct fixing on the wall
- Easy to add-on multiple enclosures
- Doors with covered hinges, reversible
- Suitable for wide range of (pass-through membrane) flanges
- Body white RAL 9016 or grey RAL 7035

## Surface-Mounting Installation Distribution Boards - Fully Assembled, IP30, BP-O-...-C

- including base frame, side panels, top/bottom panels and door
- including DIN-rail sets BPZ-DINR...B
- including front plates (150 mm) with device cutout (45 mm)
- including cable entry at the top, with pass-through flange
- with bottom panel blind
- mounting on main frame - no mounting side wall MSW

## Shift-back flange, BP-FLP-...-VS

- for IP30 applications, for surface- and floor standing boards
- flange rotatable for inside and outside mounting
- for wall mounting and floor standing boards with a width of 400, 600, 800 mm is one shift-back flange necessary
- for floor standing boards with a width of 1000 and 1200 mm two shift-back flanges, width 600 and 400 mm or width 600 and 600 mm are necessary

## Wall-mounted enclosures BPM-O, IP54 for Profi+ installation units

wa\_vt07513

### BPM-O...

- Sheet-steel welded enclosure, degree of protection IP54, IK07
- Protection class I
- 270 mm enclosure depth
- Empty enclosures for accommodating Profi+ installation units  
For assembling on the base frame or MSW assembling
- Single-wing (till 800 mm wide) and double-wing door versions
- Hinged handle with two-way key bit or 3-point rod lock with clip down handle;
- Optional wall angle brackets for fixing on the wall
- Reversible door hinging
- Open cable entry above, prepared for F3A flanges
- Body white RAL 9016 or grey RAL 7035

## Moisture Proof-Surface Mounting Installation Distribution Boards, IP54, BPM-O-...

- welded construction with door and two-way key bit
- open cable entry above, prepared for F3A-Flanges
- interior fitting system possible via MSW or Towers
- to assemble with MSW, 2 pair Corner Tower Sets BPZ-CTS-S and 1 piece Snap Element BPZ-SNAP-MSW-CTS have to be ordered separately
- to assemble on the main frame 2 pieces Frontplate Support BPZ-FPS have to be ordered separately

## Flush-mounted enclosures BP-U, IP30 for Profi+ installation units

wa\_vt0413

### BP-U...

- Sheet-steel enclosure, degree of protection IP30, IK07
- Protection class I
- 240 mm installation depth
- Empty enclosures for accommodating Profi+ installation units  
Only for MSW assembling as 2-step and 3-step system
- Available as flat-pack (full range) or fully assembled enclosure (limited range)
- Single-wing (till 800 mm wide) and double-wing door versions
- Hinged handle with rotary lock;  
Larger enclosures 3-point rod lock with clip down handle
- Possible to connect multiple boards in parallel
- Flush doors with covered hinges, reversible
- Body white RAL 9016 or grey RAL 7035

wa\_vt04113

## Flush-Mounting Installation Distribution Boards - Fully Assembled, IP30, **BP-U-...-C**

- including wall-box, top/bottom panels for the wall-Box , flush-mounting door frame and mounting side wall
- only for MSW mounting
- installation depth 240 mm
- including DIN-rail sets
- including front plates (150 mm) with device cutout (45 mm)

## Mounting Side Wall, BPZ-MSW

- application without snap element, fixed mounting
- enable assembling into mounting frame and connection of devices outside of the board
- for assembling of inner equipment into flush-mounted boards
- enables also a comfort assembling of installation devices into surface-mounted and floorstanding boards

## Floor-standing enclosures BP-F, IP30 for Profi+ installation units

wa\_vt03613

### **BP-F...**

- Sheet-steel welded enclosure, degree of protection IP30, IK07
- Protection class I
- 250/300/400 mm enclosure depth
- Empty enclosures for accommodating Profi+ installation units  
Special types for assembling on the base frame or MSW assembling
- Single-wing (till 800 mm wide) and double-wing door versions
- Hinged handle with multiple rotary lock or 3-point rod lock with clip down handle
- Doors with covered hinges, reversible
- Suitable for wide range of (pass-through membrane) flanges
- Body white RAL 9016 or grey RAL 7035

## Floor-Standing Distribution Board with Rotary Door Handle, IP30, BP-F-...

- depth 300 mm
- including pass-through flange on top and bottom
- including metal door with rotary door handle
- to assemble with MSW, 2 pair Corner Tower Sets BPZ-CTS-S and 1 piece Snap Element BPZ-SNAP-MSW-CTS have to be ordered separately
- to assemble on the main frame 2 pieces Frontplate Support BPZ-FPS have to be ordered separately
- interior fitting system possible via MSW or Towers

## Floor-standing enclosures BPM-F, IP54 for Profi+ installation units

wa\_vt03613

### BPM-F...

- Sheet-steel welded enclosure, degree of protection IP54, IK07
- Protection class I
- 320 mm enclosure depth
- Empty enclosures for accommodating Profi+ installation units  
Special types for assembling on the base frame or MSW assembling
- Single-wing (till 800 mm wide) and double-wing door versions
- Hinged handle with multiple rotary lock or 3-point rod lock with clip down handle
- Doors with covered hinges, reversible
- Open cable entry top and bottom, prepared for F3A (membrane) flanges
- Body white RAL 9016 or grey RAL 7035

## Moisture Proof-Floor-Standing Board with Dual-bit lock, IP54, BPM-F-...

- depth 320 mm
- welded construction with door and two-way key bit
- open cable entry below and above, prepared for F3A-Flanges
- interior fitting system possible via MSW or Towers
- to assemble with MSW, 2 pair Corner Tower Sets BPZ-CTS-S and 1 piece Snap Element BPZ-SNAP-MSW-CTS have to be ordered separately
- to assemble on the main frame 2 pieces Frontplate Support BPZ-FPS have to be ordered separately

## Frontplate Support, BPZ-FPS

- pair (for left and right side), screws included
- for the installation of the Floor Standing Board flexible application BP-F...-F
- intended for mounting of front plates without using BPZ-MSW
- shorter types enables combination of an installation section with BPZ-MSW and power section without BPZ-MSW in one board)

## Corner Tower Set, BPZ-CTS

- pair (for left and right side), screws included
- enables mounting of BPZ-MSW into floor standing boards or surface-mounting boards
- for mounting of terminal support bar BPZ-TSB
- Corner Tower Set short - for mounting MSW in floor standing boards or floor standing boards with separation frame
- Corner Tower Set long - used for wall mounted boards

## Standard-Section Profi+ installation system

- The standard-section fitting-system is a system for the set-up of factory-built, type-tested switchgear assemblies
- 2 ways of Profi+ installation system; for assembly on the base frame or MSW assembly
- High fill rate for DIN modular devices by wide 45mm openings
- Flexibility in project development thanks to individual assembly options with standard inserts for standard sections or standard parts for different areas of application
- Time-saving mounting of individual standard-section modules and components thanks to screw-type or clamping technique
- A large number of type-tested assemblies for standard-section modules do not require any further mechanical handling
- High level of safety and security in operating and service is guaranteed thanks to type-tested distribution systems conforming to the EN-IEC 61439 standard

For meter, installation and power distribution boards in our cabinet systems:

- Wall-mounted distribution cabinets BP-O, BPM-O, BP-U up to 630 A
- Floor-standing distribution cabinet BP-F, BPM-F up 630 A
- Floor-standing distribution cabinet XVTL up to 1600 A

## Technical pages Accessories and Profi+ installation system

## Wall-Mounted Surface Mounting Distribution Boards BP-O...(-C)

### System Overview

## Surface-Mounting Installation Distribution Boards, BP-O...(-C) (EW)

- Modular design
- Grounded metal covers
- Flat-pack or fully assembled
- Add-on options
- Generous wiring space
- Variable interior layout with/without removable mounting frame
- Structured, multilayer construction for easy accessible installation: base frame - DIN-rails ... - enclosure
- Reversible door hinging
- Type BP-O...-EW is equipped with a fireproof door (metal hinges and lock)

### Technical Data

#### Electrical

Design according to	IEC/EN 61439-1/3, IEC/EN 62208				
Protection class	I				
Degree of protection	IP30				
Rated voltage	415 VAC / 50Hz				
Rated current	630 A depending on the busbar support system				

#### Earth connections

Base frame	M5 earthing point screw
Side wall, top/bottom panel	M5 tapping screw
Door	M6 welding bolt

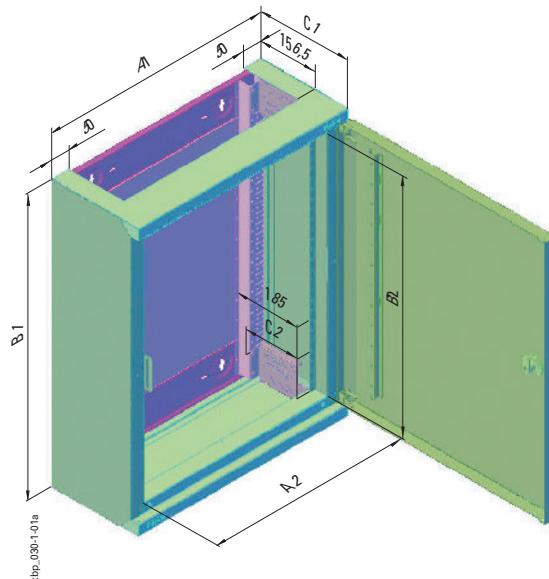

Max. power loss (W) for all devices in the dist. board at 35° C ambient temperature:

Height \ Width (mm)	400	600	800	1000	1200
460	74	101	129	-	-
760	104	137	156	-	-
1060	133	147	203	264	-
1260	118	170	232	302	374
1560	144	207	281	364	429

#### Mechanical

Material	Sheet steel
Paint coat	Phosphatised and polyester-powder-coated
Colour	Grey RAL 7035, white RAL 9016
Door	Doors with covered hinges, can be unhinged at an angle of more than 90° Opening angle: 167° (ca. 100° in case of several distribution boards mounted next to each other)
Door lock	Hinged handle with rotary lock; cylinder lock; 3-point lock with clip down handle
Cable entry	Different covers permit cable entry from below and/or above
Shock resistant	IK08

<sup>1)</sup> Door lock +8 mm

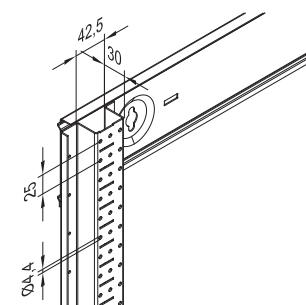

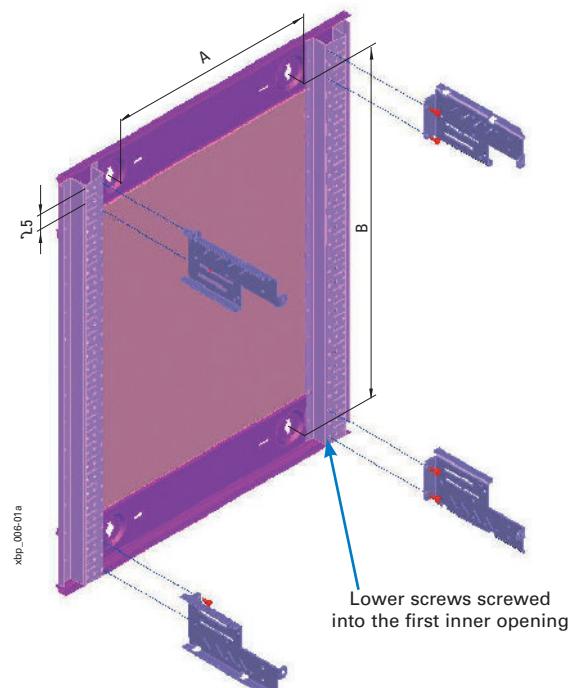

<sup>2)</sup> Number of hinge cut-outs for rotary handles. doors with clip down handle also available.

<sup>3)</sup> Number of locks for the right door. Left door contains two rotary handles in all dimensions.

## Surface-mounting distribution boards IP30 - components

### Base frames, BP-MF

- Add-on design
- Symmetrical layout
- Consistent system perforation pattern (25 mm grid)
- Material: sheet steel, zinc-coated  
thickness 1 mm
- Scope of delivery: 1 base frame, 4 towers, fixing material

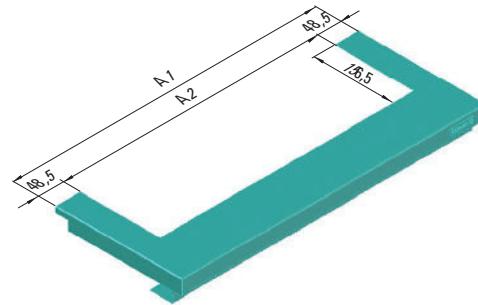

Width [mm]	A	Height [mm]	B
400	173	460	342,5
600	373	760	642,5
800	573	1060	942,5
1000	773	1260	1142,5
1200	973	1560	1442,5

## Top / bottom panels, BP-TBP

- The top/bottom panels are used as covers for the cabinet
- With or without cable entry cutout
- Material: sheet steel, powder-coated, RAL 7035 or RAL 9016 thickness 1 mm
- Scope of delivery: 1 top panel, 1 bottom panel, fixing material

### Dimensions [mm]

Type	Depth	Without cutout		With cutout

## Cable entry / flange plates, BP-FLP

- Blind plate for closing the cable entry
- Cable entry plate with pass-through flange 2K (pre-fitted)
- Cable entry plate designed for F3A flange
- Mounting into BP-TBP-...-CE panels
- Can be used also for floor-standing board IP30
- Material: sheet steel, powder-coated, RAL 7035 thickness 1 mm
- Scope of delivery: 1 cable entry/flange plate, fixing material

- Side panels are used as part of cover for the cabinet
- 2 variants (for mounting with / without BPZ-MSW)
- Material: sheet steel, powder-coated, RAL 7035 or RAL 9016  
thickness 1 mm
- Scope of delivery: 2 side panels

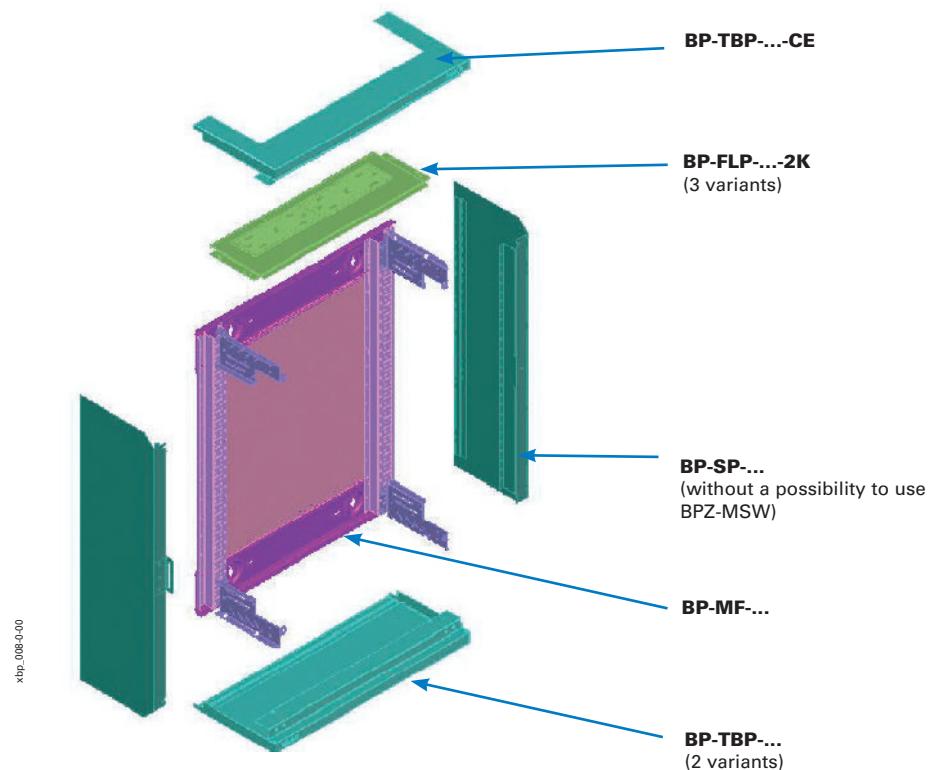

## Mounting of front plates BPZ-FP into side panels BP-SP

## Assembling of surface-mounted board IP30

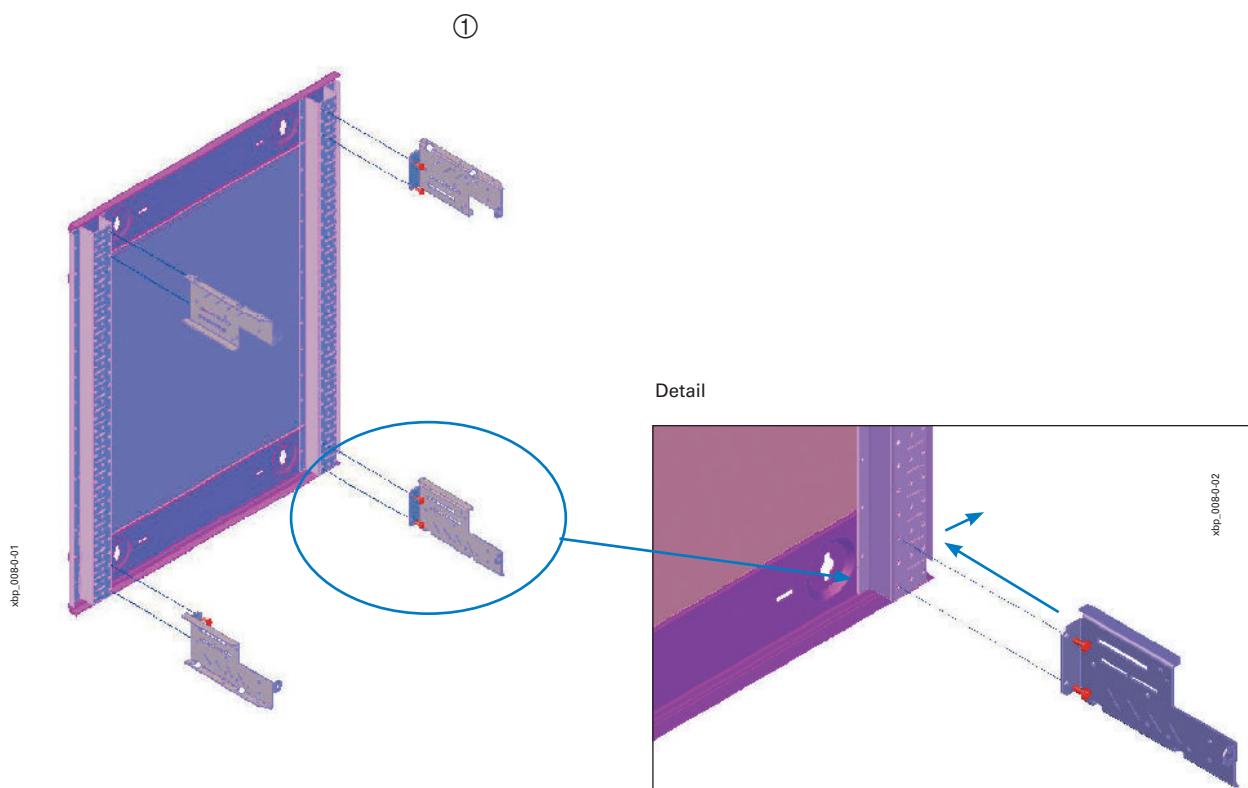

Board without a possibility of installation of mounting frame BPZ-MSW

**Without side wall BPZ-MSW**

### Mounting process:

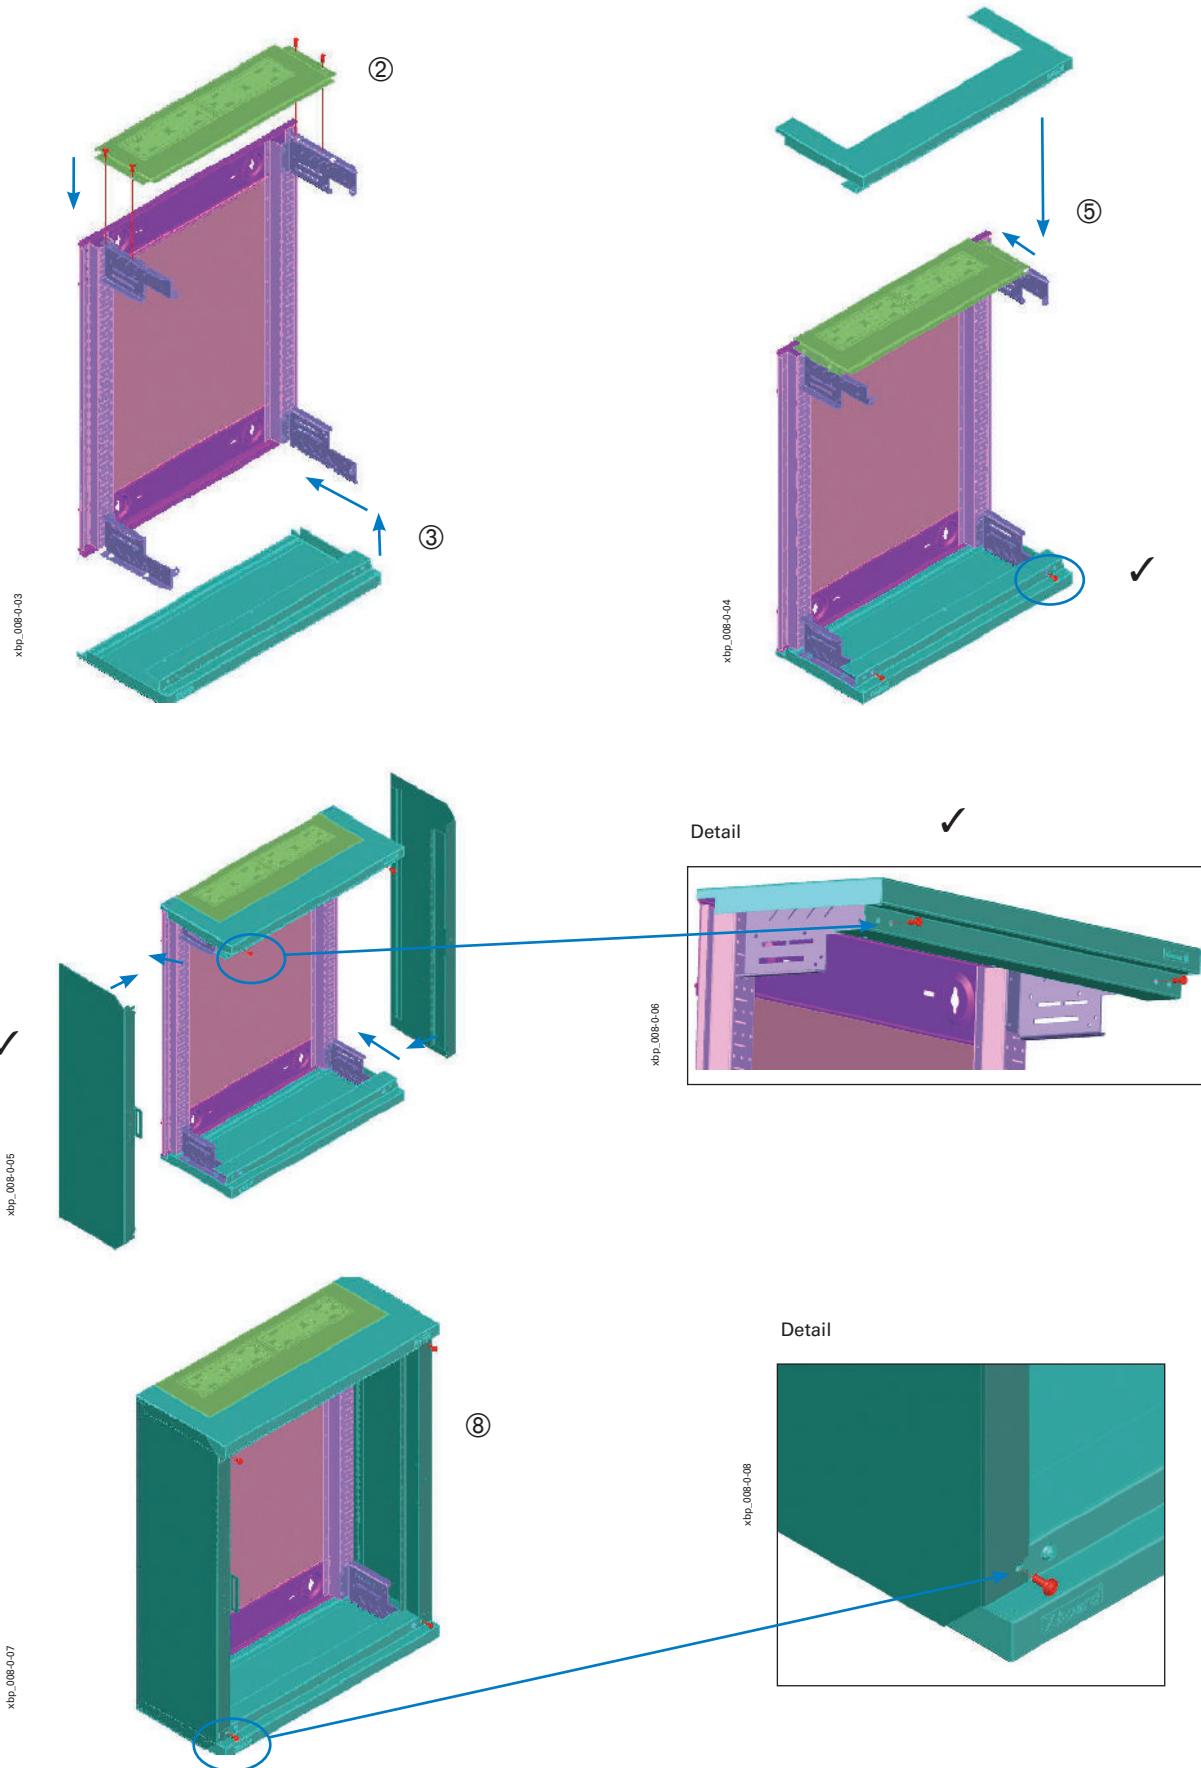

1. Mounting of towers BPZ-CTS-L onto base frame BP-MF. Towers BPZ-CTS-L are in a scope of delivery of the frame BP-MF.

# Distribution Boards

xEnergy  
Basic

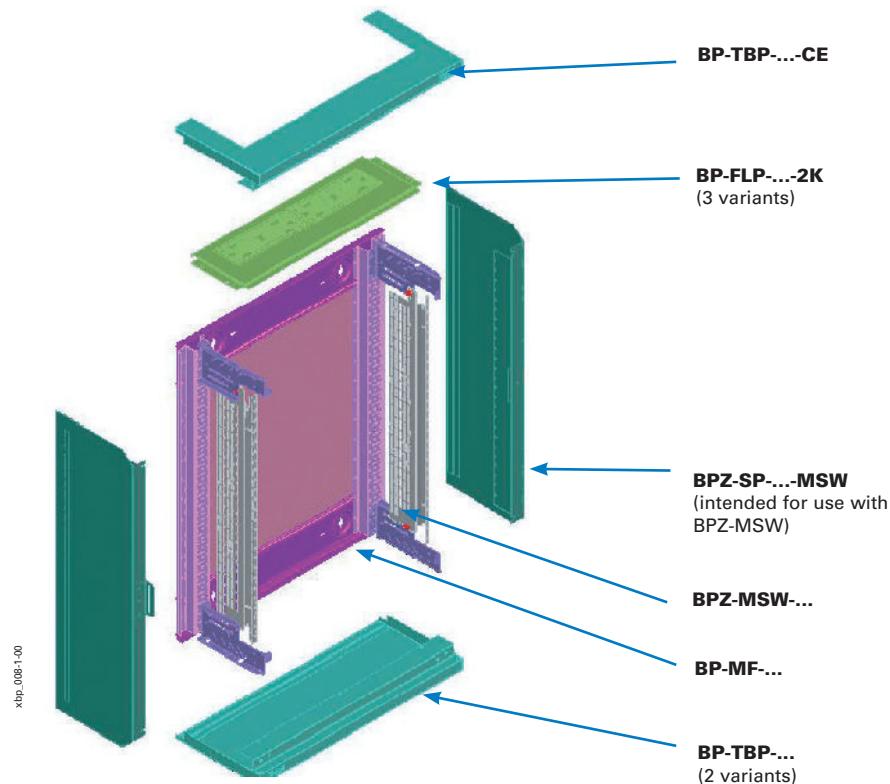

2. Assembly of cable entry plates BP-FLP onto towers BPZ-CTS-L
3. Assembly of top / bottom panel without cutout (if used)
4. Fixing of top / bottom panel without cutout into towers BPZ-CTS-L by means of screws
5. Addition of cable entry plate with top / bottom panel
6. Fixing of top / bottom panel with cutout into towers BPZ-CTS-L by means of screws
7. Assembly of side panels BP-SP
8. Fixing of side panels BP-SP

## Assembling of surface-mounted board IP30

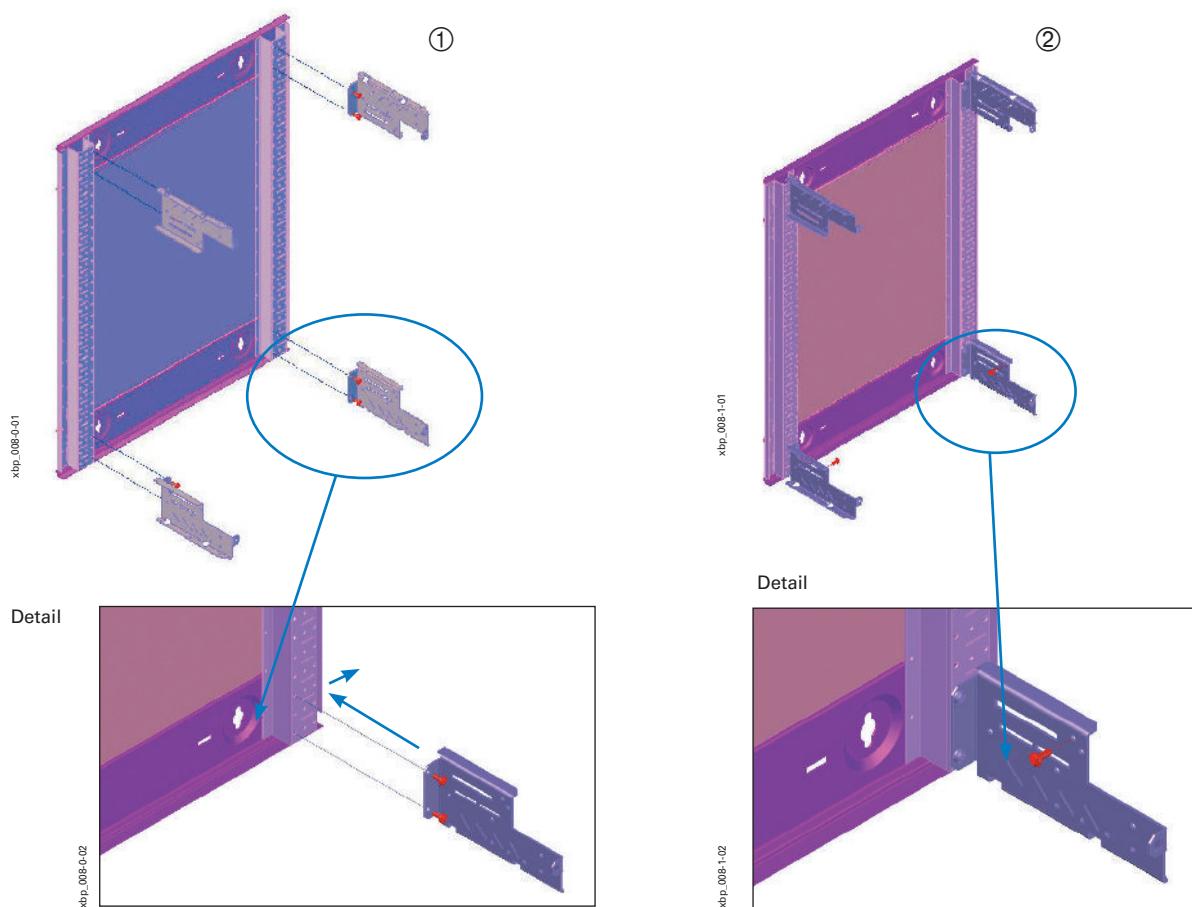

Board for installation of mounting frame BPZ-MSW

With side wall BPZ-MSW

### Mounting process:

1. Mounting of towers BPZ-CTS-L onto base frame BP-MF. Towers BPZ-CTS-L are in a scope of delivery of the frame BP-MF.
2. Pre-screwing of a screw which creates bottom hitch for frame BPZ-MSW.

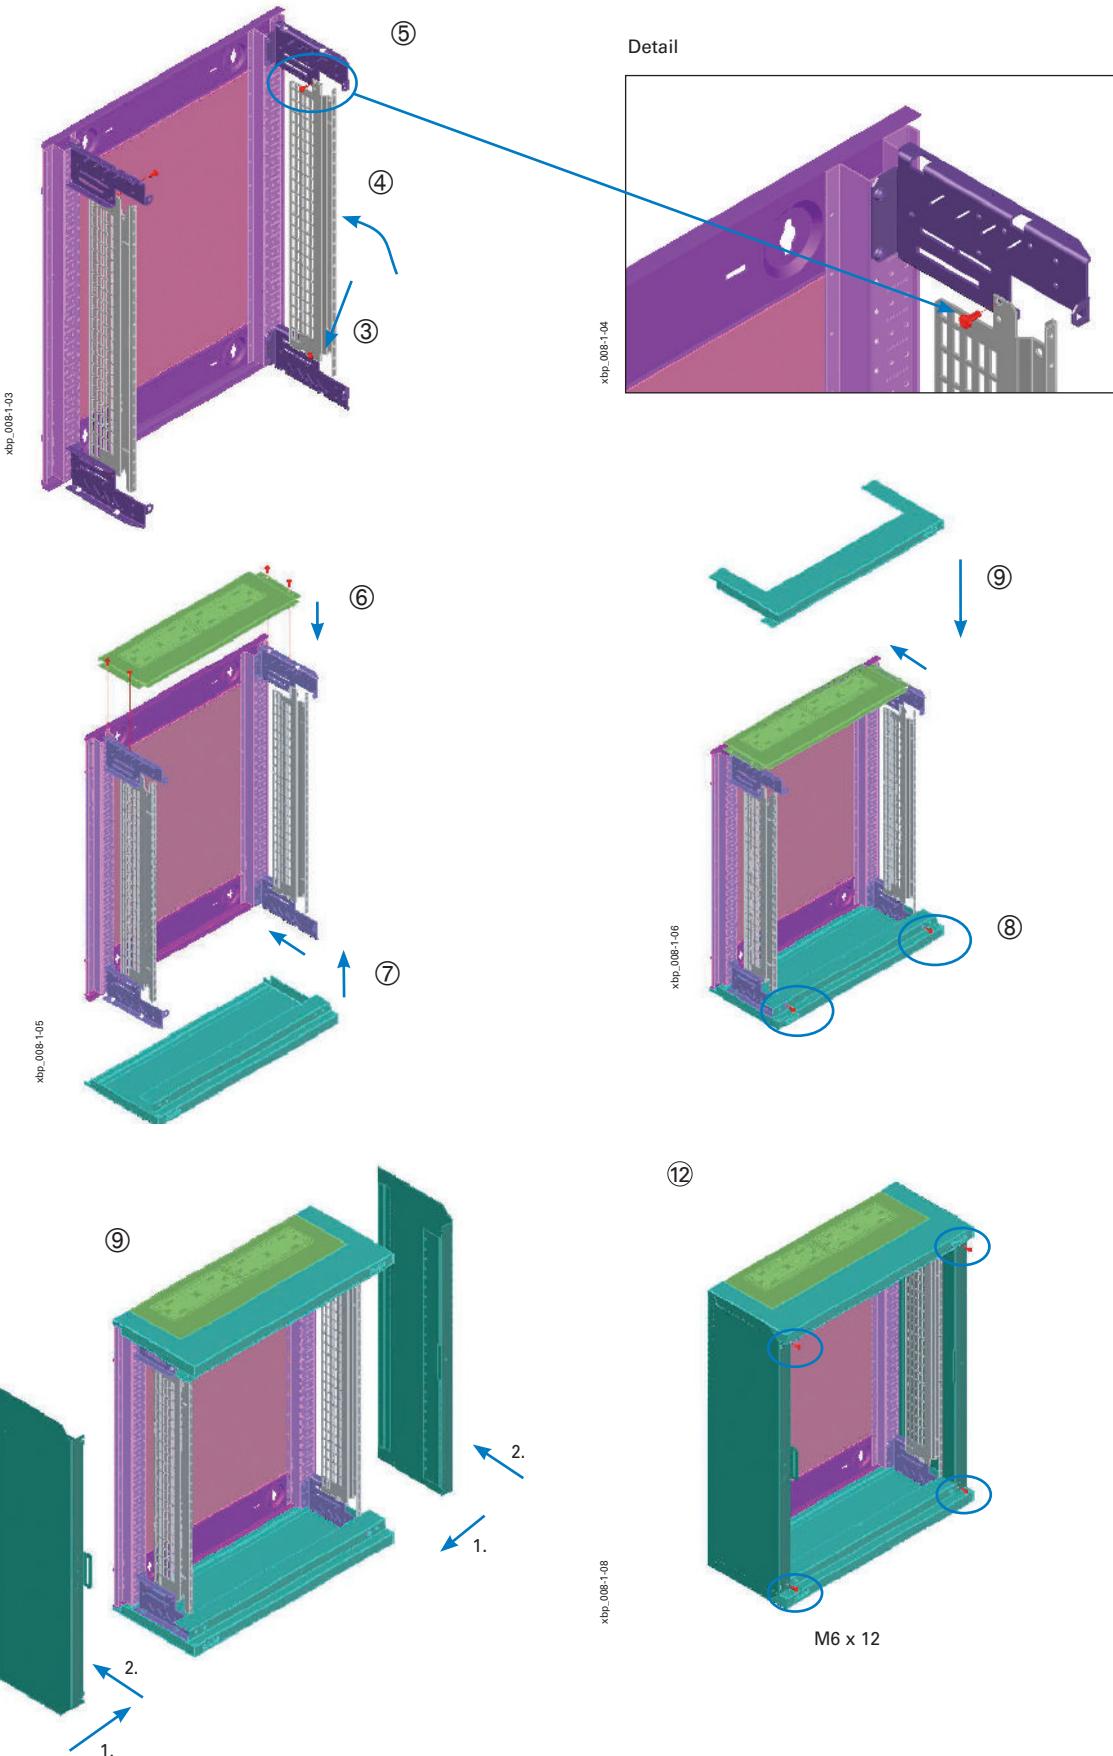

# Distribution Boards

**xEnergy  
Basic**

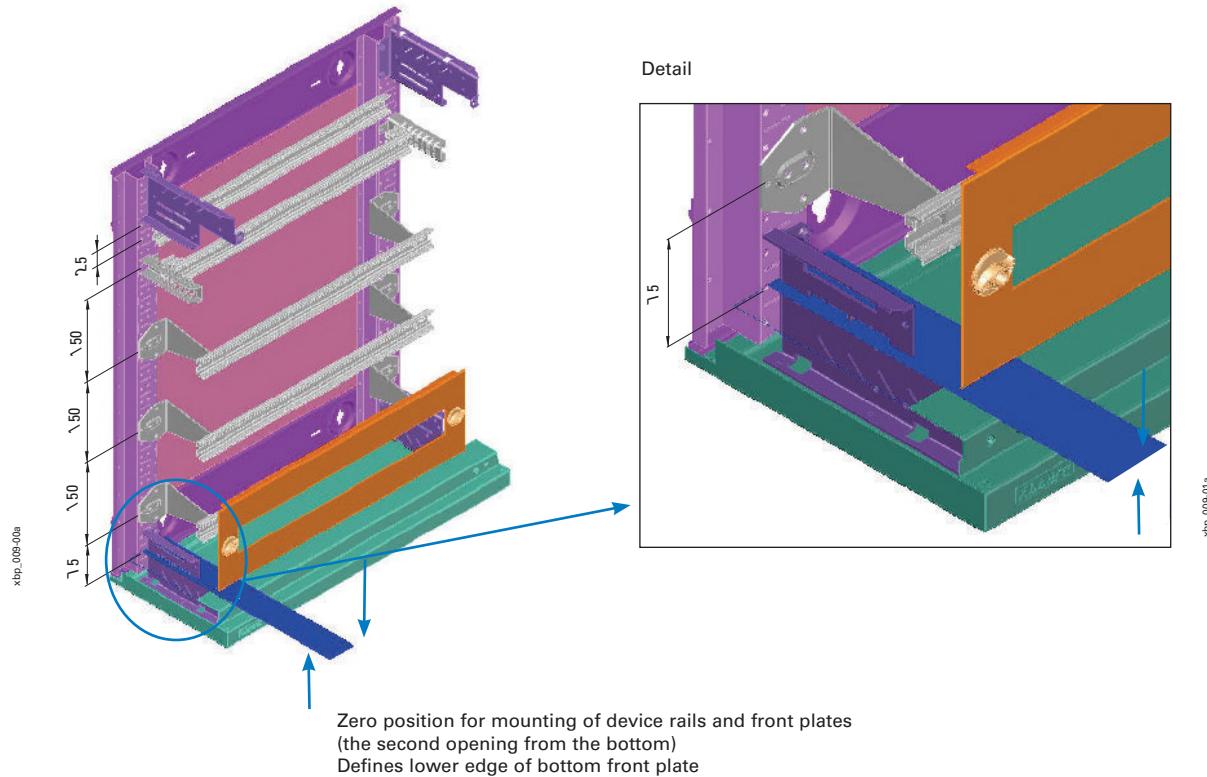

3. Placing of the frame from side walls BPZ-MSW on bottom hitch
4. Tipping of the side walls BPZ-MSW to correct position
5. Fixing of the frame with top hitch screw
6. Assembly of cable entry plates BP-FLP onto towers BPZ-CTS-L
7. Assembly of top / bottom panel without cutout (if used)
8. Fixing of top / bottom panel without cutout into towers BPZ-CTS-L by means of screws

9. Addition of cable entry plate with top / bottom panel
10. Fixing of top / bottom panel with cutout into towers BPZ-CTS-L by means of screws
11. Assembly of side panels BPZ-SP-MSW
12. Fixing of side panels BPZ-SP-MSW

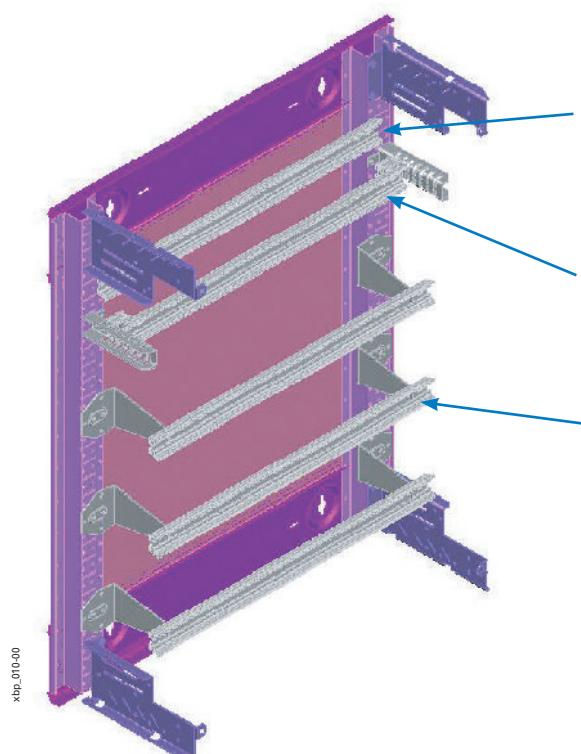

## Zero position for mounting of front plates

- Defines lower edge of the first bottom front plate - first step of assembly
- For standard front plate height 150 mm, the center of the first bottom device rail is located 75 mm above the zero position

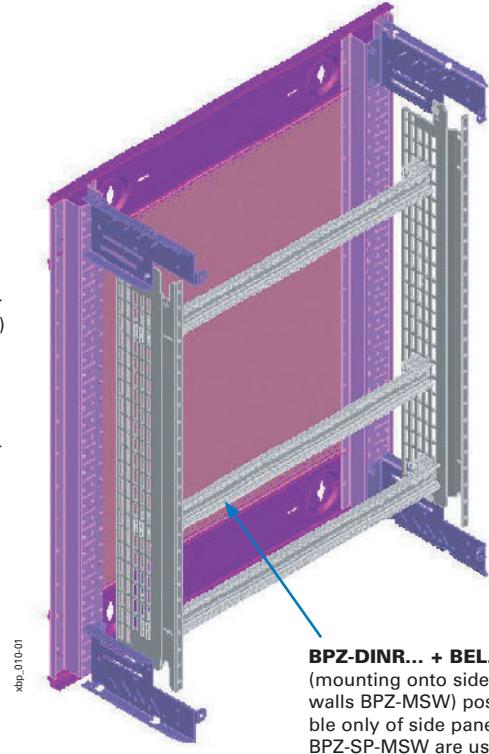

## Mounting of device rails

I. Rear mounting onto base frame

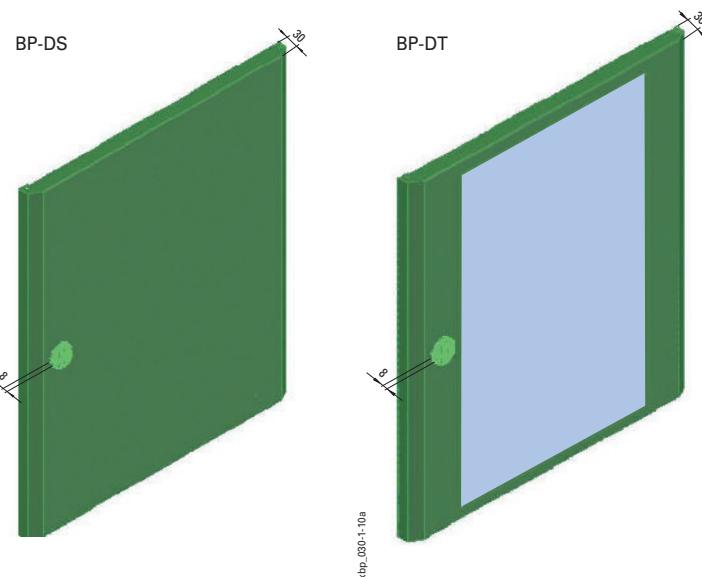

II. Mounting onto side walls BPZ-MSW

## Sheet steel doors, BP-DS

- Front-mounted
- Quick mounting and removing of the door
- Right or left hinged
- Opening angle 167°
- 1-point lock through rotary lock, 3-point lock with clip down handle
- Material: sheet steel, powder-coated, RAL 7035 thickness 1 mm
- Scope of delivery: 1 door, set for earth connection

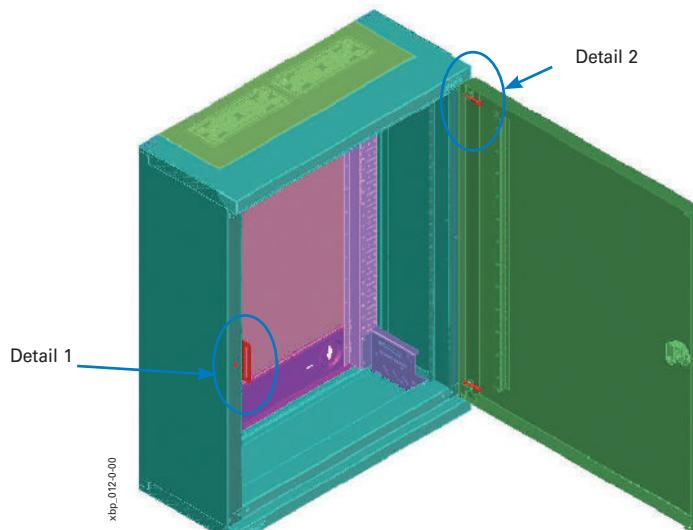

## Transparent doors (sheet steel), BP-DT

- Material: 2 mm of plexiglas

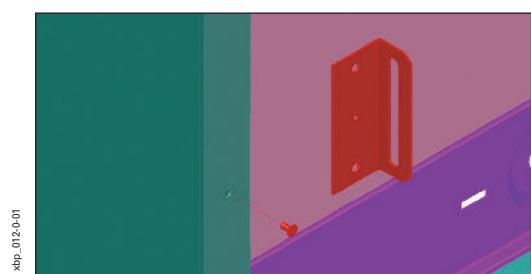

## Mounting of door BP-DS

### Mounting process:

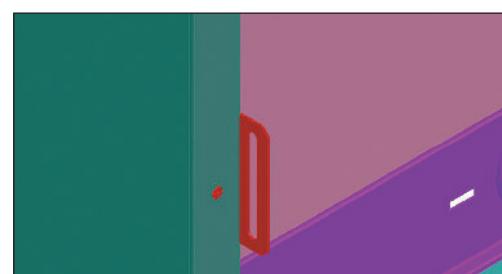

1. Mounting of lug for lock rod on the respective side (in scope of delivery of side panels)
2. Inserting of door at the opening angle about 90°
3. Inserting of hinge pins
4. Fixing of the pins in plastic bracket

**Detail 1**

xbp\_012-0-42

**Detail 2**

③

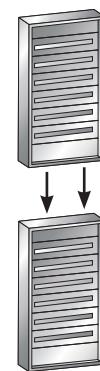

④

## Horizontal/middle add-on connection element, BP-MFL

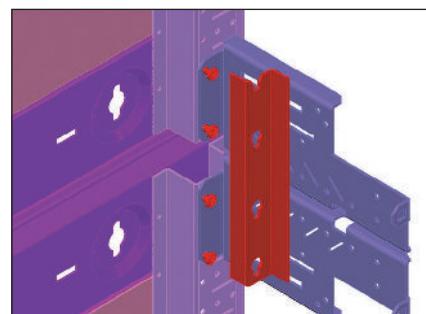

- For mounting distribution boards one on top of the other
- For surface mounting boards IP30
- Possible to combine with BP-MSL for cross combination of boards
- Material: sheet steel, powder-coated, RAL 7035
- Scope of delivery: 1 horizontal/middle add-on connection element, 2 mounting elements, fixing material

### Mounting process:

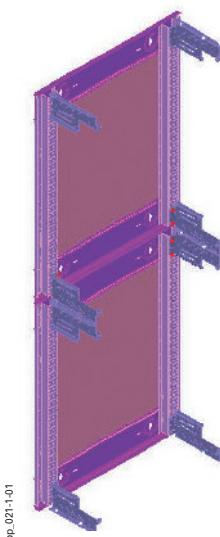

- For a pair of boards, only one set of top / bottom panels is used
1. Placing of base frames BP-MF to correct position
  2. Remove of screws of towers BPZ-CTS-L at sides near to boards connection
  3. Put of mounting elements on the loosened screws
  4. Tightening of fixing screws
  5. Assembly of connection element
  6. Fixing of connection element
  7. Mounting of top and bottom panels BP-TBP
  8. Mounting of side walls BP-SP, BPZ-SP-MSW
  9. Mounting of doors BP-DS

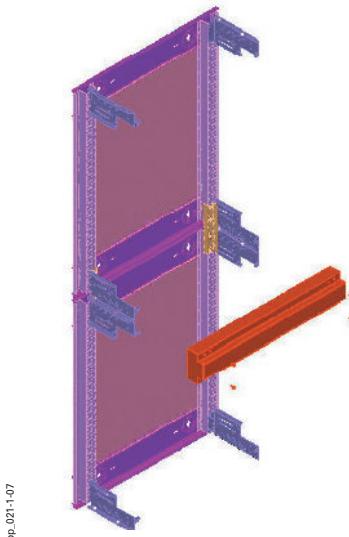

Detail

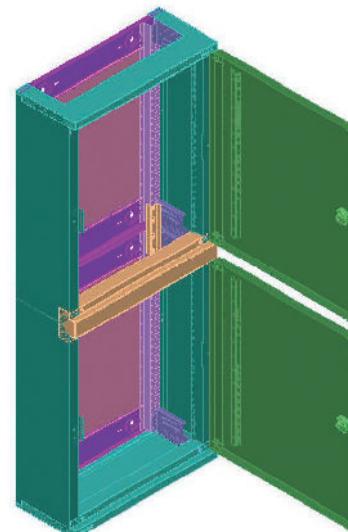

xbp\_0211-04

xbp\_0211-01

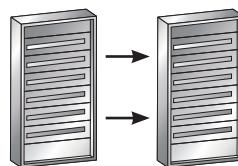

xbp\_0211-07

xbp\_0211-13

## Vertical/middle add-on connection element, BP-MSL

- For mounting distribution boards one next to the other (in parallel)
- Possible to combine with BP-MFL for cross combination of boards
- Material: sheet steel, powder-coated, RAL 7035
- Scope of delivery: 1 vertical/middle add-on connection element, 2 mounting elements, fixing material

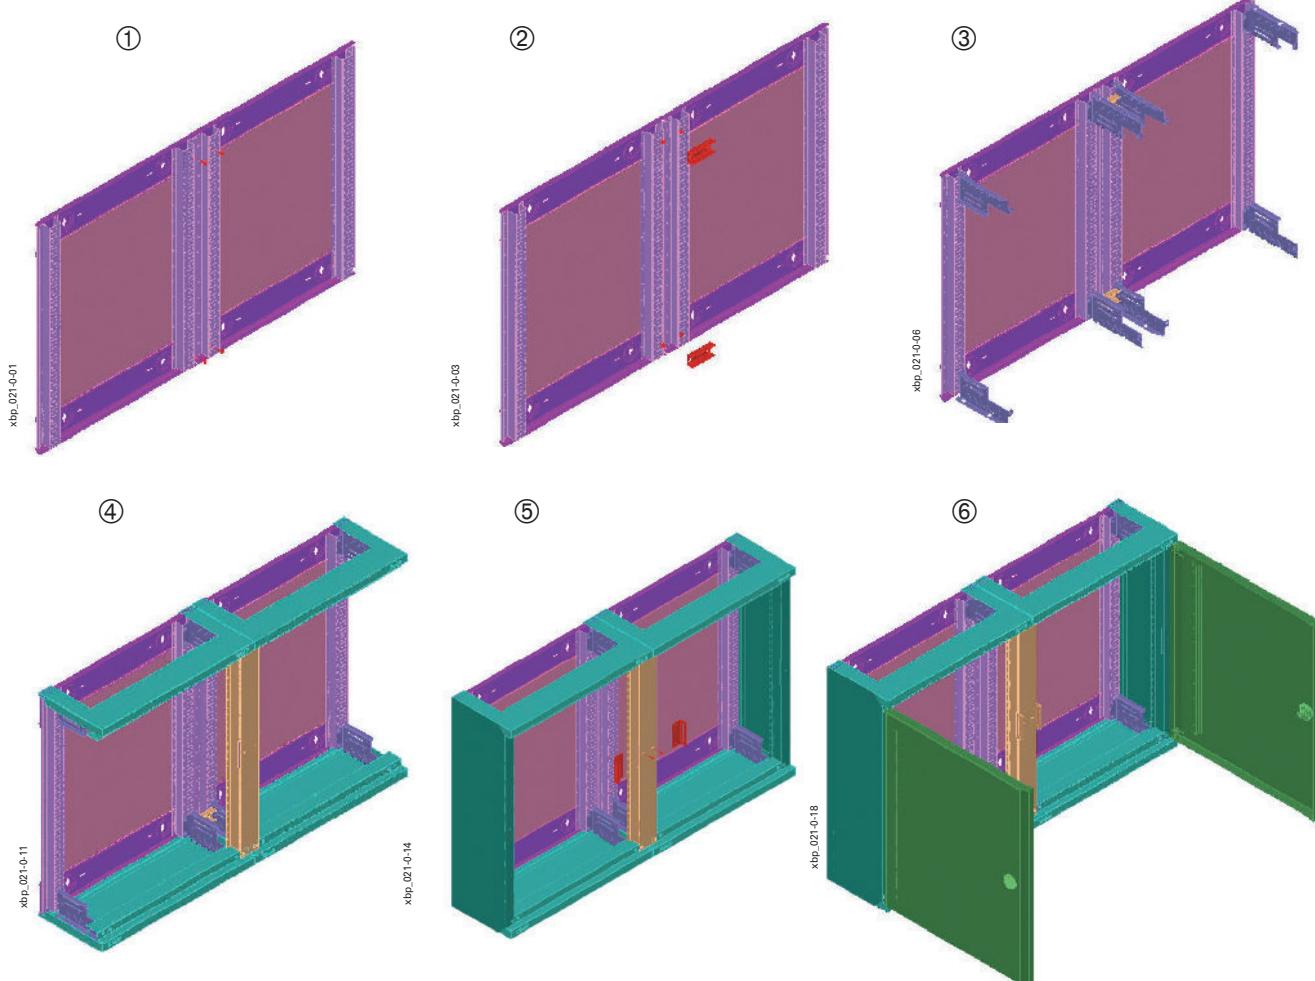

### Mounting process:

- The process is identical for both BP-MSL and BP-MSL-MSW
- For a pair of boards, only one set of side panels BP-SP, BPZ-SP-MSW is used

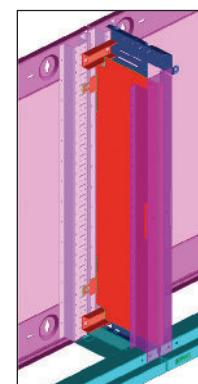

1. Placing of base frames BP-MF to correct position, pre-screwing of fixing screws
2. Put of mounting elements and fixing of screws
3. Mounting of towers BPZ-CTS-L onto base frame BP-MF. Towers BPZ-CTS-L are in a scope of delivery of the frame BP-MF.
4. Mounting of top and bottom panels BP-TBP and pre-screwing of add-on connection element screws. Assembly of add-on element
5. Connected pair of boards. Mounting of lugs for locks rods
6. Mounting of doors

To preserve maximum opening angle, both boards have to have opposite direction of door opening

## Separation panel, BPZ-ASB

- Internal vertical separation between two sections
- Fixing on the rear frame
- Painted, grey RAL 7035

## Surface-Mounting Installation Distribution Boards BPM-O...

- Excellent stability due to welded construction
- Grounded metal covers
- Generous wiring space
- Variable interior layout with/without removable mounting frame
- Structured, multilayer construction for easy accessible installation
- Reversible door hinging

## Mounting of device rails onto rear frame (without mounting frame BPZ-MSW)

- Front plates are mounted onto supports BPZ-FPS (not in scope of delivery of BPM-O board)
- Welded construction, side panels of the cover cannot be unmounted

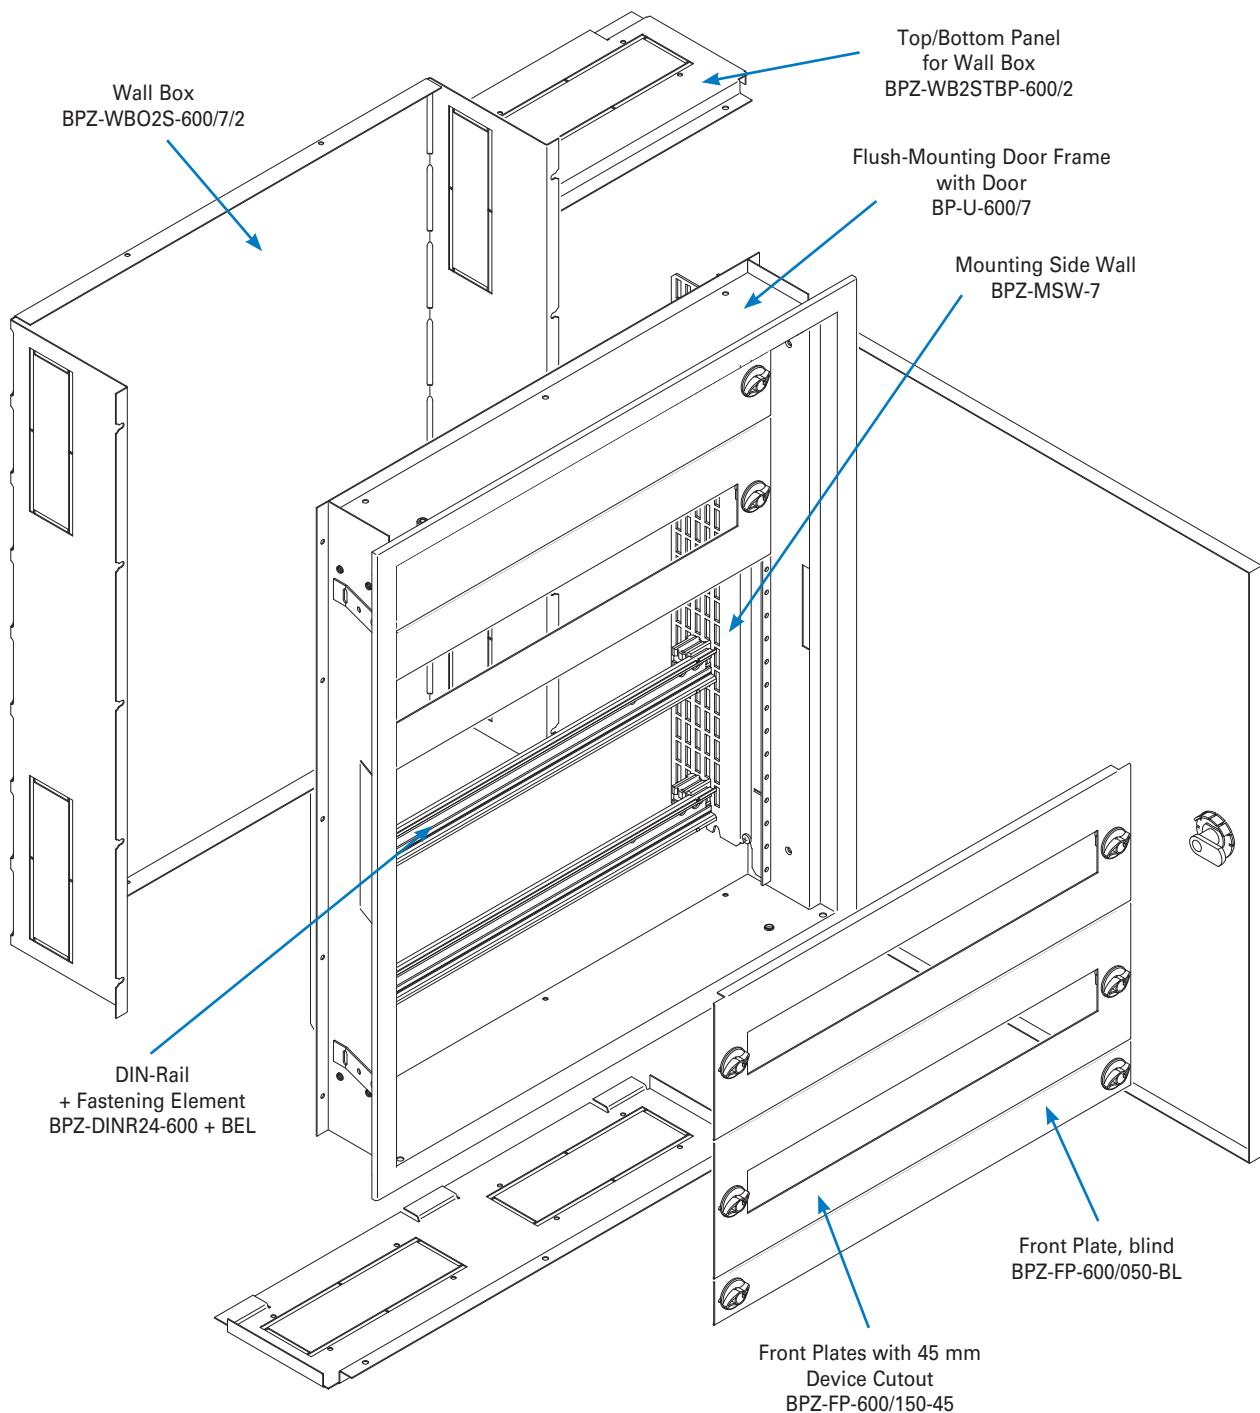

## Mounting of device rails with mounting frame BPZ-MSW

- Mounting onto corner towers BPZ-CTS-L (not in scope of delivery of BPM-O board)
- The mounting process of side walls BPZ-MSW is identical with version IP30
- Front plates are mounted directly onto BPZ-MSW
- Welded construction, side panels of the cover cannot be unmounted

## Wall-Mounted Flush-mounting Distribution Boards - 2-Step-System BP-U...(-C)

### System Overview

## Flush-Mounting Installation Distribution Boards - 2-Step-System BP-U...(-C)

- Grounded metal covers
- Generous wiring space
- Variable interior layout with removable mounting frame
- Structured, multilayer construction for easy accessible installation: mounting sied wall - DIN-rails ... - enclosure
- Reversible door hinging

## Side panels of wall box BPZ-WB3S

Depth 180, 240

## Top and bottom panel of wall box BPZ-WB3S

Depth 180, 240

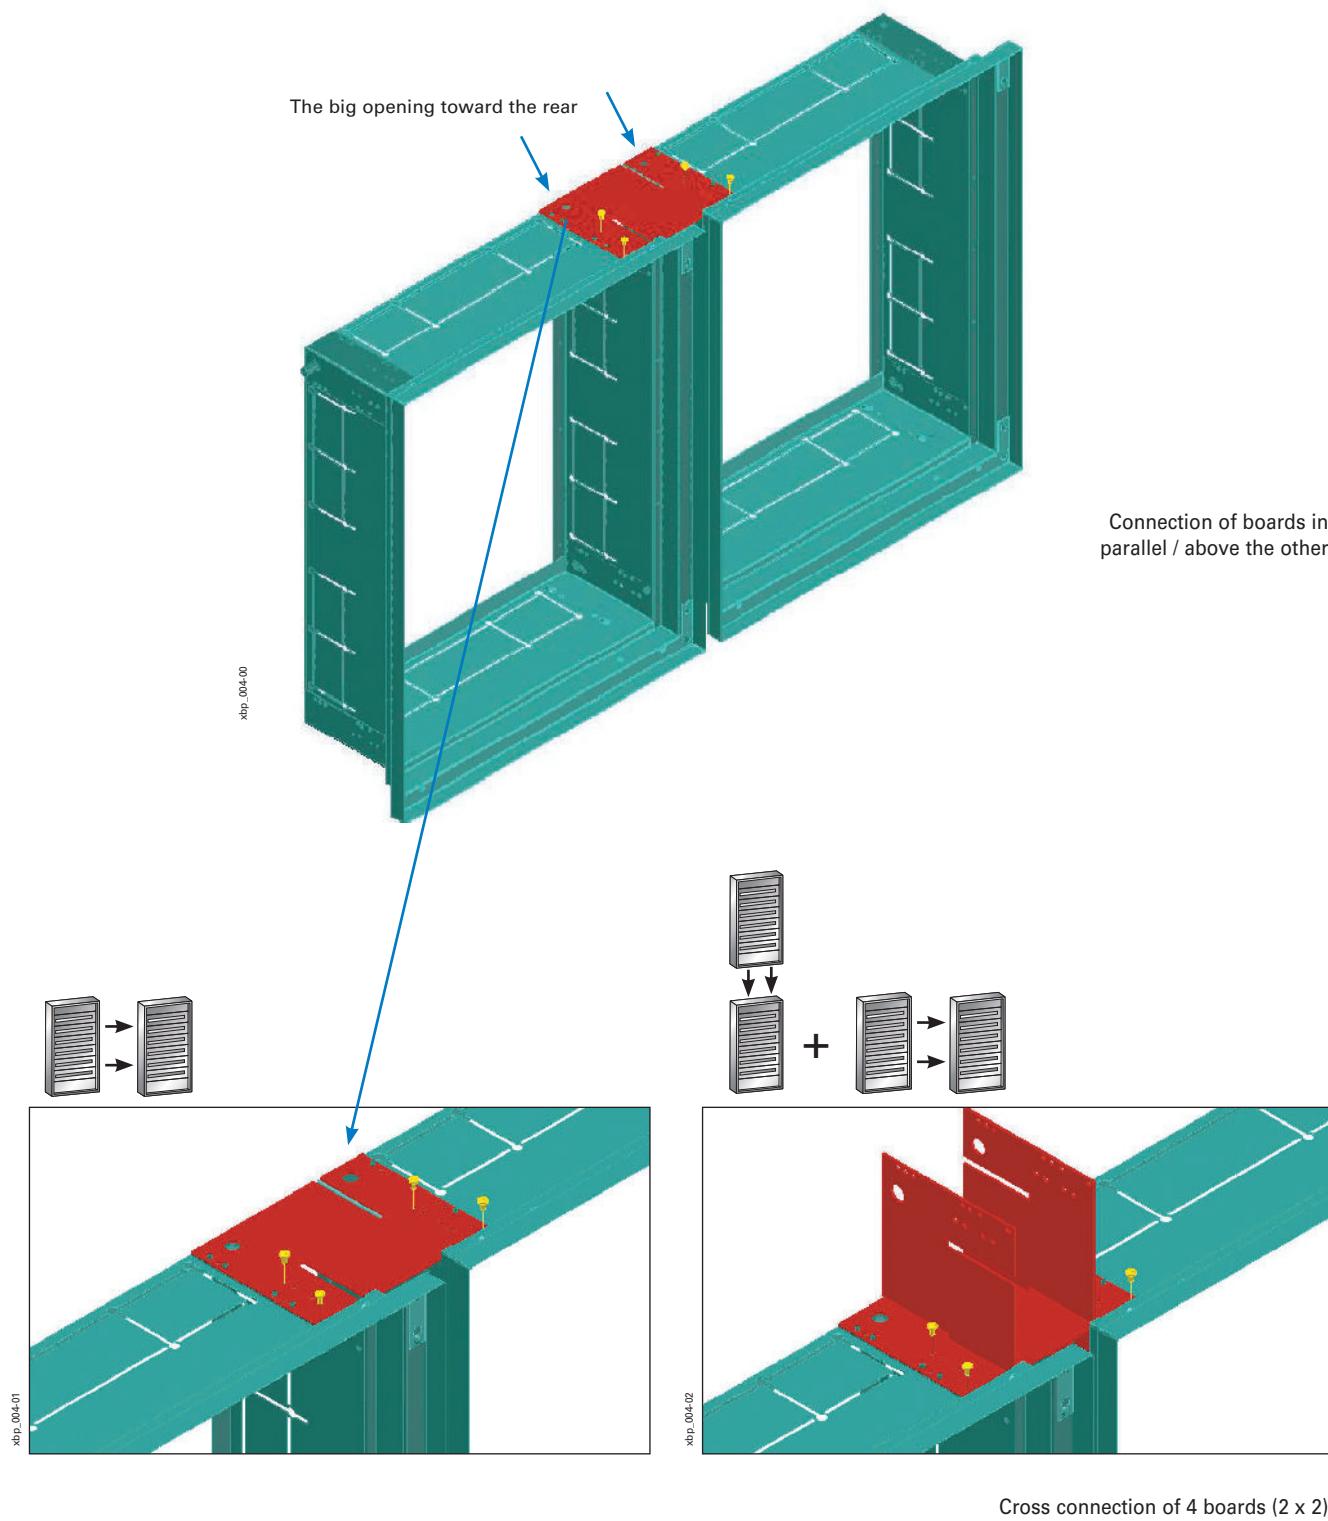

## Connecting of flush-mounting boards with BPZ-BR/WB3S

- Use of coupling flange BPZ-BR/WB3S
- The coupling flanges define respective space in between particular wall boxes
- Possible to connect boards in parallel, one above the other or into a cross (i.e. parallel and one above the other at the same time)

### Mounting process:

1. Placing of wall boxes BPZ-WB3S in parallel / one above the other
2. Put of flange BPZ-BR/WB3S. The big opening has to be oriented toward the rear
3. Fixing of the flange by means of screws

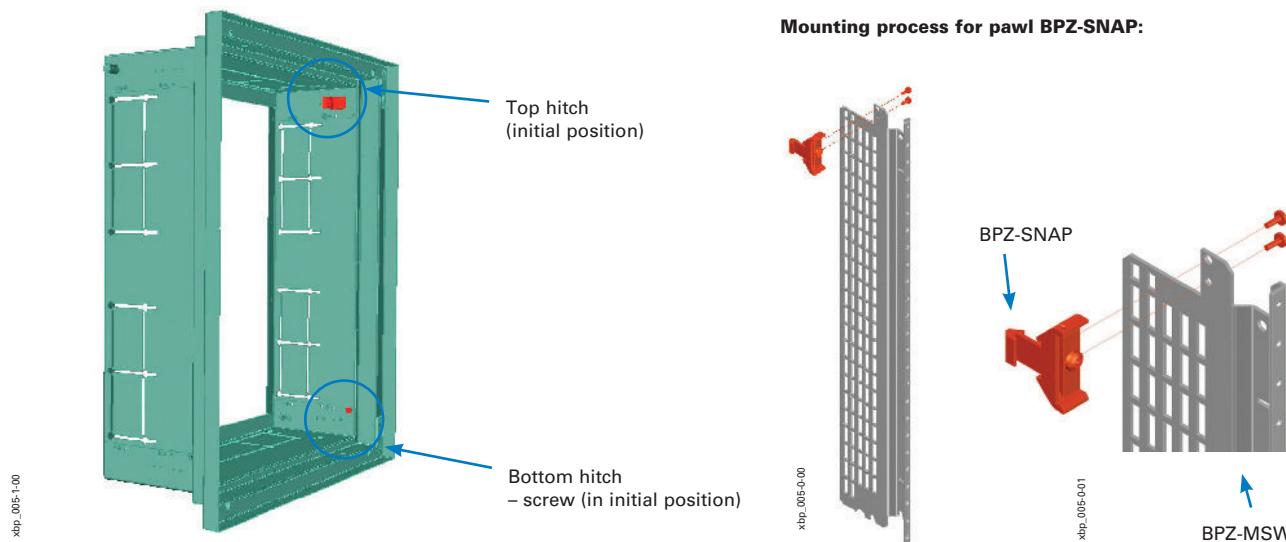

## Mounting of side walls BPZ-MSW into wall box BPZ-WB3S

### Mounting process:

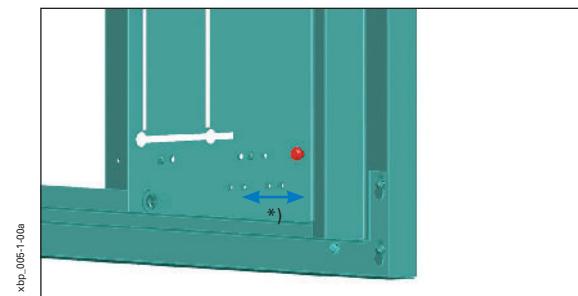

1. Placing of the side wall BPZ-MSW on bottom hitch
2. Tipping of the side wall to correct position. This position is indicated with click of the pawl BPZ-SNAP.
3. Tightening of the top hitch screw
4. Tightening of the bottom hitch screw

### Notes:

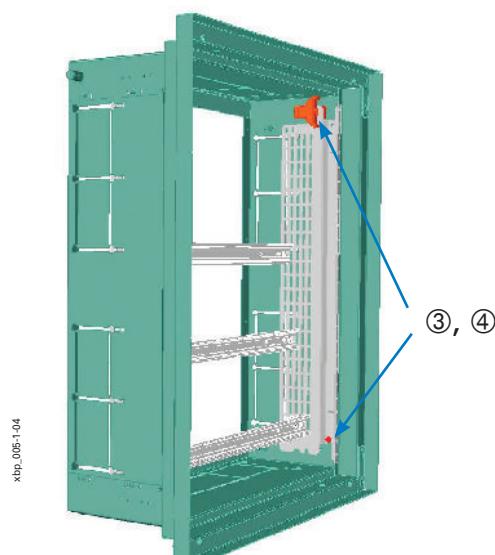

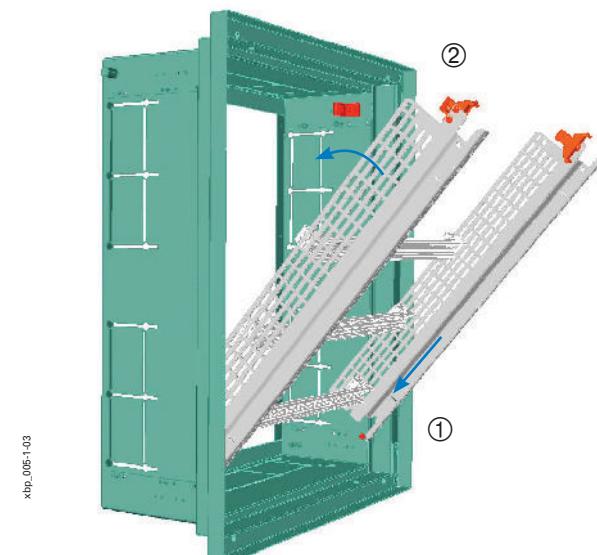

- Usually, a complete frame (2 side walls, device rails, devices) is mounted
- For flush-mounting boards, the sidewalls BPZ-MSW have to be equipped with pawls BPZ-SNAP. These pawls do not substitute a function of the original screw.
- The frame has to be fixed with this screw!
- To demount the frame BPZ-MSW, a flat screwdriver is necessary to press away a pin of pawl BPZ-SNAP.

Detail of bottom hitch  
\*) possibility of change of side wall depth

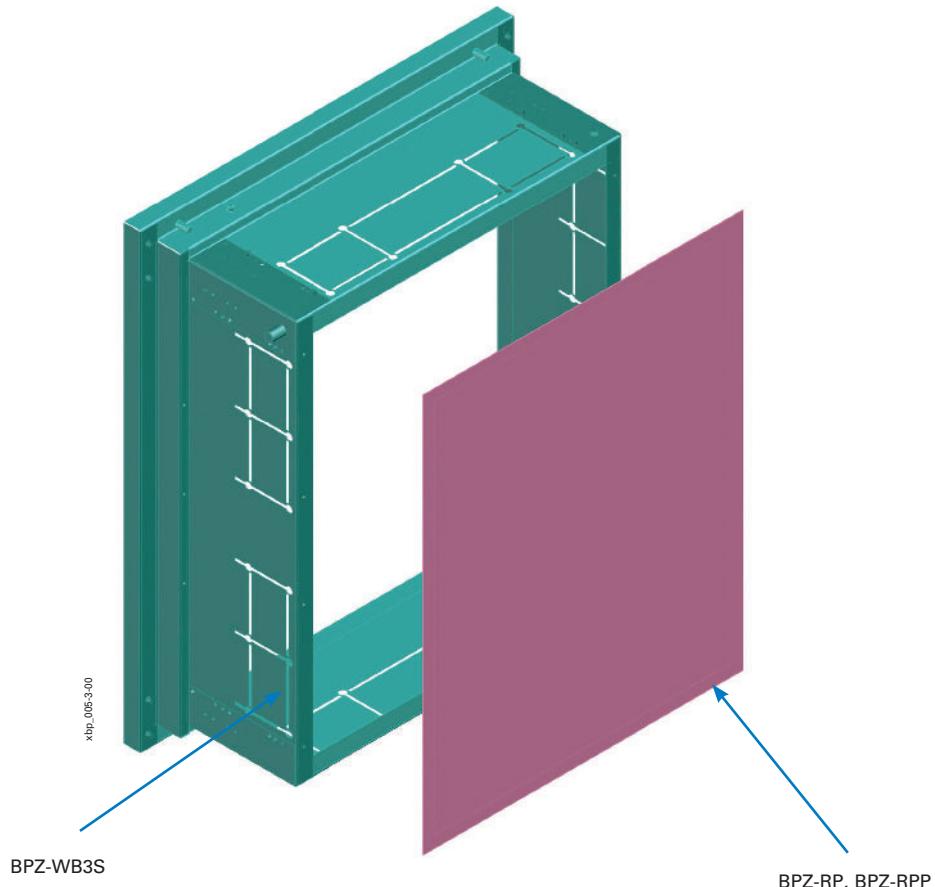

Detail of top hitch

## Rear walls, BPZ-RP

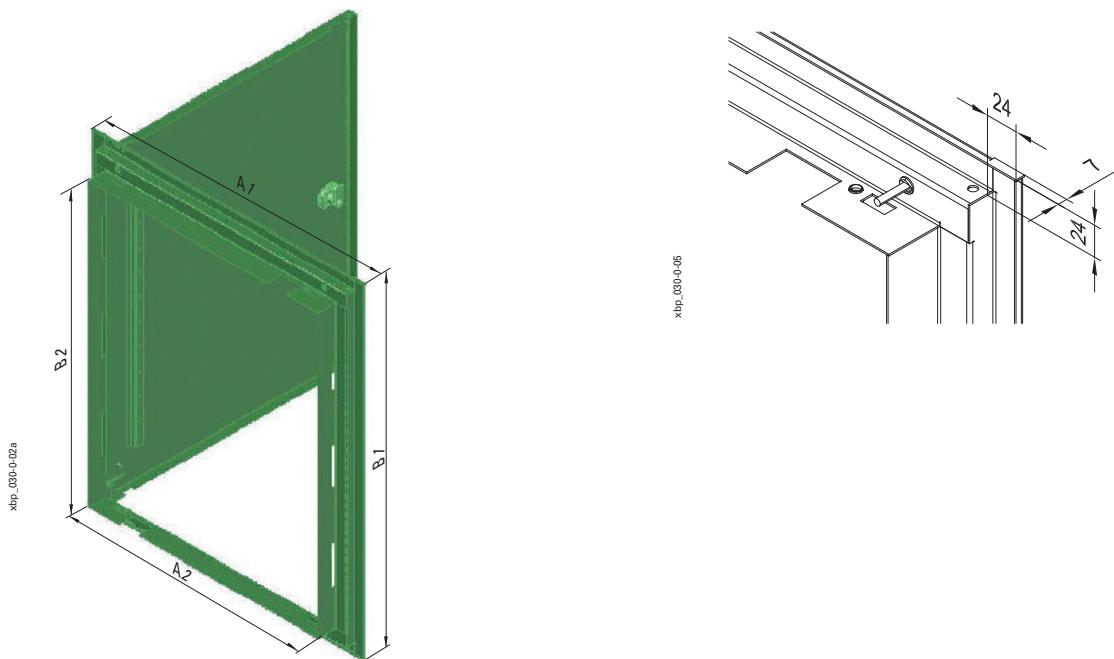

- Rear wall for wall box BPZ-WB3S
- Material: sheet steel, zinc-coated, thickness 1 mm, plastic
- Mounting by means of self-sealing tape
- Scope of delivery: 1 rear panel
- Attention: sheet steel rear wall must be connected through screws into the earthing concept!

## 3-Step Flush-Mounting Door Frame, with Door, BP.-U-3S...

- IP30 ... BP-U-3S
- IP43 ... BPA-U-3S, with foamed sealing and rain bar for outdoor application
- IP54 ... BPM-U-3S, with foamed sealing for moisture-proof application
- Material: Sheet steel, powder-coated, RAL 7035 or RAL 9016  
Aluminium, powder-coated, RAL 7035
- Scope of delivery: Frame, door with hinges
- Attention: Inserting the Flush-Mounting Door Frame BPA-U-3S (IP43) or BPM-U-3S (IP54) in the Wall Box BPZ-WB3S, the facility builder has to ensure waterproofing against the wall covering substrate.

<sup>1)</sup> Number of hinge cut-outs for rotary handles. doors with clip down handle also available.

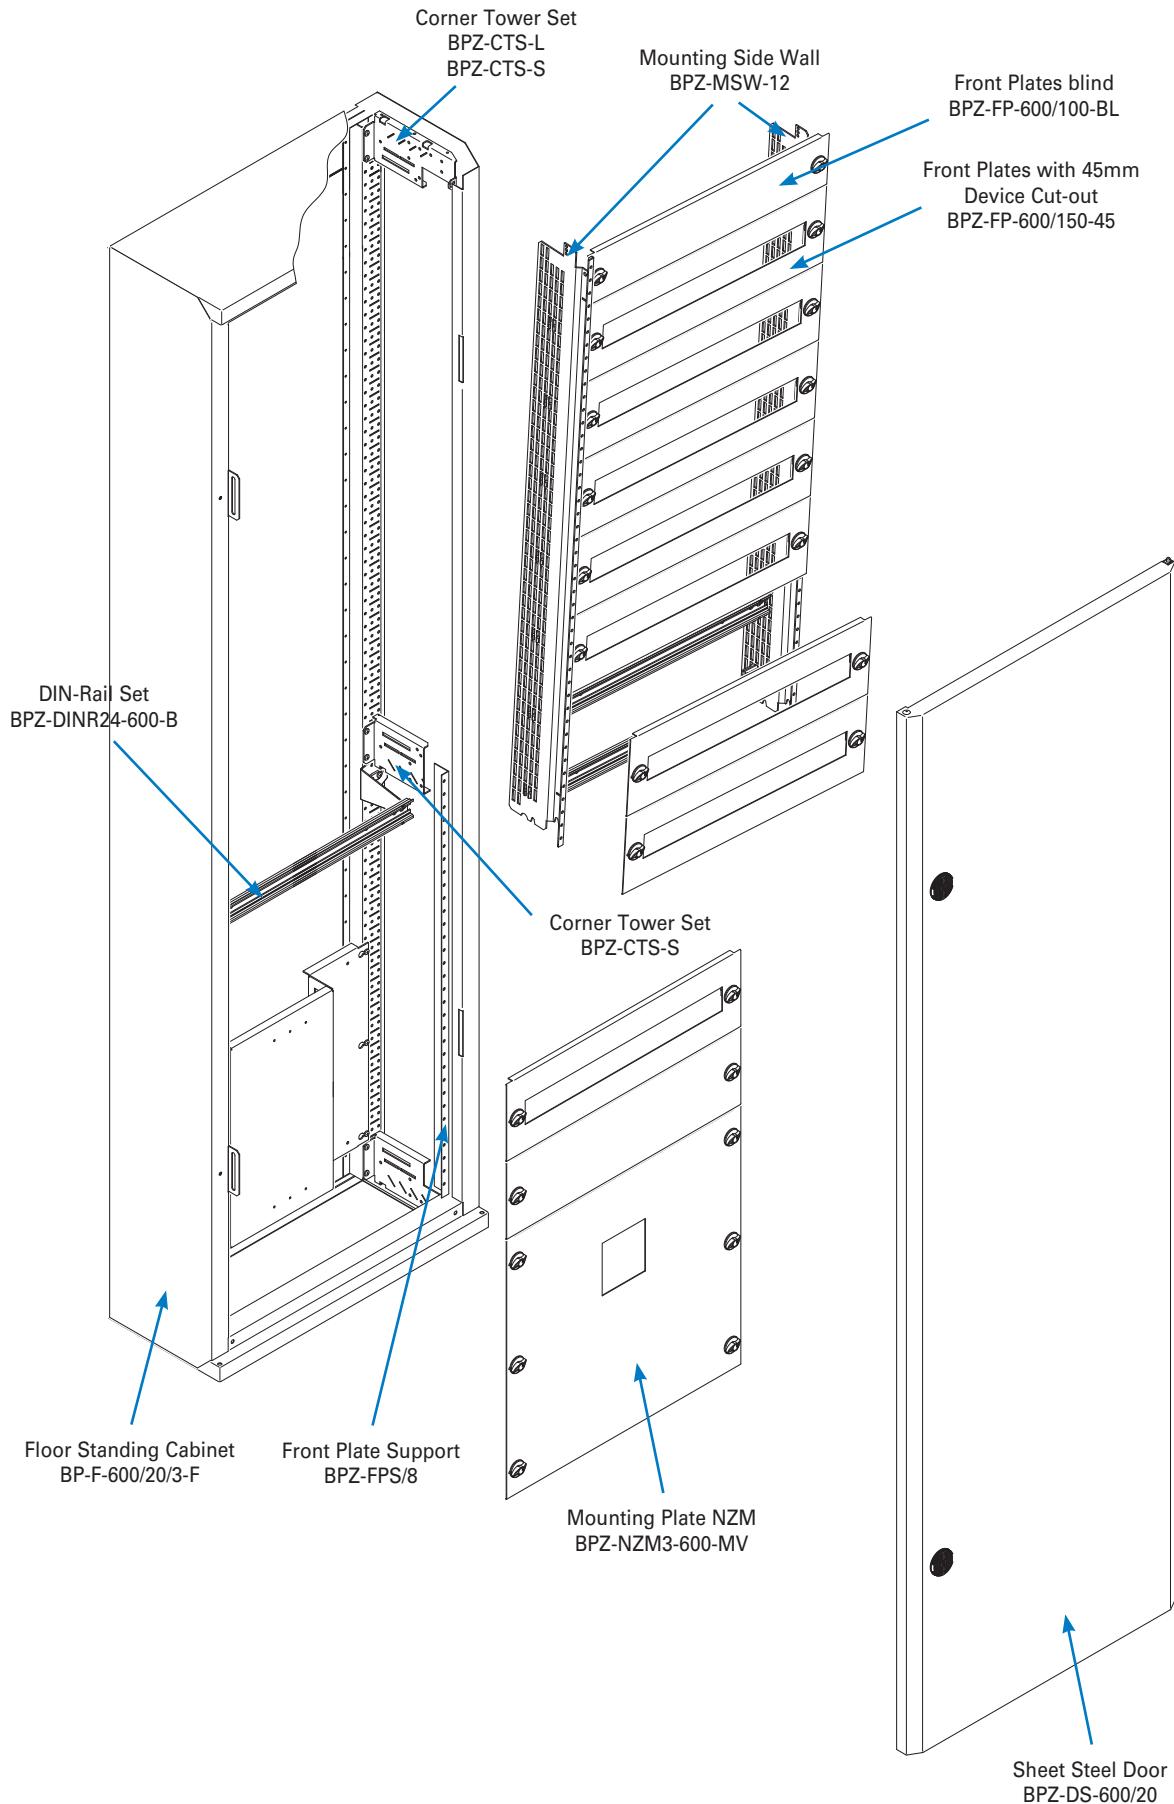

<sup>2)</sup> Number of locks for the right door. Left door contains two rotary handles in all dimensions.

## Separation Frame Set, BPZ-USF

- Only for flush-mounting boards with a width of 1000 and 1200 mm
- Only with MSW application
- For separate a 1000 or 1200 mm board in a 600/400 or 600/600 section
- Material: Sheet steel, powder-coated grey (RAL 7035) and white (RAL 9016)
- Scope of delivery: 1 Segregation Frame and fixing material

## Floor-Standing Distribution Board BP-F....

### System Overview

## Floor-Standing Distribution Boards, BP-F...

- Grounded metal covers
- Excellent stability thanks to the welded construction
- Generous wiring space
- Variable interior layout with/without removable mounting frame
- Structured, multilayer construction for easy accessible installation: base frame - DIN-rails ... - enclosure
- Reversible door hinging

### Technical Data

#### Electrical

Design according to	IEC/EN 61439-1/3, IEC/EN 62208				
Protection class	I				
Degree of protection	IP30				
Rated voltage	415 VAC / 50Hz				
Rated current	630 A depending on the busbar support system				
Earth connections					
Base frame	M8 welding bolt				
Door	M6 welding bolt				

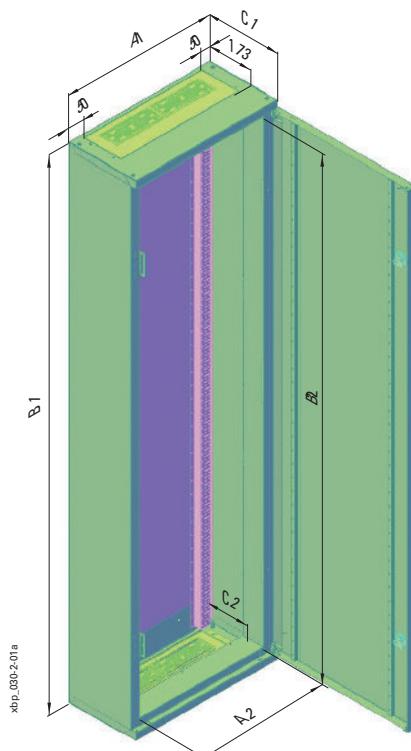

Max. power loss (W) for all devices in the dist. board at 35° C ambient temperature:

Height / Width (mm)	400	600	800	1000	1200
1760	179	258	347	420	478
2060	220	305	320	448	519

#### Mechanical

Material	Sheet steel
Paint coat	Phosphatised and polyester-powder-coated
Colour	Grey RAL 7035, white RAL 9016
Door	Doors with covered hinges, can be unhinged at an angle of more than 90° Opening angle: 167° (ca. 100° in case of several distribution boards mounted next to each other)
Door lock	Hinged handle with rotary lock; cylinder lock; 3-point lock with clip down handle
Cable entry	Different covers permit cable entry from below and/or above
Shock resistant	IK08

### Dimensions (mm)

Type	Outside dimensions			Inside dimensions			Pv W	Number of locks <sup>1)</sup>
	Width A1	Height B1	Depth C1 without door / with door	Width A2	Height B2	Depth C2

BP-F-1000/20/4	1000	2060	386,5 / 400	920	1950	255	556	2 <sup>2)</sup>
BP-F-1200/20/4	1200	2060	386,5 / 400	1120	1950	255	624	2 <sup>2)</sup>

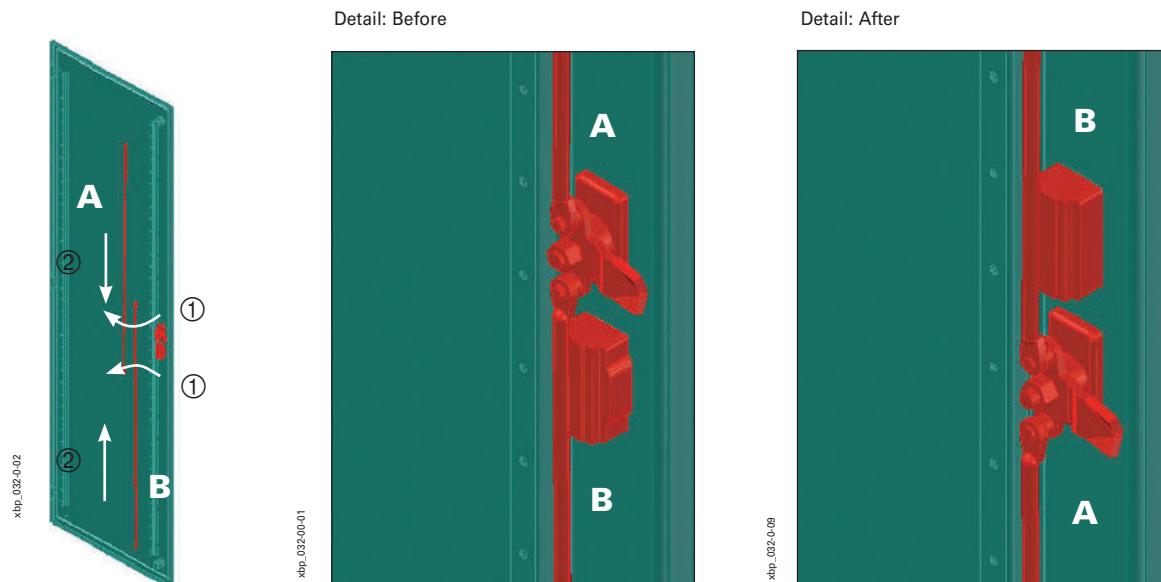

\* no assembly spar (only MSW construction)

<sup>1)</sup> Number of hinge cut-outs for rotary handles. doors with clip down handle also available.

<sup>2)</sup> Number of locks for the right door. Left door contains two rotary handles in all dimensions.

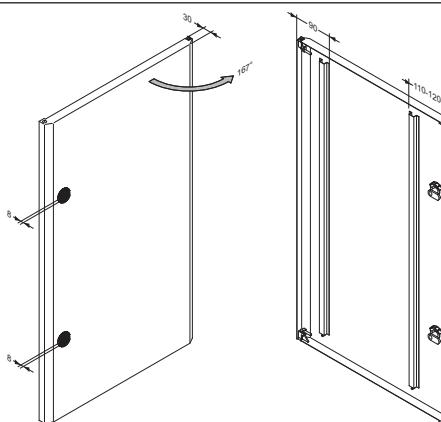

## Change of clip down handle for change of direction of opening of door

1. Demounting of rods – removing from lock mechanism
2. Demounting of rods – taking out from fastening lugs

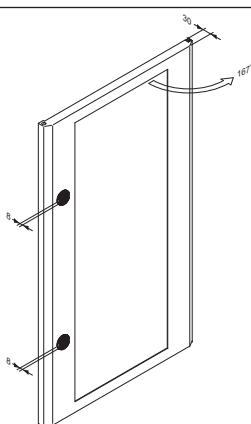

## Sheet Steel Doors, BPZ-DS

- Front-mounted
  - Quick mounting and removing of the door
  - Right or left hinged
  - Opening angle 167°
  - 1-point lock through rotary lock, 3-point lock through clip-down handle
  - Material: Sheet steel, powder-coated, RAL 7035 or RAL 9016
  - Weight (kg):
- | Width (mm)  | 400 | 600  | 800  | 600+400  | 600+600   |
|-------------|-----|------|------|----------|-----------|
| Height 1700 | 6,2 | 9    | 11,8 | 9+6,5    | 9+9,1     |
| Height 2000 | 7,3 | 10,6 | 13,8 | 10,6+7,7 | 10,6+10,6 |
- Scope of delivery: 1 Door

## Transparent Doors (Sheet Steel), BPZ-DT

- Front-mounted
  - Quick mounting and removing of the door
  - Right or left hinged
  - Opening angle 167°
  - 1-point lock through rotary lock, 3-point lock through clip-down handle
  - Material: Sheet steel, powder-coated, RAL 7035 or RAL 9016,
  - 4mm tempered safety glass according to EN 12150-1 or DIN 1249
  - Weight (kg):
- | Width (mm)  | 400 | 600  | 800  | 600+400   | 600+600   |
|-------------|-----|------|------|-----------|-----------|
| Height 1700 | 8,1 | 13,3 | 16   | 13,3+10,9 | 13,3+16,9 |
| Height 2000 | 9,4 | 15,6 | 18,6 | 15,6+12,7 | 15,6+19,8 |
- Scope of delivery: 1 Door

## Floor-Standing Distribution Boards, BPM-F-...

- Grounded metal covers
- Excellent stability thanks to the welded construction
- Generous wiring space
- Variable interior layout with/without removable mounting frame
- Structured, multilayer construction for easy accessible installation: base frame - DIN-rails ... - enclosure
- Reversible door hinging

### Technical Data

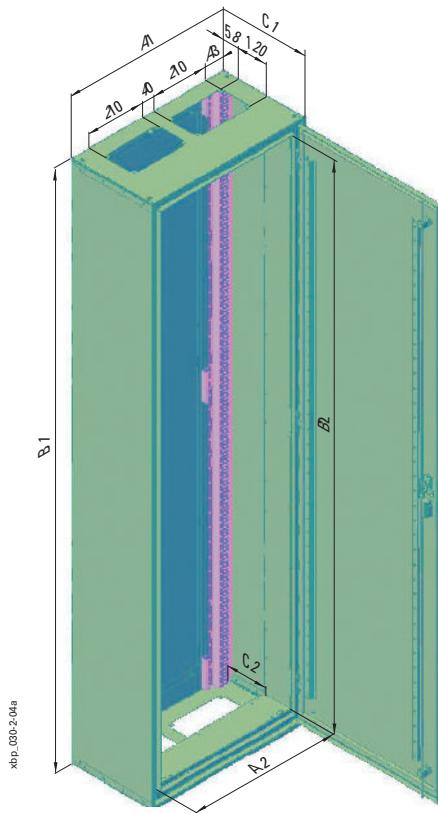

#### Electrical

Design according to	IEC/EN 61439-1/3, IEC/EN 62208				
Protection class	I				
Degree of protection	IP54				
Rated voltage	415 VAC / 50Hz				
Rated current	630 A depending on the busbar support system

<sup>1)</sup> Number of hinge cut-outs for rotary handles. doors with clip down handle also available.

<sup>2)</sup> Number of locks for the right door. Left door contains two rotary handles in all dimensions.

<sup>3)</sup> Number of cut outs for F3A flanges on top/on bottom.

## Possible variants of inside configuration of BP(M)-F

- Installation of inside equipment is identical for both versions BP-F with IP30 and BPM-F with IP54
- 1. Installation of mounting plates BPZ-MPL and mounting sets (e.g. BPZ-NZM) directly onto rear frame.** Frontplates can be equipped by means of supports BPZ-FPS.
- 2. Simultaneous installation of mounting plates BPZ-MPL or mounting sets (e.g. BPZ-NZM) and device rails directly onto rear frame.** Device rails can be fitted either with towers BPZ-TF/2 (set with rail BPZ-DINR13---B) for standard depth or directly onto rear frame for maximum depth. The other depths between these two utmost ones can be reached with towers BPZ-TA/2 (set with rail BPZ-DINR13---T). For this tower, the device rail is fitted by means of fastening elements BEL.
- 3. Example of mounting of frontplates by means of support BPZ-FPS.**
- 4. Application of mounting side walls BPZ-MSW.** Device rails are mounted onto BPZ-MSW by means of fastening elements BEL. Mounting plates and device rails can be fitted directly onto rear frame, as well. Front plates are fastened onto side walls BPZ-MSW for whole board height. Installation of the mounting frame BPZ-MSW is the same as for surface mounting board, i.e. by means of corner towers BPZ-CTS-L. Corner towers BPZ-CTS-L are not in scope of delivery of the board itself.
- 5. Application of mounting side walls BPZ-MSW for partial height of the board.** Suitable e.g. for combination of input power section and installation section in a single board. Short side walls BPZ-MSW are mounted by means of towers BPZ-CTS-L in the corners and towers BPZ-CTS-S in the middle of the board. The towers are not in a scope of delivery of the board. Frontplates are mounted onto BPZ-MSW in the installation section. If the frontplates are asked also for power section, support BPZ-FPS with appropriate length is used for their fixing.
- 6. Application of mounting side walls BPZ-MSW for more sections.** Suitable e.g. for easier mounting of heavy equipment, for splitting up into heavy current and weak current section etc. It is necessary to pay attention to correct position of the tower BPZ-CTS-S (the cutout has to be located at the opposite side to BPZ-MSW).

## Front cover for base, BPZ-FS-..

- Height: 100 mm or 200 mm
- Material: Sheet steel, powder-coated, RAL 7035 and RAL 9016
- Scope of delivery: 1 Front cover, fixing material

## Side cover for base, BPZ-SS-..

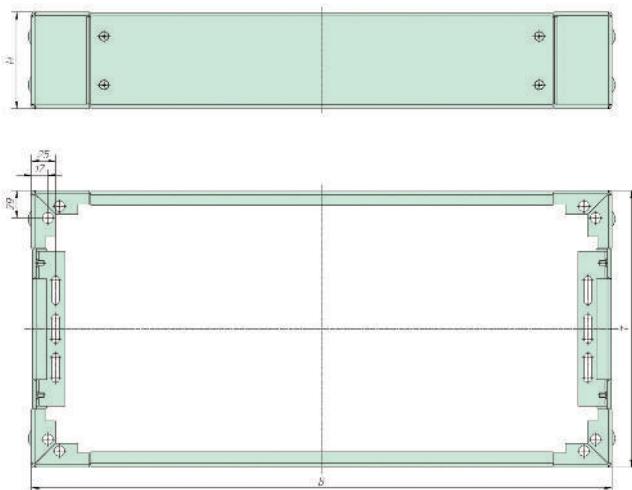

- Height: 100 mm or 200 mm
- Material: Sheet steel, powder-coated, RAL 7035 and RAL 9016
- Scope of delivery: 2 Side covers, fixing material

## Cable Interconnect Frame, BPZ-KR...

- Height: 100mm or 200mm
- Material: Sheet steel, powder-coated, RAL 7035 or RAL 9016 (BPZ-KR...300-W)
- Scope of delivery: 1 Cable interconnect frame including fixing material without cable strain-relief rail
- Dimensions (mm):

## Cable Strain-Relief Rail, BPZ-KFS

- Material: Sheet steel, galvanized
- C-Profile 16 mm, for hammerfoot yoke clamps
- Scope of delivery: 1 Cable strain-relief rail incl. fixing material
- Dimensions (mm):

Type	B
BPZ-KFS400	370
BPZ-KFS600	570
BPZ-KFS830	800
BPZ-KFS1200	1170

---

## Vertical Division in a Surface-Mounted Installation DB as of 800 mm width, IP30 and IP54

- The interior layout can be divided into different sub-divisional widths by using vertical profiles
- Not suitable for a layout including a mounting side-panel (BPZ-MSW)
- In addition, there is also a possibility to use partitions between these individual compartments
- Vertical division in a wall-mounted distribution board is possible as of a width of 800 mm, in a floor-standing distribution board of a width of 1000 or 1200 mm only

---

## Fixing Profile for Divided Set-up in a Wall-mounted Distribution Board, BPZ-SFB

- This profile can directly be fixed at the frame and serves as an element for fixing the other setup posts at the rear
- When used in an IP30 enclosure, the bar must be shortened on both ends
- Material: Sheet steel (2 mm), galvanized
- Scope of delivery: 2 Fixing profiles (for top and bottom), fixing accessories

---

## Set for Divided Setup, BPZ-SF

- For setting up the divided sections required in the enclosure
- Set consisting of setup posts (rear-mounted) and cover frame (front-mounted)
- An overview of all layout types possible is provided on the next page
- Material
  - Setup posts: Sheet steel (1.5 mm), galvanized
  - Front cover: Sheet steel (1 mm), powder-coated, RAL 7035
- Scope of delivery: Depending on the type with either 1 or 2 setup posts, 1 cover frame, fixing accessories

---

## Sheet-Steel Door as a Front Cover for the 200 mm Compartment in a Divided Setup, BPZ-CD-200/..

- To protect the 200 mm compartment from unauthorized access
- The door is right-hinged, pivoting and removable when necessary
- Metal door to make contact with the enclosure
- Material: Sheet steel (1.5 mm), powder-coated, RAL 7035
- Scope of delivery: 1 Door incl. mounting frame, fixing accessories

---

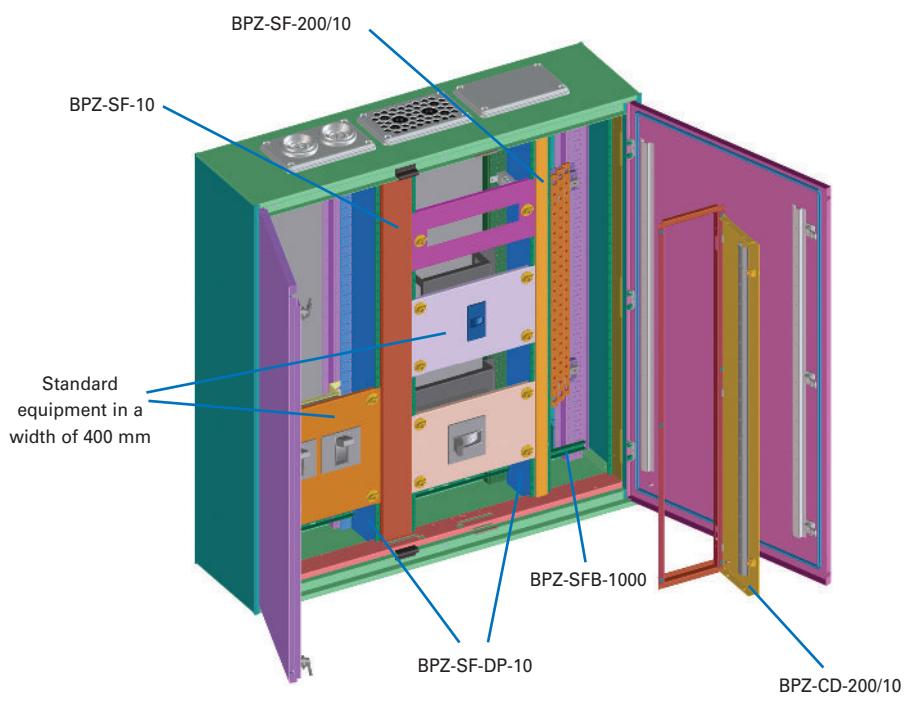

## Partition for Divided Setup, BPZ-SF-DP-..

- For vertical partition between 2 sub-sections within one enclosure
- To be mounted on the rear setup posts
- Material: Sheet steel (1.5 mm), galvanized
- Scope of delivery: 1 Partition, mounting accessories

## Possible Variants for Vertical Division in a Surface-Mounted Installation Distribution Board IP30 and IP54

Type / Enclosure width [mm]	Compartment width [mm]					Parts required depending on division of the enclosure		
	1000	800	600	400	200	Fixing profile	BPZ-SF	BPZ-SF-200

\*) See example of application

## Set for Internal Cable Area available as a Complete Kit, BPZ-ICD-..

- Suitable for wall-mounted (height 15) and floor-standing enclosures, each of them can be realised in a width of 800 and 1000 mm
- The cable area can either be mounted on the left or on the right side of the enclosure
- The door is right-hinged and pivoting, removable when necessary
- The metal door makes contact with the enclosure
- The plastic cover serves as an additional protection when the door to the cable area is open
- Material
  - Fixing profiles: Sheet steel (2 mm), galvanized
  - Setup post: Sheet steel (1.5 mm), galvanized
  - Contact surface for front plate: Sheet steel (1.5 mm), galvanized
  - Door/frame: Sheet steel (1.5 mm), powder-coated, RAL 7035
  - Plastic cover: 2 mm PVC, transparent
- Scope of delivery: 2 Fixing profiles (for top and bottom), 1 setup post, 1 contact surface for front plate, 1 door incl. mounting frame, 1 plastic cover, mounting accessories

Example of application (floor-standing enclosure IP54 in a width of 800 mm incl. cable area of 200 mm)

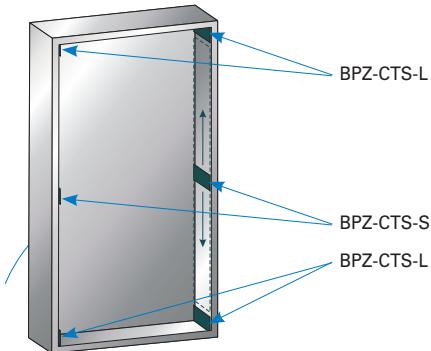

## Front Plate Support, BPZ-FPS

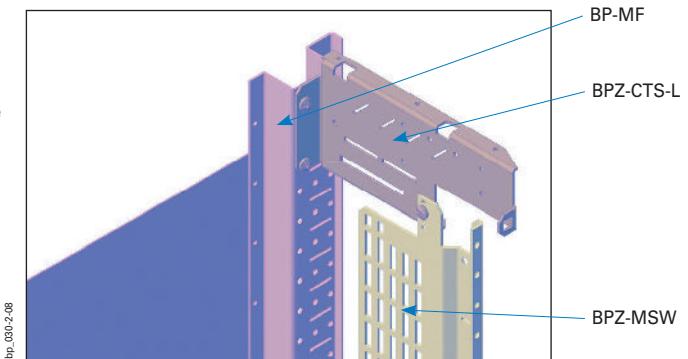

- For fixing the front plates
- Mounting of front plates without using BPZ-MSW
- Enables combination of an installation section with and without MSW in one board
- For mounting of floor standing distribution boards flexible assembly BP-F...F
- Material: 2mm sheet steel, galvanized
- Scope of delivery: 1 Pair of front plate supports, fixing material

## Corner tower set, BPZ-CTS

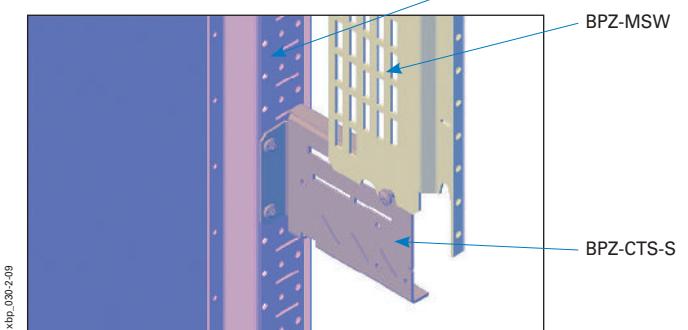

- Mounted directly on the system perforation pattern of the base frame BP-MF
- For fixing the terminal support bar BPZ-TSB
- For fixing the mounting side walls BPZ-MSW
- If towers BPZ-CTS-S are mounted for short side walls BPZ-MSW, it is necessary to pay attention to correct orientation of the towers. The square cutout in tower bend has to be on the other side to BPZ-MSW.
- Scope of delivery: 1 pair of towers (for left and right side), fixing material
- Mounting position:

Detail

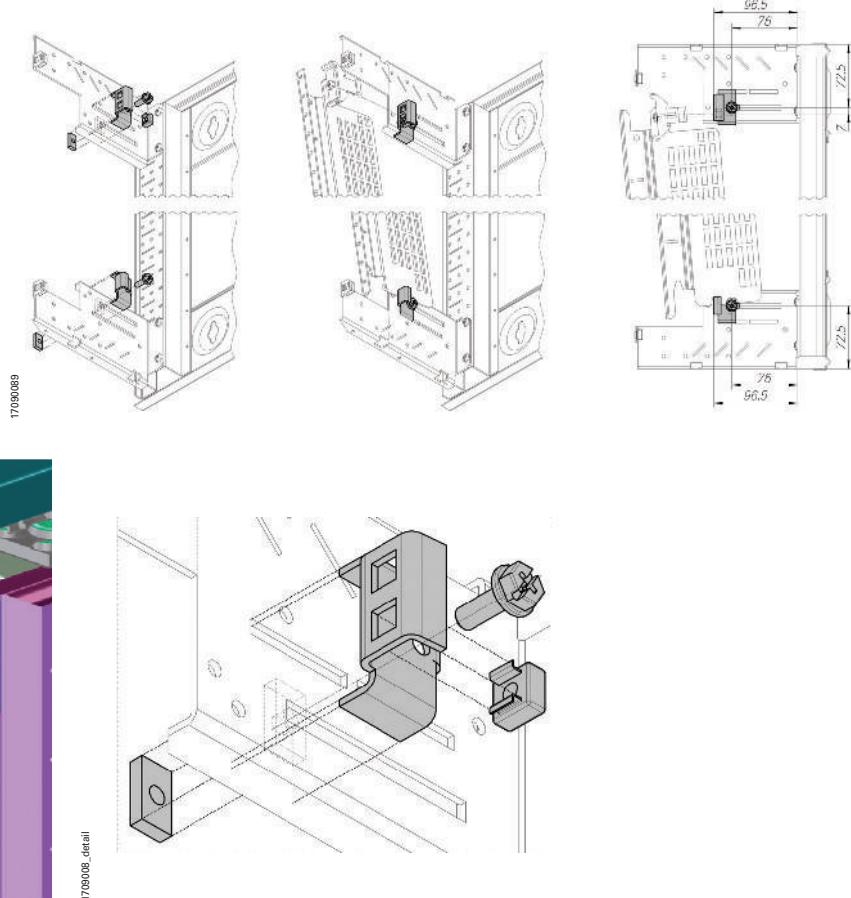

Detail

## Set, BPZ-SNAP-MSW-CTS

- Designed for comfort inserting and fixing BPZ-MSW with use BPZ-SNAP to board
- Used for surface mounted boards BP-O, BPM-O and floor-standing boards BP-F, BPM-F
- Set contains top and bottom parts

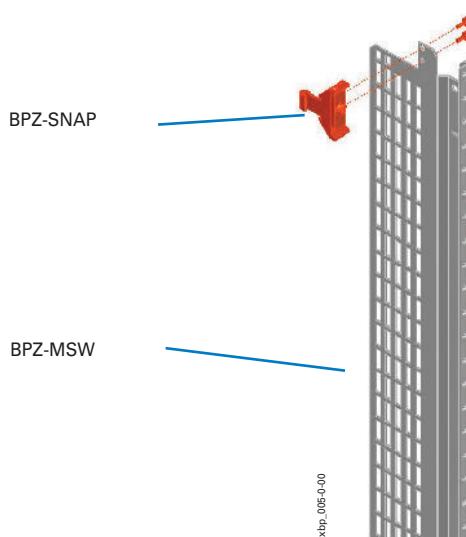

## Mounting side walls, BPZ-MSW

- Designed for comfort inserting and fixing BPZ-MSW with use BPZ-SNAP to board
- Mounting side walls for flush mounting boards
- Can be used also for surface mounting or floor standing boards for comfortable mounting of installation devices
- Enables mounting of inside equipment including electrical connection outside the board
- Material:  
Sheet steel, zinc-coated
- Scope of delivery: 2 mounting side walls

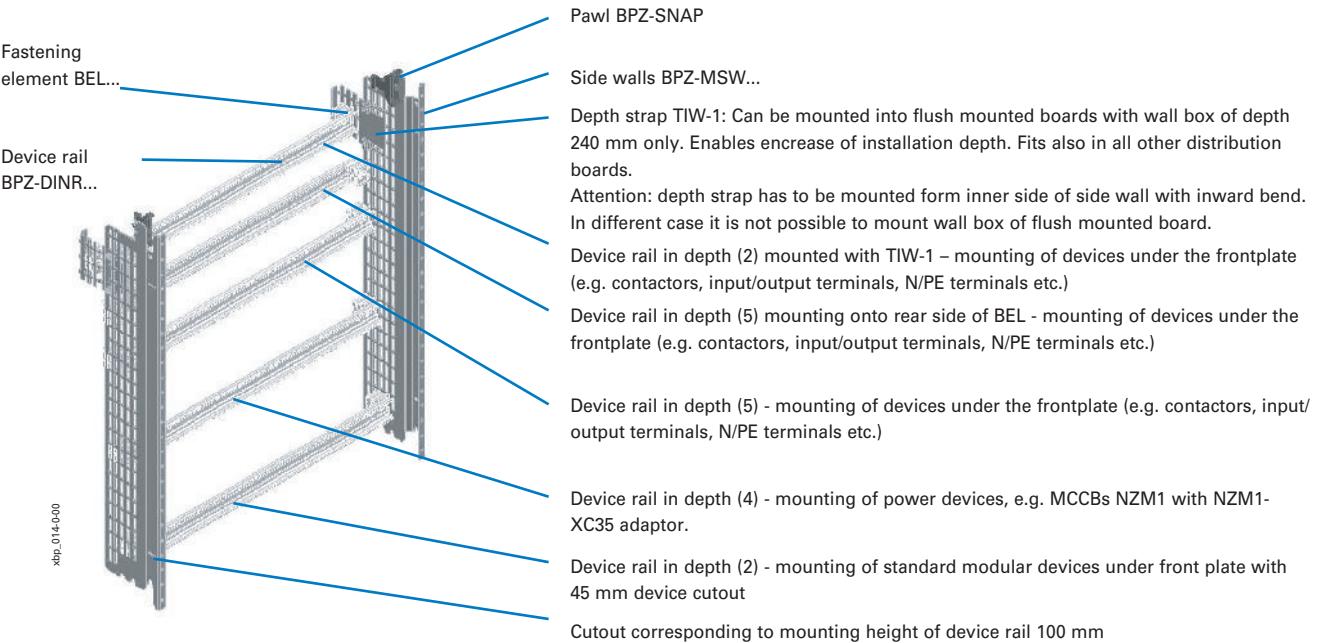

## Auxiliary pawl, BPZ-SNAP

- Necessary for mounting of the BPZ-MSW frame into flush mounting boards
- Scope of delivery: 2 pawls

## Applications of mounting frame, BPZ-MSW

### Applications of device rails

## Door Support bar, BPZ-TP

- For strengthen the door
- Support assembly units in the door in combination with C-Profil rail BPZ-CP-TP1,2
- Material:  
Sheet steel (1 mm), powder coated RAL 7035

## Separation horizontal, BPZ-AS

- Only for MSW application
- For creating a horizontal section within the board
- Metal base frame with plastic insert

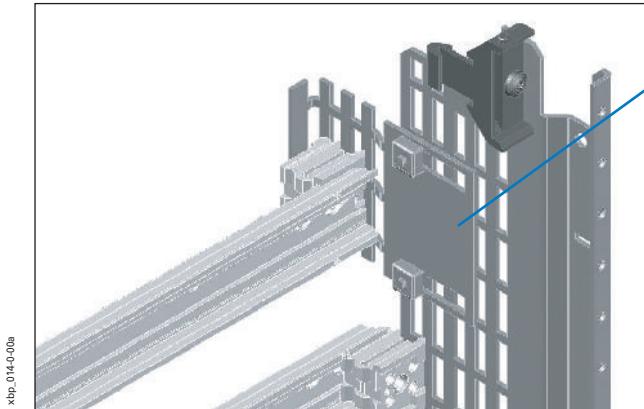

## Separation, BPZ-ASMF

- Mounted on main frame
- For creating a horizontal section within the board
- Mounted horizontal with knock-outs

## Depth Straps, TIW

- For assembling of mounting plates deeper than it is possible with BPZ-MSW itself

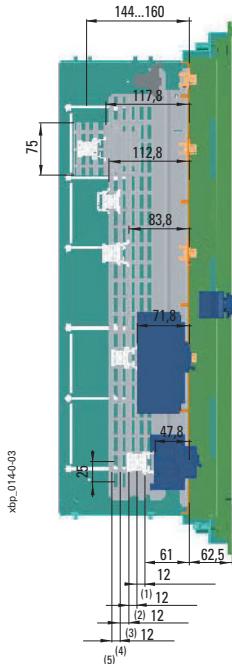

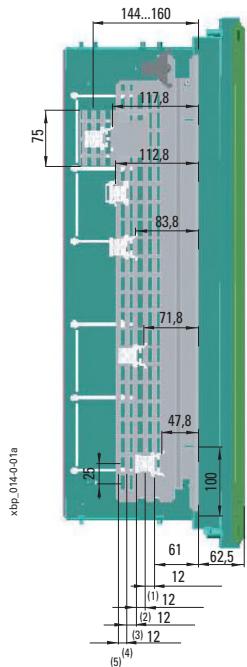

### Detail of assembly of TIW-1

Depth strap TIW-1: Can be mounted into flush mounted boards with wall box of depth 240 mm only.

Attention: depth strap has to be mounted form inner side of side wall with inward bend. In different case it is not possible to mount wall box of flush mounted board.

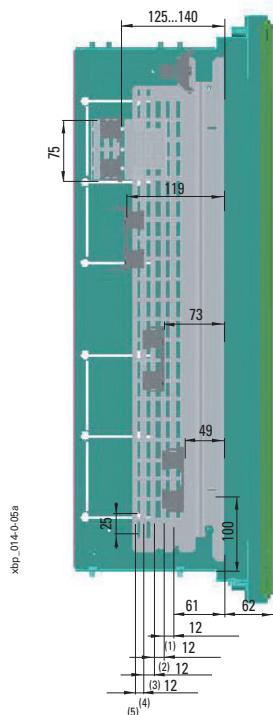

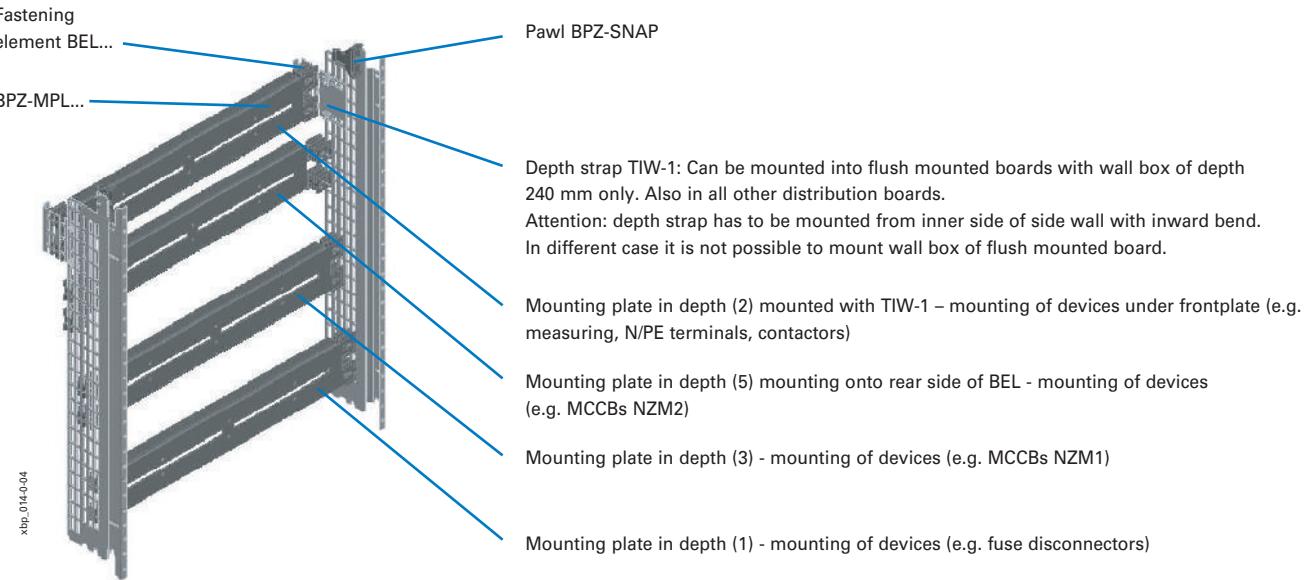

For surface mounted boards, floor standing boards, the depth strap TIW-1 can be in initial position only.

# Distribution Boards

xEnergy  
Basic

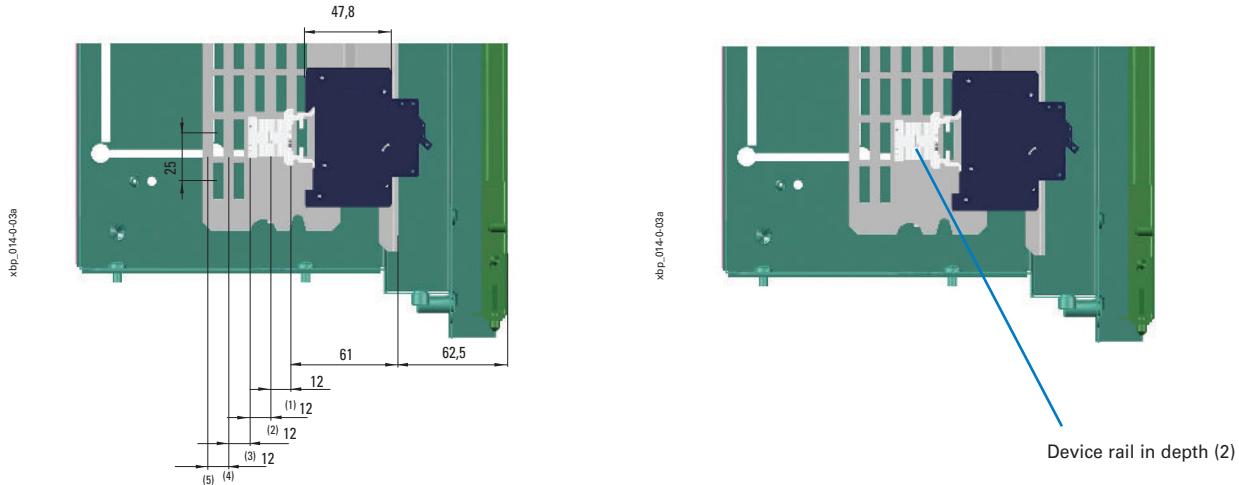

## Applications of mounting plates

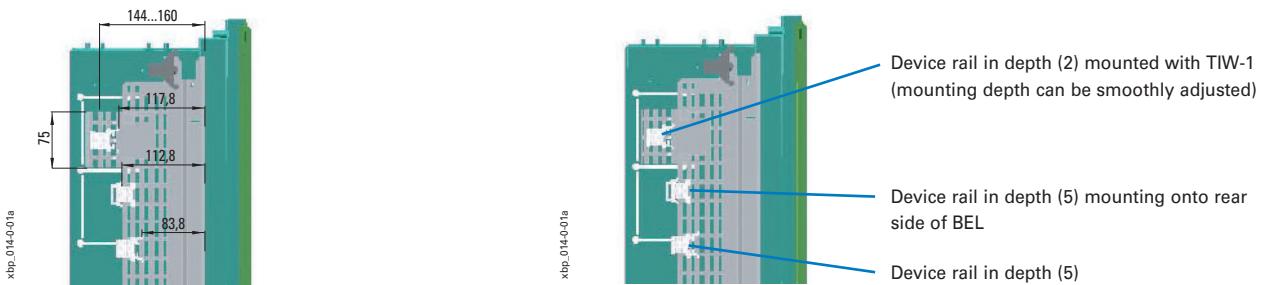

# Distribution Boards

xEnergy  
Basic

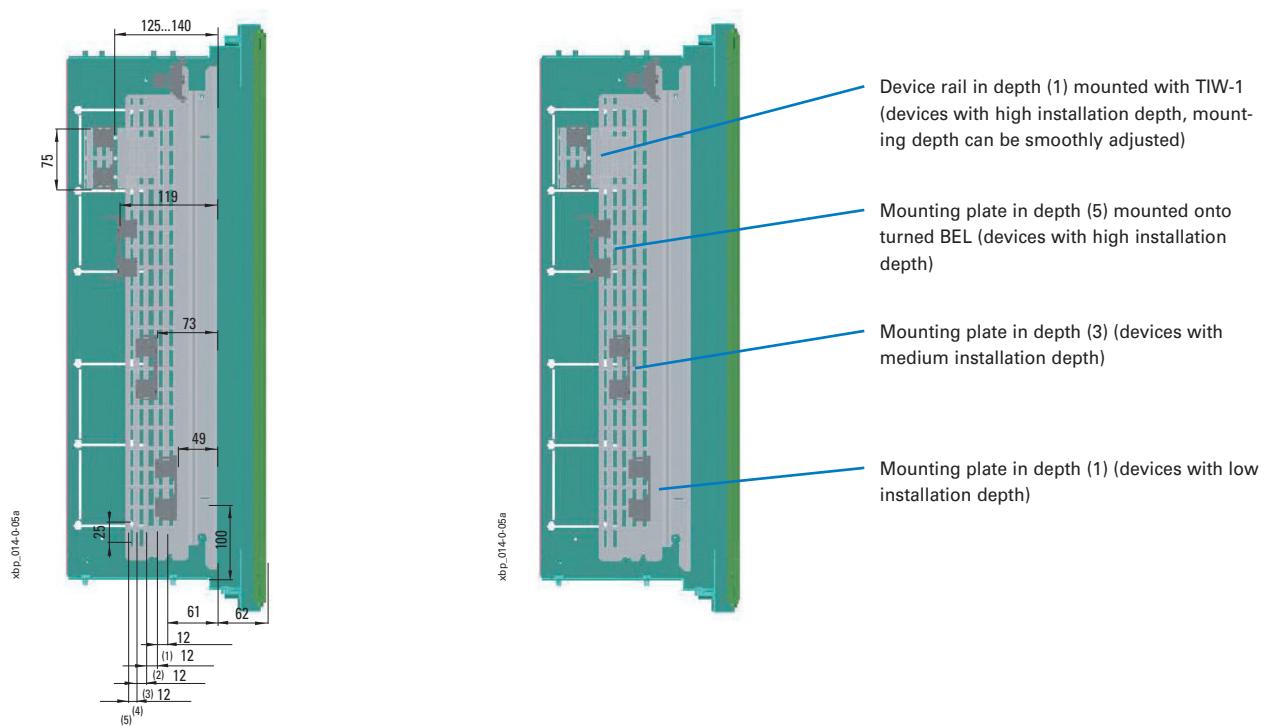

## Mounting of devices with a possibility of controlling

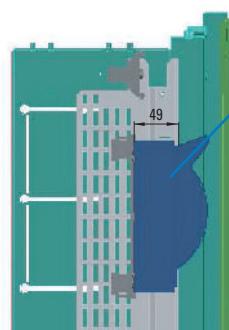

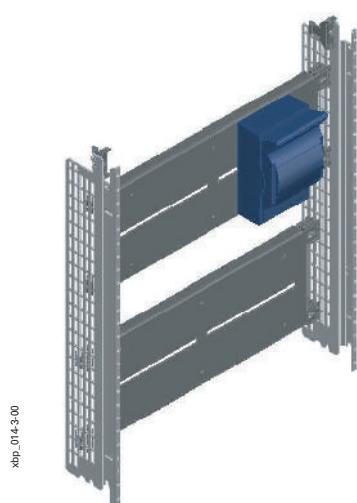

## Mounting of devices under frontplate (e.g. contactors without a possibility of manual controlling)

## Mounting of devices onto mounting plate

## Mounting of fuse disconnectors LTS

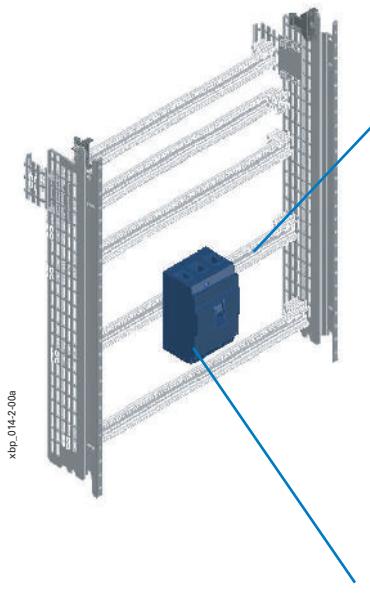

Fuse disconnector size 00:  
Mounting plate BPZ-MPL180-...  
in depth (1) (mounting depth  
49 mm)

Fuse disconnector size 1:  
Mounting plate BPZ-MPL350-...  
in depth (3) (mounting depth  
73 mm)

Fuse disconnector size 2:  
Mounting plate BPZ-MPL350-...  
in depth (4) (mounting depth  
85 mm)

## Mounting of moulded case circuit breakers NZM1

- Mounting sets BPZ-NZM...-MSW are recommended for mounting of single breakers NZM1 and NZM2 into flush mounting boards

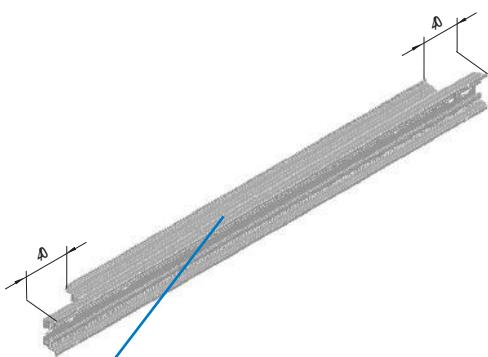

Mounting onto device rail in depth (4) (the breaker  
is fastened with adaptor NZM1-XC35).

It is necessary to pay attention to mechanical  
load of device rail – dangerous of twisting if more  
MCCBs are installed.  
In this case it is recommended to use reinforce-  
ment by means of another device rail (mounted  
behind the first one, the rear second rail has to be  
shortened appropriately).

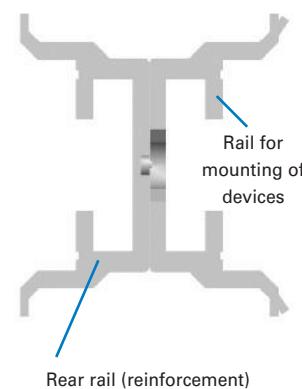

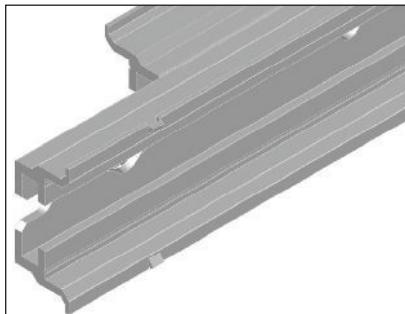

To cover, a front plate BPZ-FP-...-45 with 45 mm  
cutout can be used.

## Reinforcement of the device rail

Reinforcement by means of connecting of two  
rails (back side to back side). The rear rail has to  
be shortened by about 40 mm at both sides. For  
connecting, the pre-drilled holes can be used.

## Mounting sets BPZ-NZM for circuit breakers NZM

- Mounting sets BPZ-NZM... for mounting NZM1-3 circuit breakers (position of the breaker vertical or horizontal) for surface-mounted or floor-standing boards
- Material
  - Front plate: sheet steel, powder-coated, RAL 7035 or RAL 9016
  - Mounting plate: sheet steel (2 mm), zinc-coated
- Metal front plates with automatic connection to the enclosure
- Design ....RH for breakers equipped with rotary door handle, suitable only for surface-mounted or floor-standing boards
- Scope of delivery: 1 mounting plate, 1 front plate, fixing material

### Round cutout:

- identifies axis of the device module
- Identifies front plate axis for horizontal mounting

### Sharp cutout:

- identifies front plate axis for vertical mounting (position of the mounting plate is defined by the axis of the front plate)

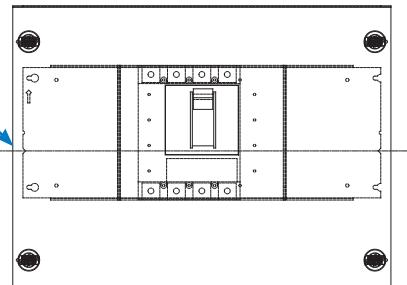

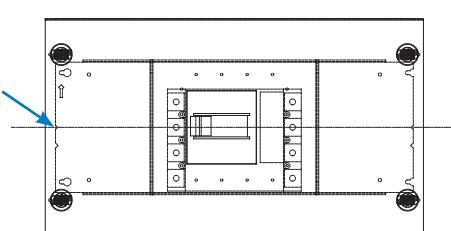

xhp\_018-0-06

Cutout defining module orientation – the arrow has to be oriented top.

Cutout identifying module axis for horizontal mounting.

Cutout identifying front plate axis for vertical mounting.

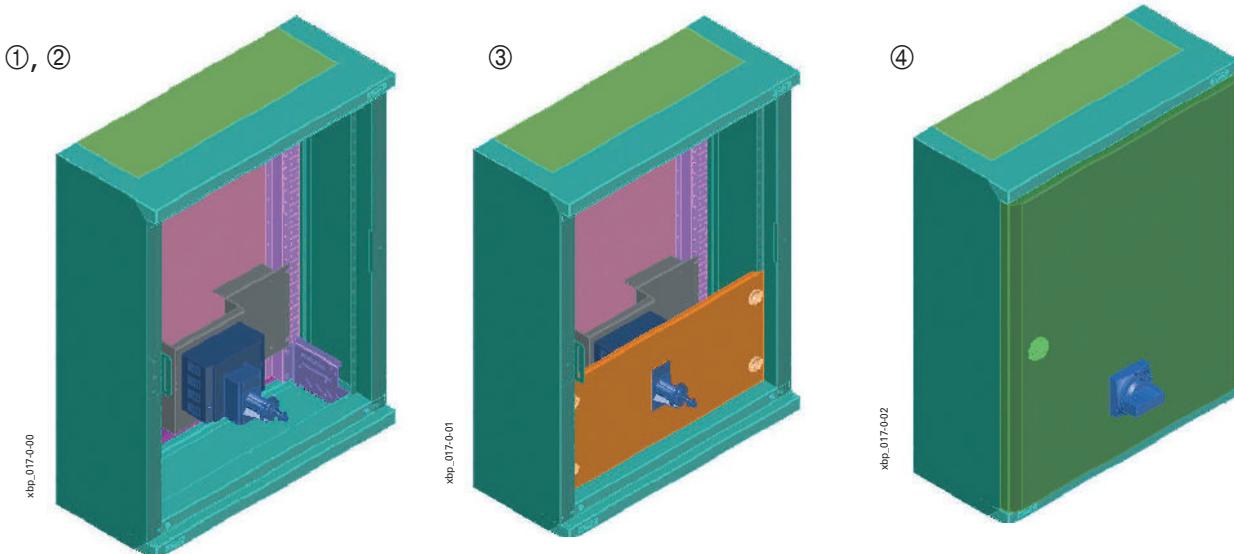

## Applications of mounting sets BPZ-NZM...-RH

- Example of utilisation in a surface-mounted board (can be used for floor-standing boards as well)

### Mounting process:

1. Fixing of a breaker onto mounting plate from the set
2. Installation of the mounting plate with the breaker into board
3. Fixing of the front plate
4. Mounting of the door coupling and rotary handle

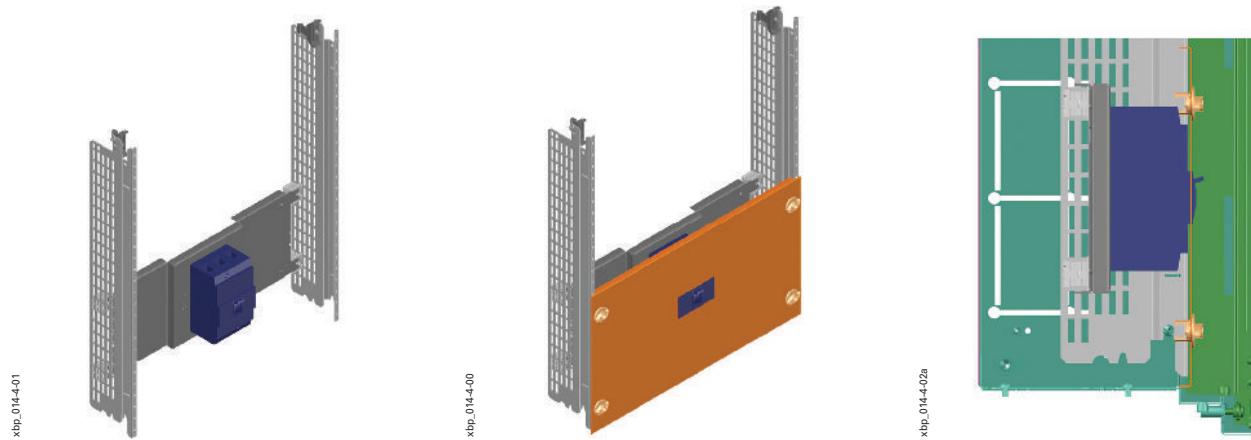

## Applications of mounting sets BPZ-NZM...-MSW

- For NZM breakers of type size 1 and 2
- Vertical or horizontal orientation of the breaker
- Mounting on to side walls BPZ-MSW by means of fastening elements BEL

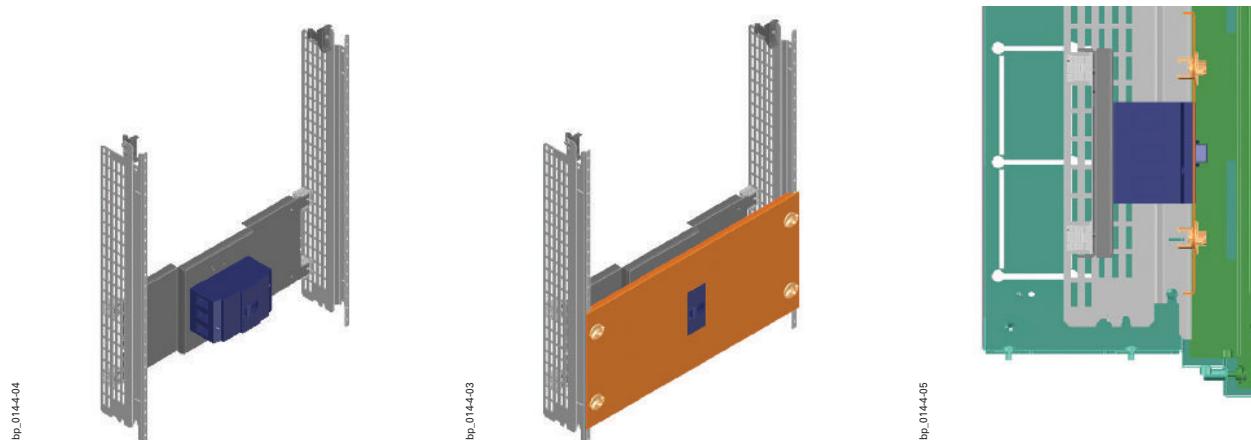

### Mounting process:

1. Fixing of a breaker onto mounting plate from the set
2. Installation of the mounting plate with the breaker into board by means of fastening elements BEL
3. Fixing of the front plate

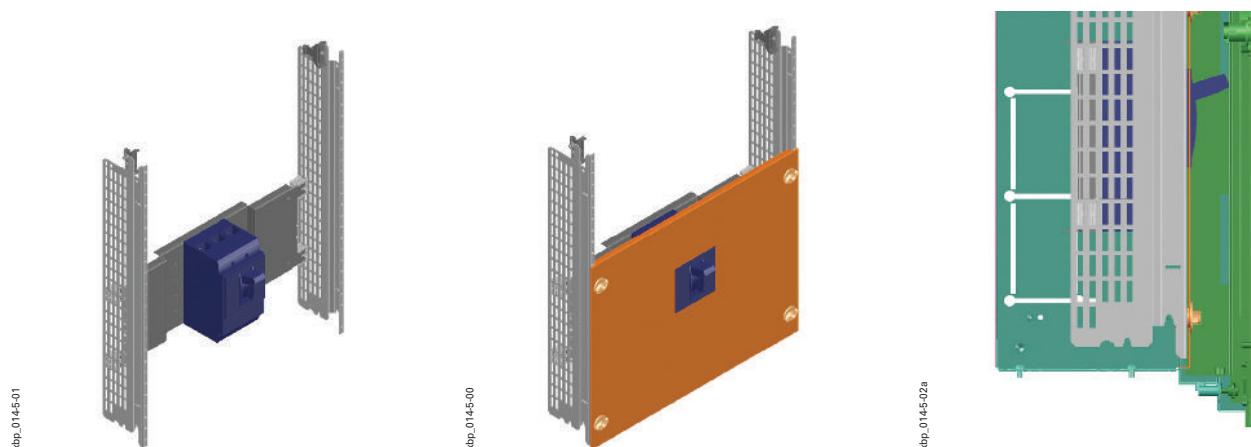

### NZM1 breaker, vertical orientation

\*) Max. number depending on availability of suitable front plates

### Placing of the mounting holes for particular type sizes of the circuit breakers ( BPZ-MPL-NZM3X-... )

- In case that circuit breakers of different type sizes are mounted onto a single mounting plate it is necessary to put spacers NZM1/2-XAB under the smaller-size breaker. The matching front plate with plastic insert BPZ-FPP have to be prepared individual (no cuttings existing).

## Basic dimensions of the circuit breakers NZM

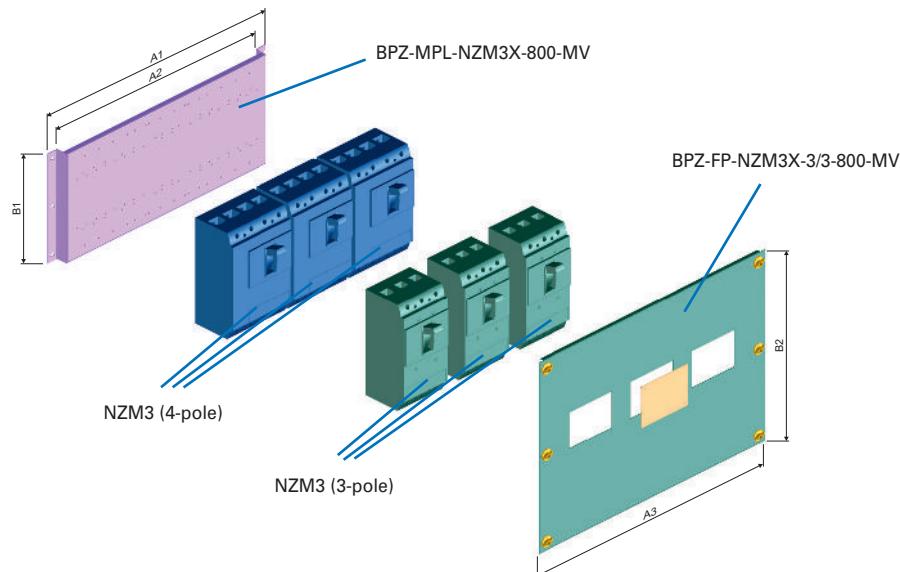

## Front Plate for Several Devices such as NZM, BPZ-FP

- To cover the areas occupied by circuit breakers
- Metal front plates making contact with the enclosure
- Material: Sheet steel, powder-coated, RAL 7035
- Scope of delivery: 1 Front plate incl. empty-space cover  
(with NZM2, NZM3 and NZM4)

### Dimensions [mm]

## Mounting Plate for NZM symmetrical, BPZ-MPL-NZM...--MX

- For mounting one NZM in horizontal position or several NZMs in vertical position
- Connecting the NZM circuit breakers can be done from the rear (cut-outs are prepared)
- Suitable for wall-mounted or floor-standing enclosures with Profi+ mounting frame
- Material: Sheet steel (2 mm), galvanized
- Scope of delivery: 1 Mounting plate, mounting accessories

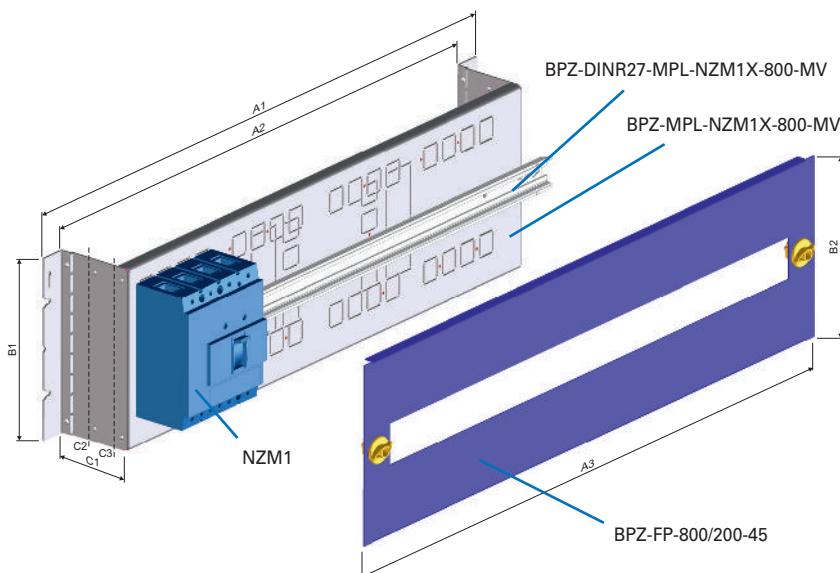

### Dimensions [mm]

Type	Max. number of 3-/4-pole NZMs	A1	A2	B1	C1
BPZ-MPL-NZM1X-600-MX	3x NZM1 / 3x NZM1	492	432	199	87

## DIN Rail for Mounting Plate NZM1 symmetrical, BPZ-DINR

- For mounting installation devices next to 1x NZM1 (vertical) on the same level
- For mounting plate 600 mm: 1x BPZ-DINR17-MPL-NZM1X-600-MV
- For mounting plate 800 mm: 1x BPZ-DINR27-MPL-NZM1X-800-MV
- Material: Aluminium
- Scope of delivery: 1 DIN rail, mounting accessories

Example of application

## Fixing Set for max. Installation Depth of the NZM symmetrical Mounting Plate, BPZ-KIT-MPL-NZMX-XDV/XMV/XR-XVTL

- For mounting an NZM circuit breaker with rotary handle (NZM.-XDV), with mechanical lock (NZM.-XMV) or remote operation (NZM.-XR...)
- Depending on the application, the fixing straps and/or the mounting plate need to be shortened accordingly
- Due to the installation depth, the set in combination with the mounting plate can only be used in XVTL distribution boards
- Material: Sheet steel (2 mm), galvanized
- Scope of delivery: 4 Fixing straps, mounting accessories

### Examples of application for the fixing set BPZ-KIT-MPL-NZMX-XDV/XMV/XR-XVTL

Application	Type of mounting plate (width = 800 mm)	Fixing set required?	Notes
NZM1 with standard toggle	BPZ-MPL-NZM1X-800-MX	NO	Mounting plate in standard depth (C1)
NZM1 with rotary handle on circuit breaker (XDV)	BPZ-MPL-NZM1X-800-MX	NO	Fix mounting plate in C2 position
NZM1 with mechanical lock (XMV)	BPZ-MPL-NZM1X-800-MX	NO	Fix mounting plate in C3 position
NZM2 with standard toggle	BPZ-MPL-NZM2X-800-MX	NO	Mounting plate in standard depth (C1)
NZM2 with rotary handle on circuit breaker (XDV)	BPZ-MPL-NZM2X-800-MX	NO	Fix mounting plate in C3 position
NZM2 with mechanical lock (XMV)	BPZ-MPL-NZM2X-800-MX	YES	Setup acc. to assembly instructions
NZM2 with remote operation (XR)	BPZ-MPL-NZM2X-800-MX	YES	Setup acc. to assembly instructions
NZM3 with standard toggle	BPZ-MPL-NZM3-800-MX	NO	Mounting plate in standard depth (C1)

Example of application

## Mounting Set for NH Fuse Disconnector Switches XNH, BPZ-XNH

- Mounting set for fixing XNH fuse disconnector switches on a mounting plate
- Sizes (rated operating current)  
XNH00 (160 A), XNH1 (250 A), XNH2 (400 A), XNH3 (630 A)
- Front panel is prepared for mounting a 3-pole device, additional perforations for multiple mounting are prepared and can be knocked out according to your requirements by means of a suitable tool
- Finger-safe finish is guaranteed even without using an additional empty-space cover

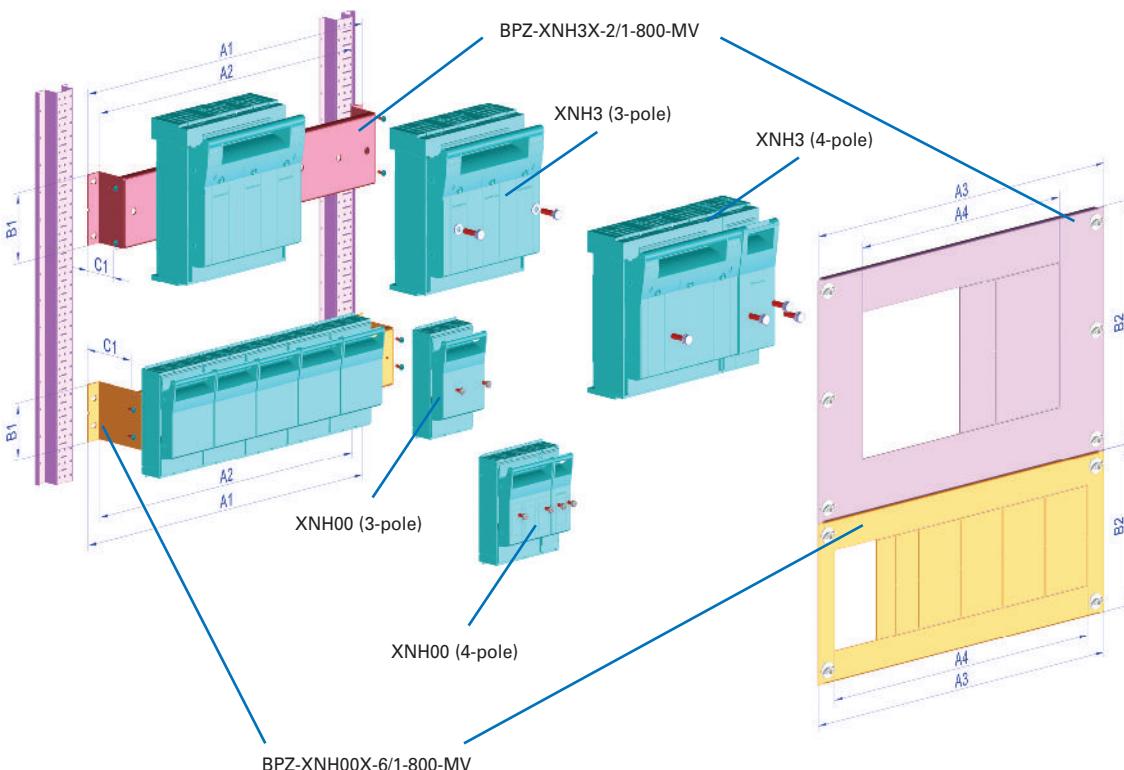

- Suitable for both wall-mounted and floor-standing cabinets with Profi+ mounting frame (no set-up on MSW mounting-side-panel possible)
- Material  
Mounting plate: Steel sheet (2 mm), galvanized  
Front panel: Steel sheet, powder-coated, RAL 7035 or RAL 9016
- Scope of delivery: 1 Mounting plate, 1 front panel, fixing material

### Dimensions [mm]

Type	Max. number of 3-/4-pole XNH	A1	A2	A3	A4	B1	B2	C1
BPZ-XNH00X-2/1-400-MV(-W)	2x XNH00 / 1x XNH00 *)	292	236	320	212	105	299	110

\*) Where necessary, it is possible to install several 4-pole devices, but the cut-out will then need to be adjusted accordingly.

### Example of application

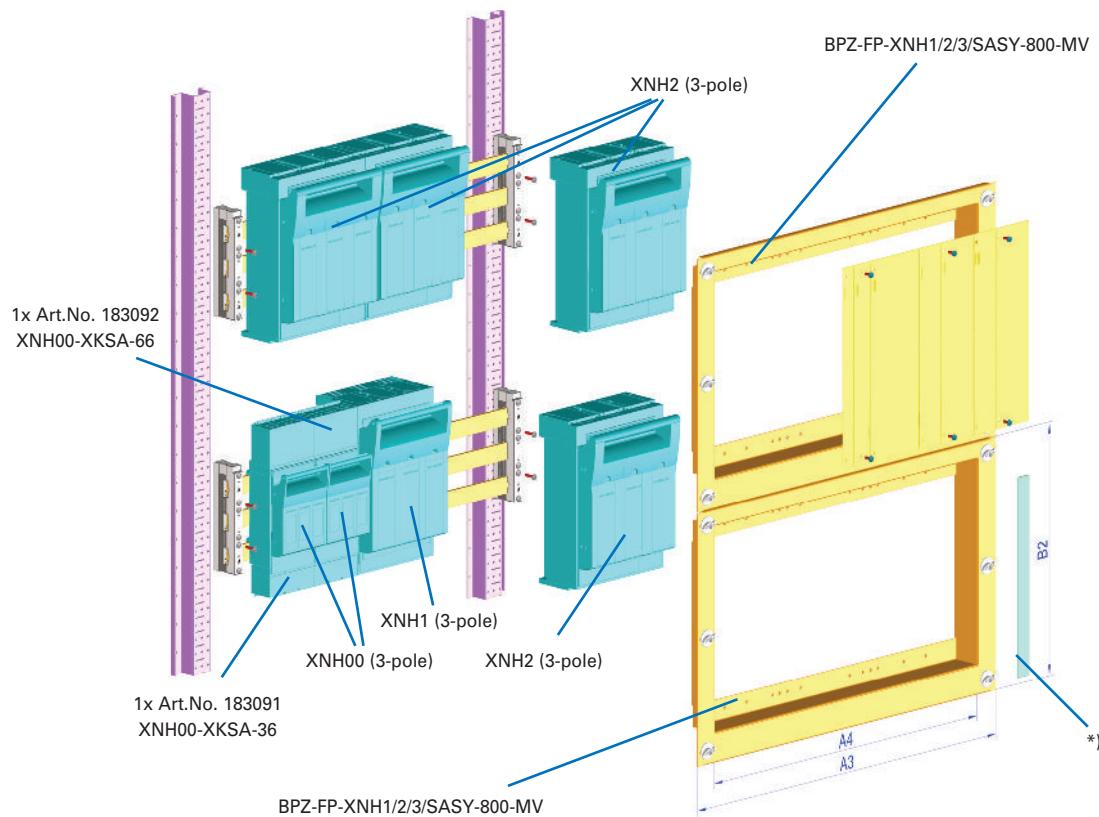

## Front Panel for NH Fuse Disconnector Switches XNH when installed on a busbar of 60 mm (SASY 60i) at the base frame

- When XNH devices are used for a 60 mm busbar system
- Sizes (rated operating current)
  - XNH1 (250 A), XNH2 (400 A), XNH3 (630 A)
  - XNH00 (160 A) – when using a cover for the connection area
  - XNH00-XKSA-36 (at the bottom) or XNH00-XKSA-66 (at the top)
- The busbar system (SASY 60i) can directly be fixed at the base frame without using any mounting brackets
- If devices of the same size (except XNH00) are installed, the empty-space cover included in the delivery complies with all requirements. It only needs to be adjusted to the number available.

### Dimensions [mm]

Type	Max. number of 3-pole XNH (same size)	Max. number of 3-pole XNH00 with cover for connection area	A3	A4	B2
BPZ-FP-XNH1/2/SASY-400-MV	1x XNH1 / 1x XNH2	2x XNH00	320	234	449
BPZ-FP-XNH1/2/3/SASY-600-MV	2x XNH1 / 2x XNH2 / 1x XNH3	4x XNH00	520	434	449
BPZ-FP-XNH1/2/3/SASY-800-MV	3x XNH1 / 3x XNH2 / 2x XNH3	5x XNH00	720	634	449

### Example of application

<sup>\*)</sup> Individual cover strip made of insulation material to be used when installing devices of different size (depending on the requirements - to be prepared by the customer)

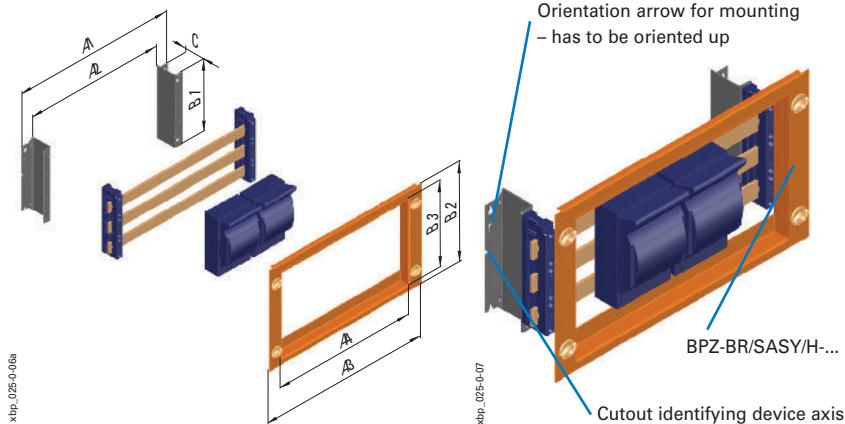

## Mounting sets for 3-pole IEC busbar support 630A SASY60i, BPZ-BR/SASY/H...

- Mounting sets for fixing the busbar supports BBS-3/FL
- Material
  - Front plate: sheet steel, powder-coated, RAL 7035
  - Mounting angles: sheet steel (2 mm), zinc-coated
- For surface mounted or floor-standing distribution boards
- Scope of delivery:
  - Width 400 to 800 mm: 2 fixing angles, 1 front plate, fixing material
  - Width 1000 to 1200 mm: 3 fixing angles, 2 profiles, 1 front plate, fixing material

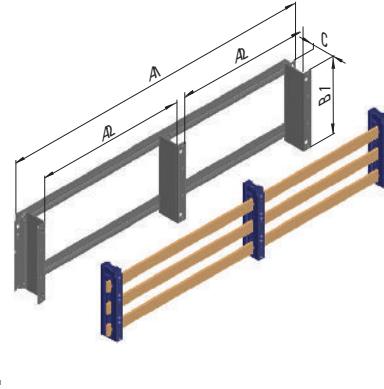

### Dimensions [mm]

Type	Mounting angles				Front panel				Max. number of 3-pole XNH00 without connection section cover	
	Outside dimensions			C	Inside dimensions					
	Width	Height			Width	Height				
	A1	B1	A2	C	A3	B2	A4	B3		
BPZ-BR/SASY/H-400	296	215	222	63	320	300	234	194	2x XNH00	
BPZ-BR/SASY/H-600	496	215	422	63	520	300	434	194	4x XNH00	
BPZ-BR/SASY/H-800	696	215	622	63	720	300	634	194	5x XNH00	
BPZ-BR/SASY/H-1000	896	215	398	63	920	300	834	194	6x XNH00	
BPZ-BR/SASY/H-1200	1096	215	498	63	1120	300	1034	194	8x XNH00	

### For board widths 400, 600, 800 mm

### For board widths 1000 and 1200 mm

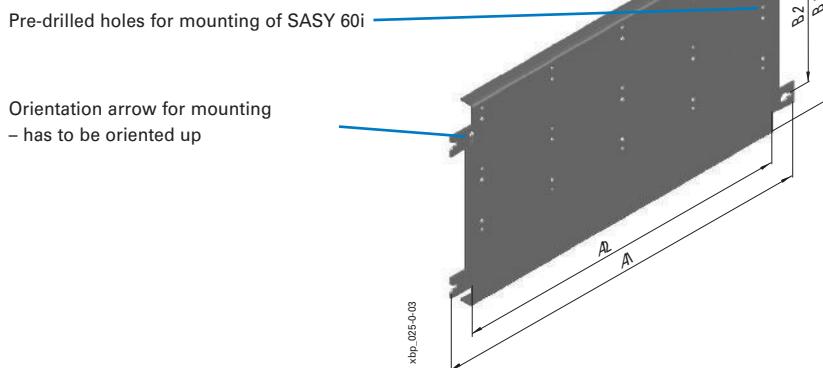

## Mounting plates with pre-drilled holes for mounting busbar holders SASY 60i BPZ-MPLSASY

- For mounting of holders of SASY 60i system
- Material: sheet steel (2 mm), zinc-coated
- Scope of delivery: 1 mounting plate, fixing material

### Dimensions [mm]

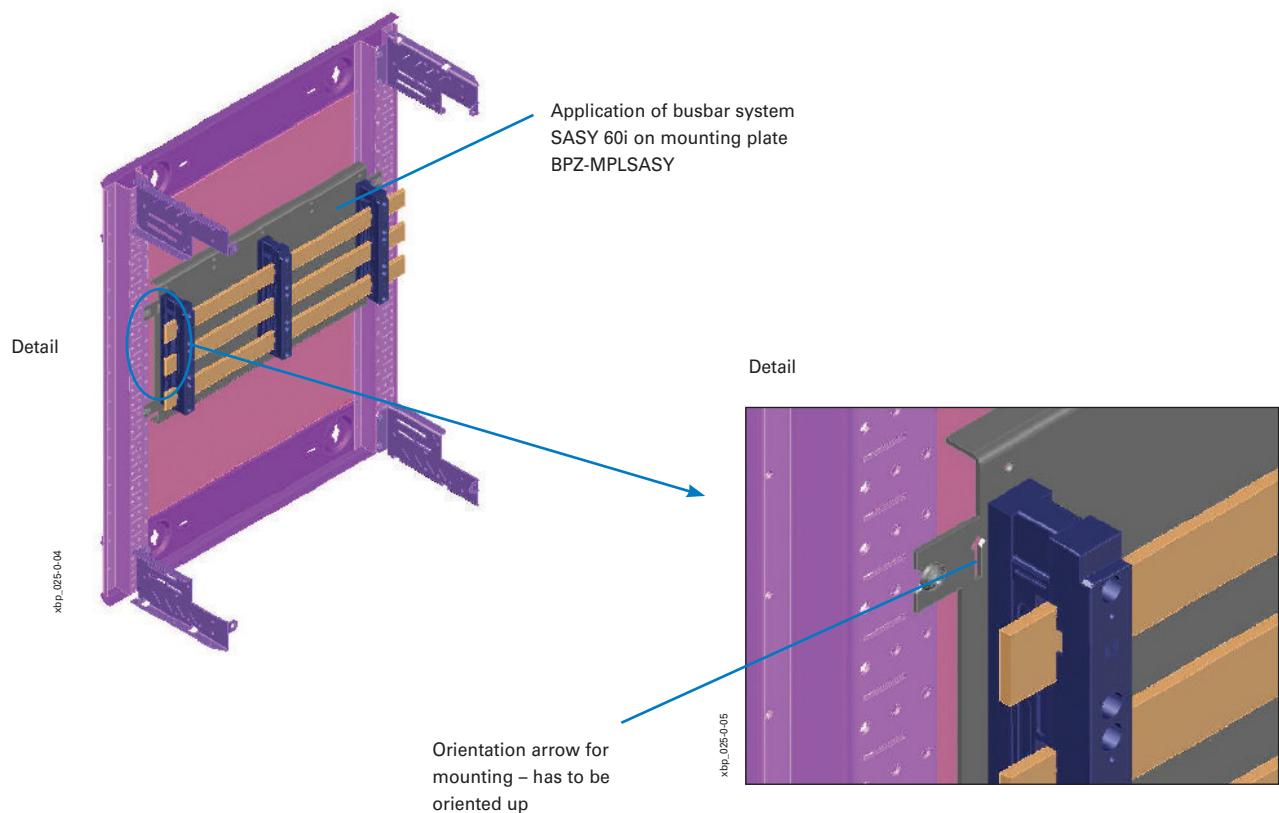

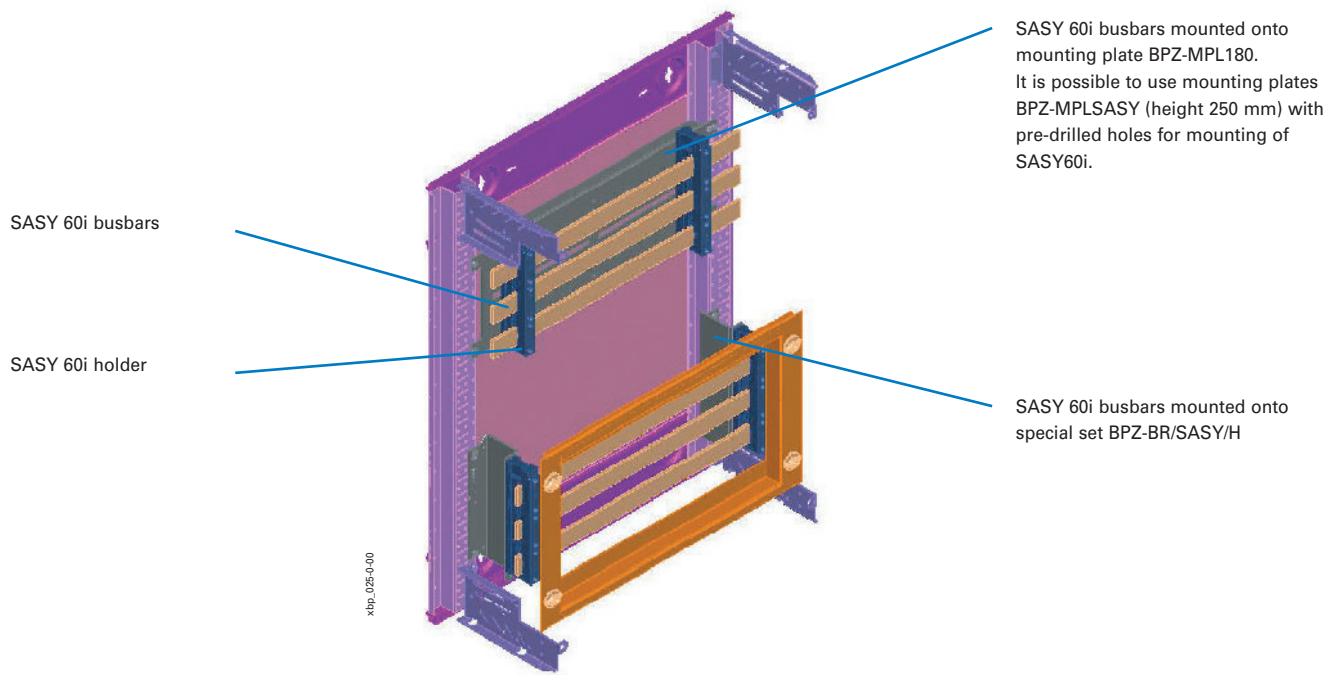

Type	Width		Height		Number of BEL elements on the side
	A1	A2	B1	B2	
BPZ-MPLSASY-425	313	253	250	175	2
BPZ-MPLSASY-600	488	428	250	175	2
BPZ-MPLSASY-800	688	648	250	175	2
BPZ-MPLSASY-1000	888	846	250	175	2
BPZ-MPLSASY-1200	1088	1046	250	175	2

## Example of mounting of busbar system SASY 60i

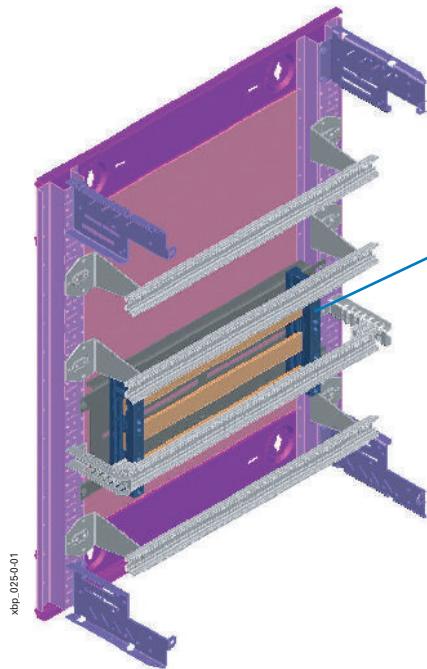

### Application example:

- The busbars are fed via circuit breaker NZM
- The busbars serve as a connection point for particular devices

# Distribution Boards

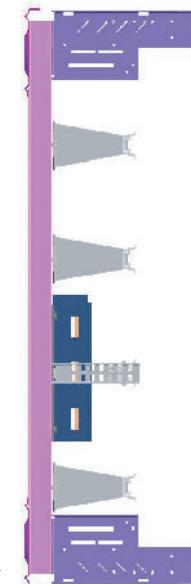

xEnergy  
Basic

BPZ-MPL180...  
SASY 60i busbars mounted onto mounting plate.  
It is possible to use mounting plates BPZ-MPLSASY (height 250 mm) with pre-drilled holes for mounting of SASY60i.

The busbars can be placed under the device rails – save of space in the board.

For fastening of the device rail over the busbars the towers BPZ-TA have to be used (set BPZ-DINR...T).

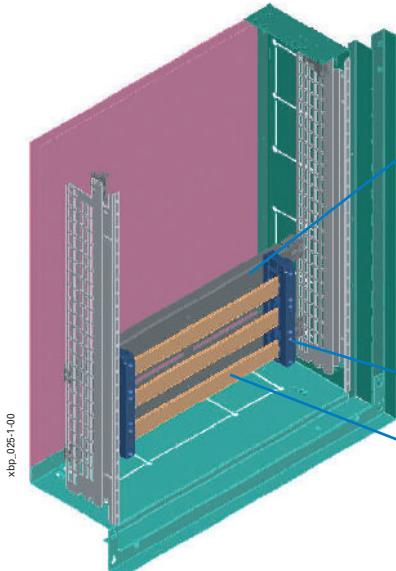

BPZ-MPL180... + BEL...  
SASY 60i busbars mounted onto mounting plate – can be used for branching of L/N/PE conductors.

It is possible to use mounting plates BPZ-MPLSASY (height 250 mm) with pre-drilled holes for mounting of SASY60i.

Recommended mounting depth (5) – suitable for branching of L/N/PE as well as for direct mounting of devices onto the busbars.

Front plate with plastic insert can be used to cover – cutouts are done according to actual device position.

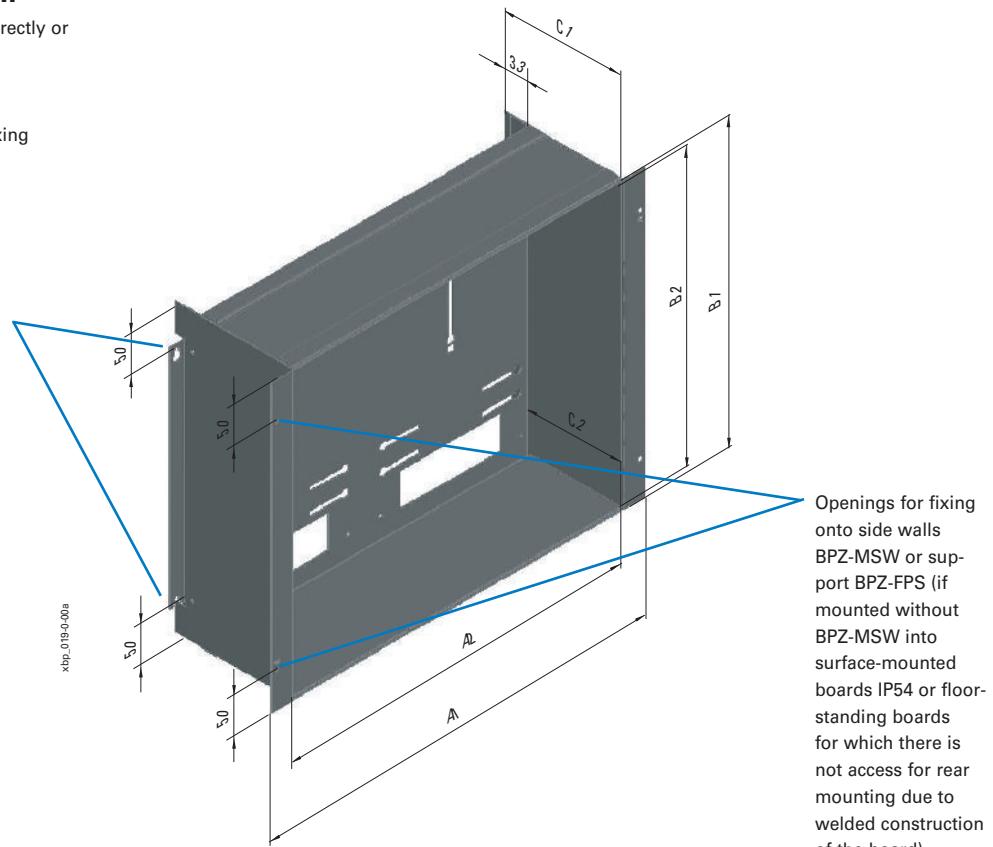

SASY 60i holder

SASY 60i busbars

## Meter troughs, BPZ-MT....

- Meter troughs for mounting meter directly or via meter plates ZBR
- Material: sheet steel, powder-coated, RAL 7035
- Scope of delivery: 1 meter trough, fixing material

Openings for fixing onto rear frame in surface-mounted boards IP30 or for hanging in surface-mounted boards IP54 and floor-standing boards

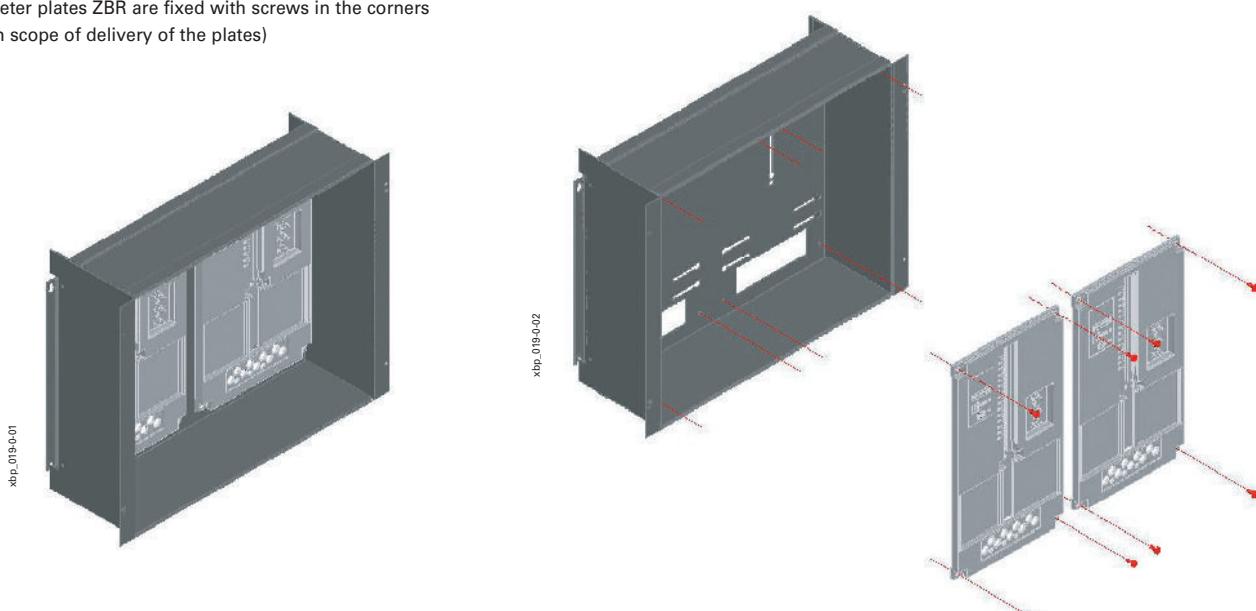

## Dimensions [mm]

Type	Outsider dimensions					
	Width	Height	Depth			
	A1	B1	C1	A2	B2	C2
BPZ-MT-400/400-1	320	400	165	-	390	130
BPZ-MT-600/400-2	520	400	165	459	390	130
BPZ-MT-800/400-3	720	400	165	659	390	130
BPZ-MT-1000/400-4	920	400	165	859	390	130

BPZ-MT-400/450-1	320	450	165	-	440	130
BPZ-MT-600/450-2	520	450	165	459	440	130
BPZ-MT-800/450-3	720	450	165	659	440	130
BPZ-MT-1000/450-4	920	450	165	859	440	130
BPZ-MT-1200/450-5	1120	450	165	1059	440	130

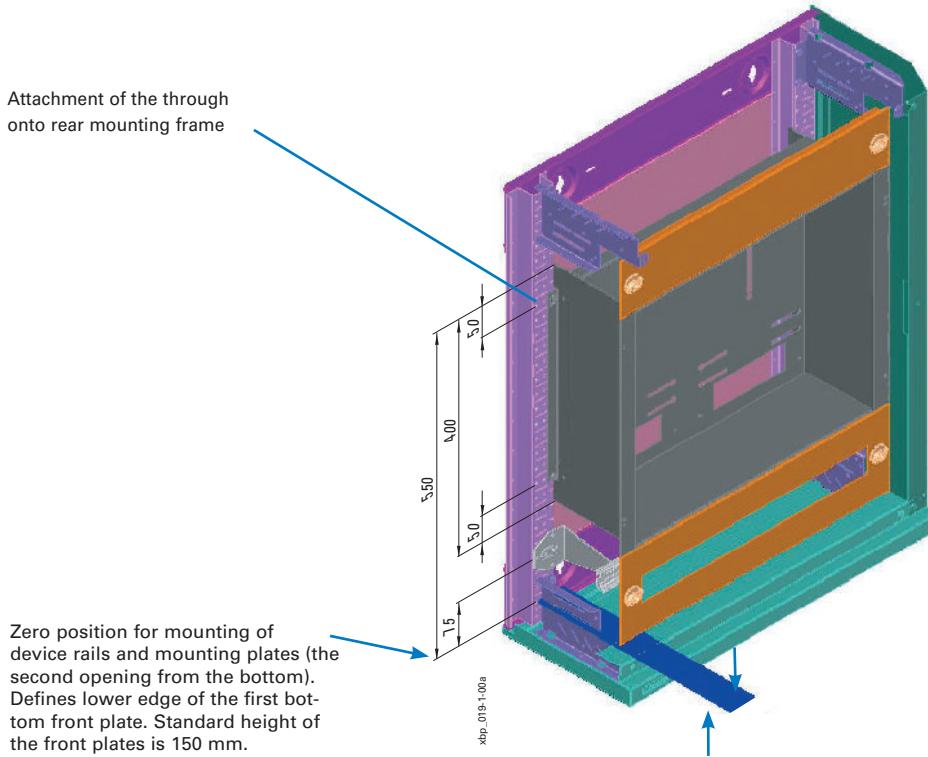

## Mounting of meter plates ZBR into troughs BPZ-MT

- Meter plates ZBR are fixed with screws in the corners (in scope of delivery of the plates)

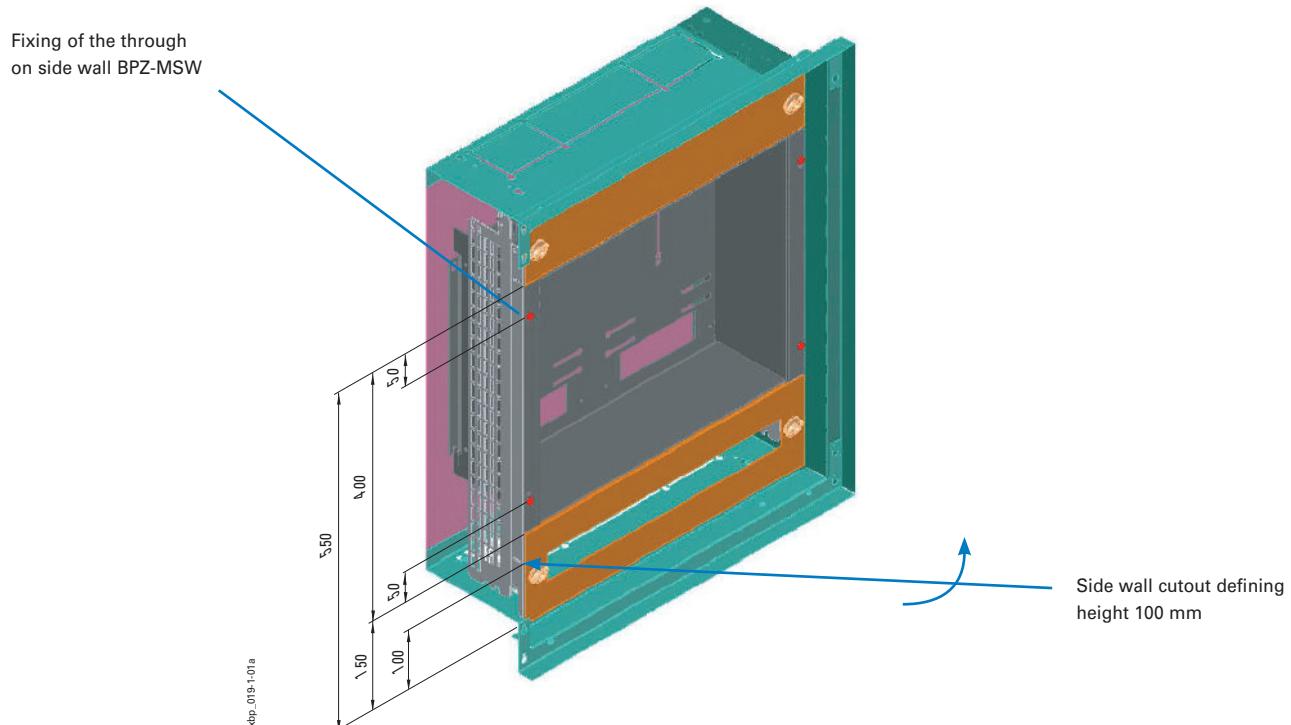

## Application of meter through in a surface-mounted board IP30

- Trough is mounted directly onto rear frame
- Sealing screws for securing of the trough can be screwed into support BPZ-FPS
- In case of use BPZ-MSW, the through is fixed via front part onto BPZ-MSW (see application in flush-mounted board)
- Meter through has to be mounted into board before the side walls BP-SP

## Application of meter through in flush-mounted board or surface-mounted board IP54

- The trough is mounted onto side walls BPZ-MSW or supports BPZ-FPS
- If sealing is asked, standard screws are replaced with sealing ones
- Meter throughs can be mounted into flush-mounted boards with wall box of depth of 240 mm only
- Assembling into surface-mounted boards IP54 or floor-standing boards is carried in similar way. It is not possible to use rear mounting due to fixed side walls. For these cases, the through can be hanged onto rear frame. The fixing itself is performed from the front by means of screws screwed into BPZ-MSW or BPZ-FPS.

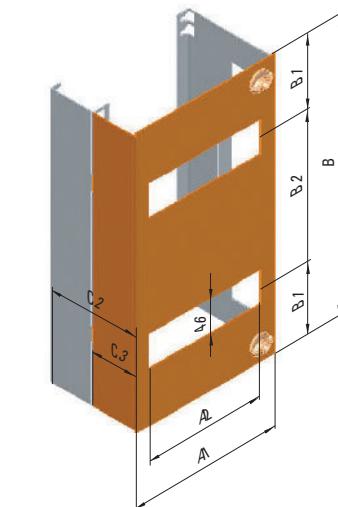

## Device rail sets, BPZ-DRS-MT

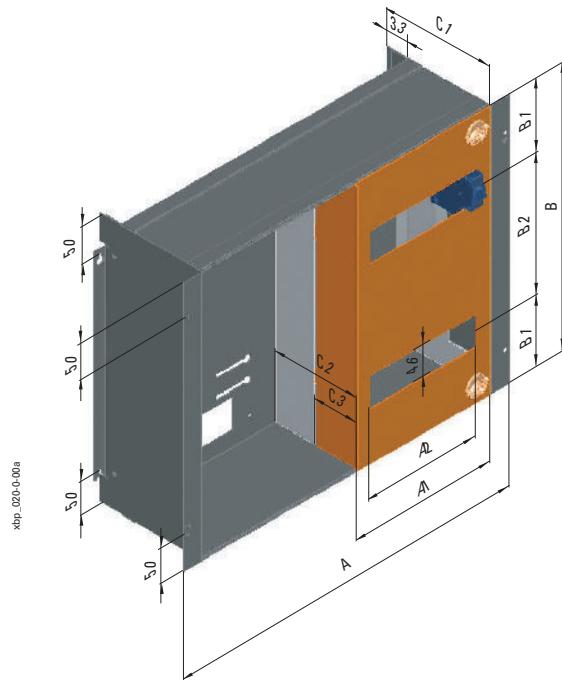

- For using free metering places with device rails
- Mounting is possible into side positions in the through
- Material: sheet steel, powder-coated, RAL 7035
- Scope of delivery: 1 device rail set, fixing material

### Dimensions [mm]

Type	Outside dimensions						
	Width	Height	Depth	A2	B1	B2	C3
	A1	B	C2				
BPZ-DRS-MT/400-1	215	400	130	170	100	200	65
BPZ-DRS-MT/450-1	215	450	130	170	125	200	65

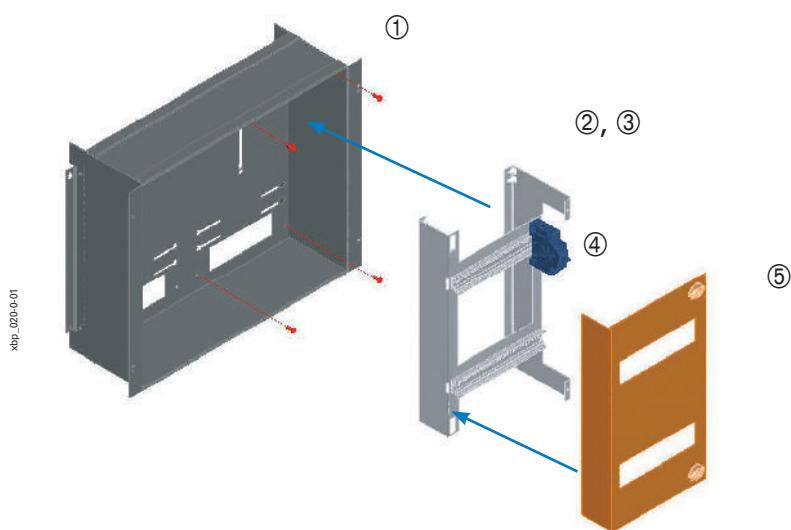

### Assembling into meter through

### Mounting process:

1. Pre-screwing of fixing screws into meter through. The screws must not be screwed tight.
2. Placing of the device rail set onto pre-screwed screws.
3. Tightening of the fixing screws.
4. Potential installation or connecting of inside equipment.
5. Mounting of a front panel

## Set for front plate sealing, BPZ-SS

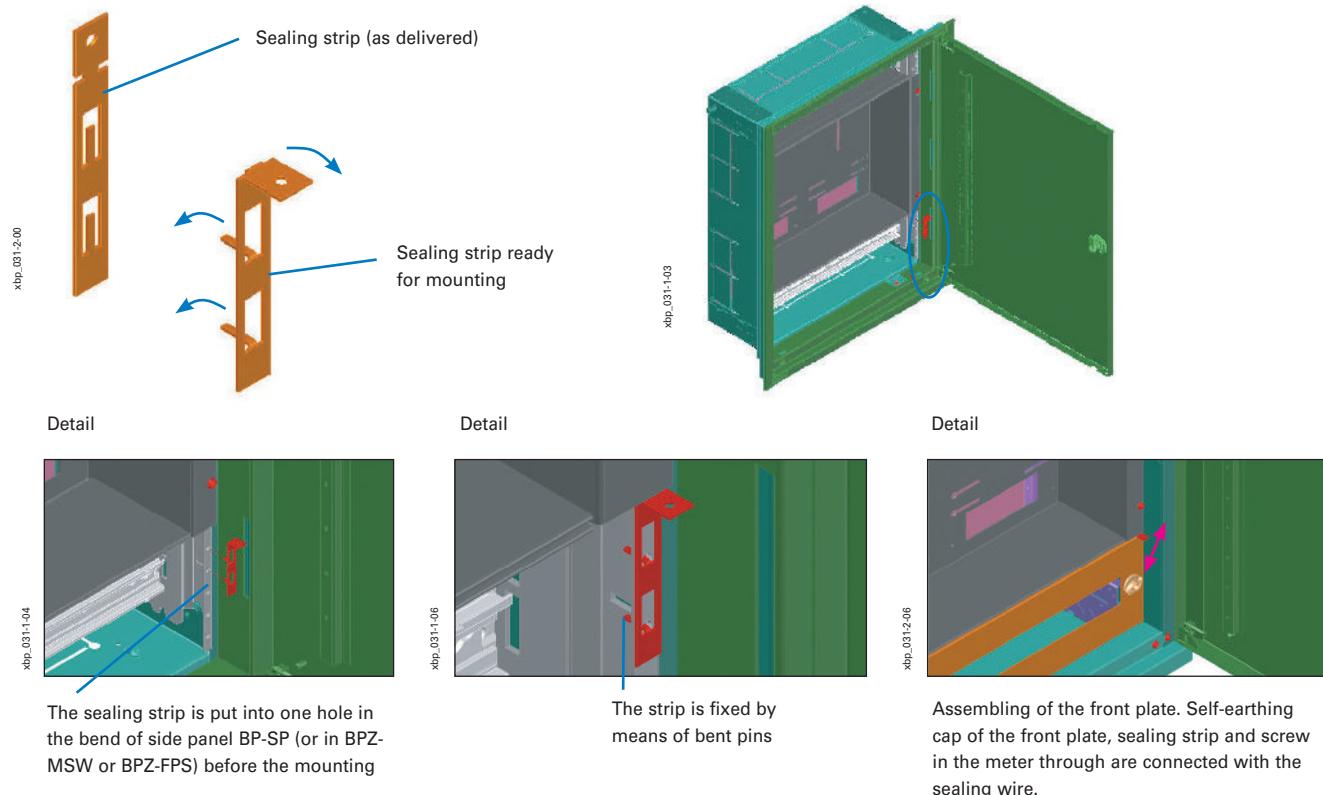

- Set for sealing of distribution boards
- Scope of delivery: 4 pcs of sealing strips, 4 pcs of sealing screws M5, 1 pc of tapping screw M5

### Process of sealing of front plates

- Fixed point is given by properly mounted sealing strip
- Sealing screw M5
- Sealing wire is led through both openings in plastic cap of self-earthing fixing system, screw head of the sealing screw and lug in the sealing strip

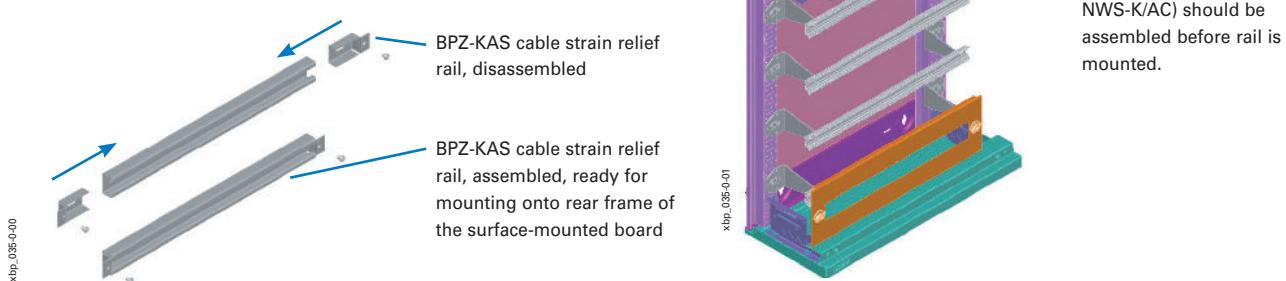

### Process of sealing of meter through

- The through can be fixed from the front side into BPZ-FPS or BPZ-MSW by means of sealing screws M5 (included in the set). The tapping screw from the set is used to make thread.
- The sealing itself can be done with sealing strip of a neighbouring front plate or with pre-moulded lugs in the through

## Cable strain relief rail C-profile, BPZ-KAS

- The rail is used to provide strain relief to the cables right after cable entry
- Suitable for mounting cable clips
- Can be used in surface-mounted or floor-standing boards
- To be fixed with fastening angles right above cable entry
- Material: sheet steel, galvanized
- Scope of delivery: 1 cable strain relief rail, 2 fastening angles, fixing material

## Terminal support bars, BPZ-TSB

- For mounting of terminals (KLV-)-KL
- For surface mounted or floor-standing boards
- Mounted directly on the corner tower sets BPZ-CTS (the mounting is recommended before tightening of the fixing screws of the corner tower set)
- Possibility of direct mounting of PE terminal (conductive connection with board construction)
- N terminals are mounted by means of KT holders
- Material: sheet steel, galvanized
- Scope of delivery: 1 terminal support bar, fixing material

wa\_v40913

## Terminal supports, KT

- Scope of delivery: 1 terminal support

### KT-3

- For terminal strips KL-7 up to KL-60 mounted onto flat or hollow rails (2 pcs. needed)

wa\_v40913

### KT-5

- For terminal strips up to KL-15, for vertical snap-on mounting onto device rails according to IEC/EN 60715

wa\_v40913

## Terminal strips, (KLV-)-KL

- Maximum current 63 A (125 A if strip is fed into its center via KLA)
- Scope of delivery: 1 terminal strip

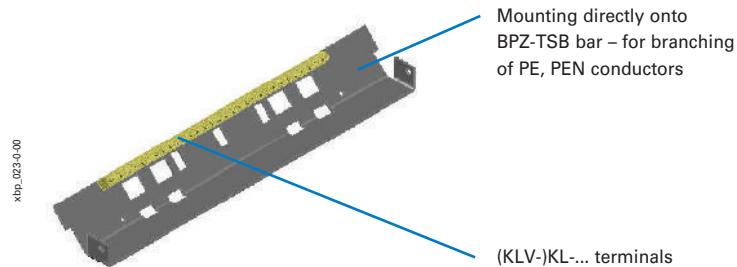

Type	Length [mm]	Number of terminals
<b>KLV-KL-7</b>	59	7 x 16mm <sup>2</sup> , 1 x 25mm <sup>2</sup>
<b>KLV-KL-1159</b>	11	1 x 16mm <sup>2</sup> , 1 x 25mm <sup>2</sup>

- Scope of delivery: 4 Busbars (art. no. is created as 1 piece)

### 4-pole Busbar Support, BPZ-BBS-4

#### BPZ-BBS-4/250

- Rated current 150-250 A
- Mounting position: vertical, horizontal
- For busbars featuring threads M6, 15 x 5 and 20 x 5 mm
- Material: PA66 reinforced with 30% glass fiber
- Flame resistance: self-extinguishing acc. to UL94/V-0
- Halogen free: Yes
- Compact construction
- Holes for fixing with M6 screws
- Easy to mount onto a mounting plate or special prepared brackets
- Additional fixing of protective cover BPZ-PC/BBS250/800-160-25
- Continuous operating temperature: +130°C
- Max. distance between the busbar supports in mm in case of one busbar per phase

Bar cross section	Icc pk (kA)	11	14	24	32
	Icc rms (kA)	7	8	12	15
In (A)	Distance (mm)				
15 x 5	150	561	455	258	150
20 x 5	250	647	526	266	150

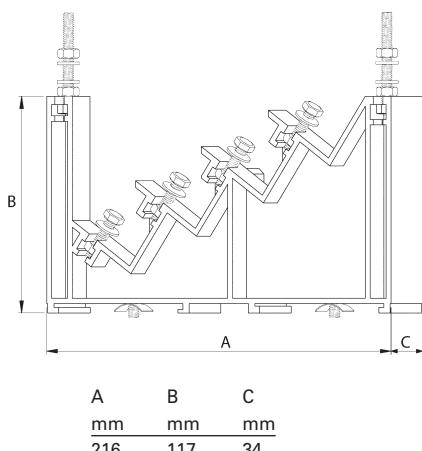

- Scope of delivery: 1 busbar holder, 2 spacers, fixing material

#### BPZ-BBS-4/630

- Rated current 150-630 A
- Mounting position: vertical, horizontal
- For busbars featuring threads M6, 15 x 5, 20 x 5, 32 x 5, 30 x 5 and 30 x 10 mm
- Material: PA66 reinforced with 35% glass fiber
- Flame resistance: self-extinguishing acc. to UL94/V-0
- Halogen free: Yes
- Compact construction
- Easy to mount onto a DIN-rail, onto a mounting plate or special prepared brackets
- Protective cover (not part of delivery) can be adjusted in height thanks to incl. plastic spacers
- Continuous operating temperature: +125°C
- Max. distance between the busbar supports in mm in case of one busbar per phase

Bar cross section	Icc pk (kA)	11	14	24	32	48
	Icc rms (kA)	7	8	12	15	23
In (A)	Distance (mm)					
15x5	150	682	554	314	250	100
20x5	250	788	640	363	261	100
32x5	400	980	980	410	261	100
20x10	500	980	980	410	261	100
30x10	630	980	980	410	261	100

- Scope of delivery: 1 busbar holder, fixing material

### Mounting elements for 4-pole Busbar Support 250 A, BPZ-BR/BBS250/V-200

- For horizontal mounting of the 4-pole Busbar Support BPZ-BBS-4/250 onto mounting pillars of a 200 mm wide compartment.
- Busbars are in vertical direction.
- Material: Sheet steel (2 mm), zinc-coated
- Scope of delivery: 2 Mounting elements, fixing material

## Mounting elements for 4-pole Busbar Support 630 A, BPZ-BR/BBS630/V

- For horizontal mounting of the 4-pole Busbar Support BPZ-BBS-4/630/V onto mounting pillars of a 400 mm wide enclosure (or a 400 mm wide compartment). Busbars are in vertical direction.
- Material: Sheet steel (2 mm), zinc-coated
- Scope of delivery: 2 Mounting elements, fixing material

## Mounting elements for DIN-Rail respectively DIN-Rail Kit, BPZ-BR/DINR/V-200

- For vertical mounting of the DIN-Rail onto mounting pillars of a 200 mm wide compartment
- Material: Sheet steel (1.5 mm), zinc-coated
- Scope of delivery: 2 Mounting elements, fixing material

## Device rail Set, BPZ-DINR

- For mounting of installation devices

### With adjustable mounting depth BPZ-DINR...T

- Scope of delivery: device rail, 2 adjustable towers, 2 BEL01 fastening elements, fixing material
- Delivered in packs with 10 sets only

### With fixed mounting depth BPZ-DINR...B

- Scope of delivery: device rail, 2 fixed towers, fixing material
- Delivered in packs with 10 sets only
- Conductive connection is type tested

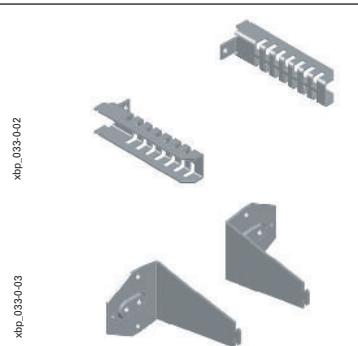

## Towers for device rail, BPZ-T./2

- For mounting of device rails (without BPZ-MSW)

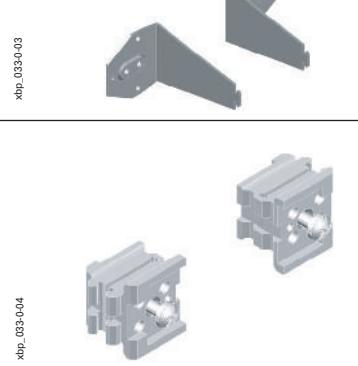

### With adjustable depth BPZ-TA/2

- Enables adjustable mounting depth of the DIN-Rail in steps of 12 mm
- Scope of delivery: 2 adjustable towers, fixing material

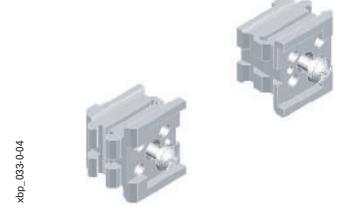

### With fixed depth BPZ-TF/2

- Scope of delivery: 2 fixed towers, fixing material
- Conductive connection is type tested

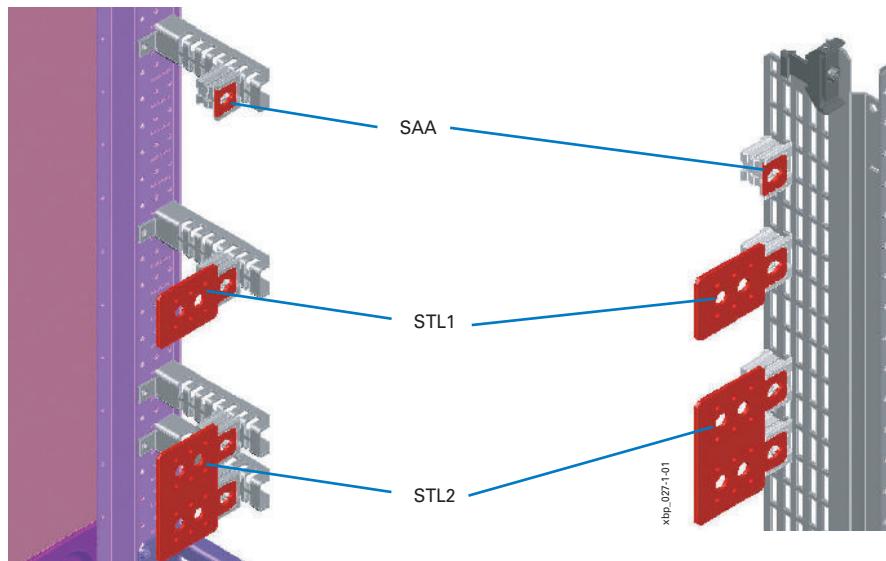

## Fastening elements, BEL

- For mounting device rails onto adjustable towers BPZ-TA or onto mounting side walls BPZ-MSW
- White BEL12 - ungrounded fastening element
- Green BEL01 - grounded fastening element
- Unmounted BEL12A - ungrounded and unmounted fastening element
- Scope of delivery: 2 fastening elements

## Adaptors, SAA, STL

- Adaptors SAA are intended to align the dip in BEL.  
With the adaptors, it is possible to mount panels and other equipment which is not designed for BEL onto these fastening elements
- Holders STL can be used in the same way as SAA. These holders are enlarged by mounting extension.

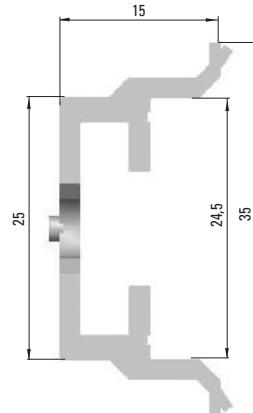

xhp\_027.0.01

## Device rails, BPZ-DINR

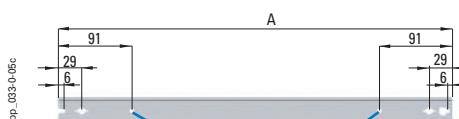

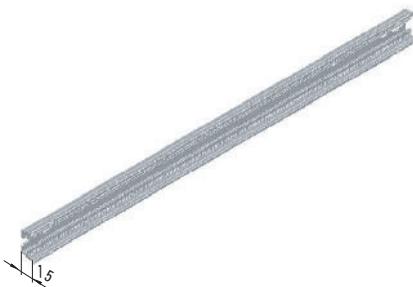

- For mounting of the Installation devices
- Material: Aluminium
- Scope of delivery: 1 device rail

Dimensions [mm]

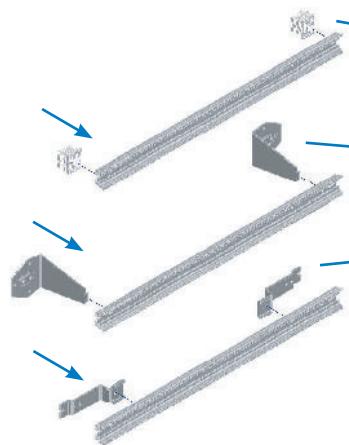

Type	Outside dimensions		
	Height	Width A	Depth

Holes for mounting of cable duct angles KKW

Fastening element BEL for mounting of rail onto tower BPZ-TA or side wall BPZ-MSW.

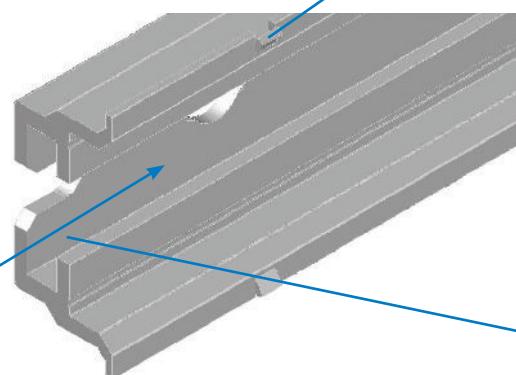

Tower BPZ-TF for mounting of the rail onto rear frame.

Angle KKW... for mounting of cable ducts (device rail has to be shortened according to width of the cable duct) – for details see applications of KKW angles

xbp\_033-0-06b

Detail of device rail profile

Stops defining active area of the rail which can be equipped with devices (with respect to cutout in the front plates BPZ-FP...)

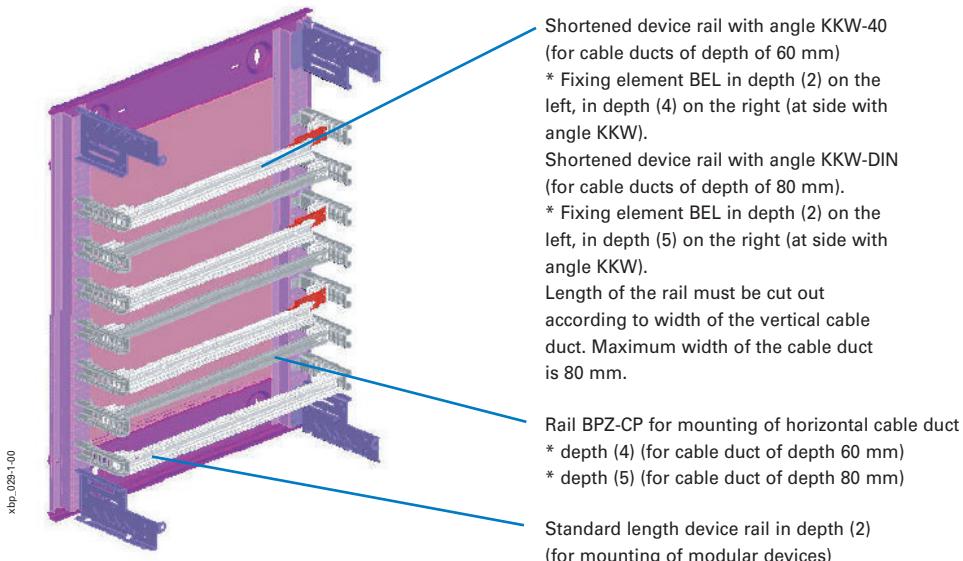

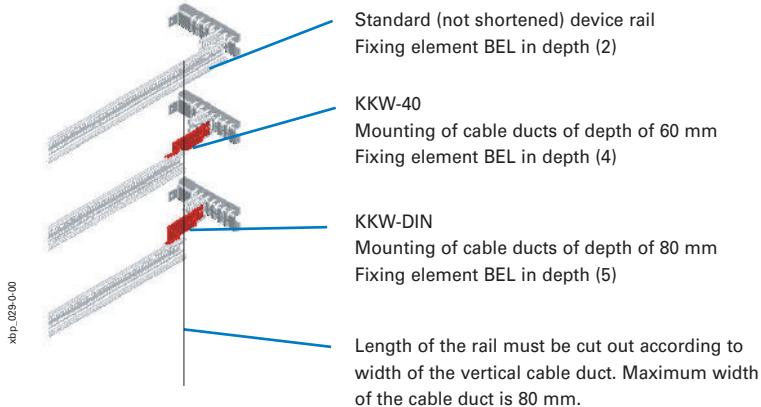

The groove can be used for inserting of slide nuts EGM-4, EGM-5, or for EGM-F (in combination with EGM-4, EGM-5)

xbp\_033-0-06d

## Cable duct angles, KKW

- For mounting cable ducts featuring a depth of 60 mm (KKW-40) or 80 mm (KKW-DIN)
- Material: sheet steel, zinc-coated
- Scope of delivery: 1 cable duct angle

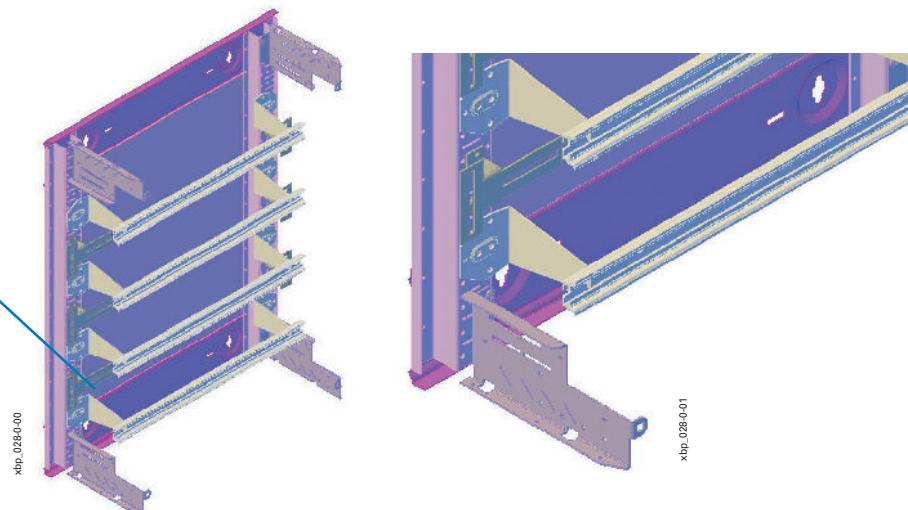

## Fixing elements for cable duct, BPZ-CDB

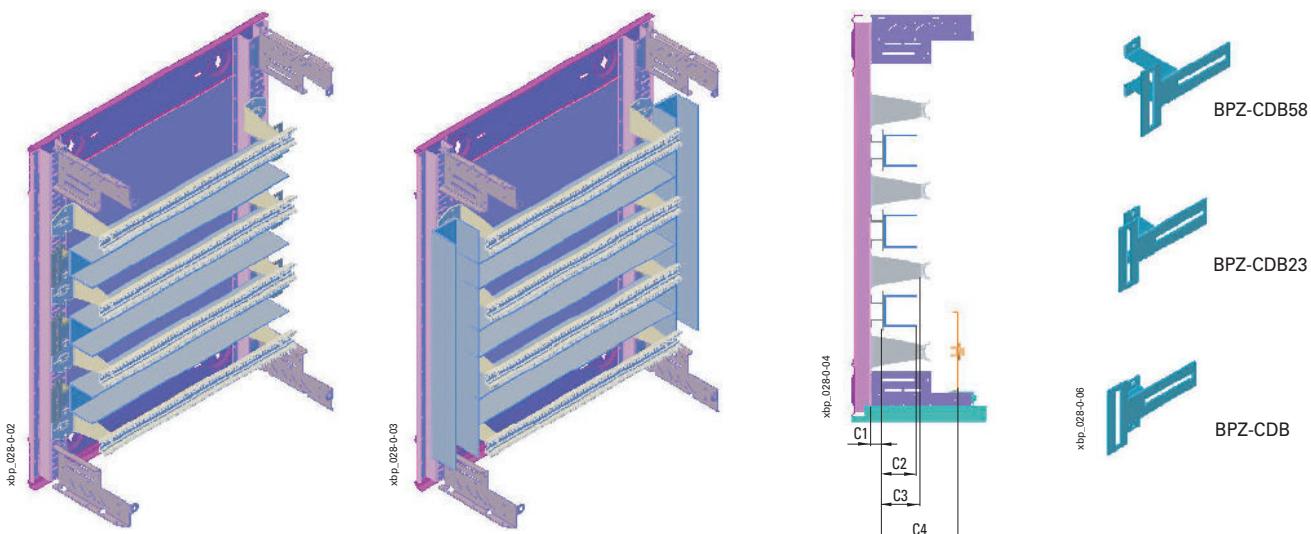

- For mounting cable ducts featuring a depth of 80 mm (BPZ-CDB), 60 mm (BPZ-CDB23) or 40 mm (BPZ-CDB58) for surface-mounted or floor-standing distribution boards
- For board width 400, 600 mm
- For larger widths fixing elements BPZ-CDB../CP are used
- Material: Sheet steel, zinc-coated
- Scope of delivery: 2 fixing elements, fixing material

### Detail of mounting and applications

Cable duct fixing elements BPZ-CDB. Mounting onto rear frame (only for surface-mounted and floor-standing boards). A type is chosen according to height of the cable duct.

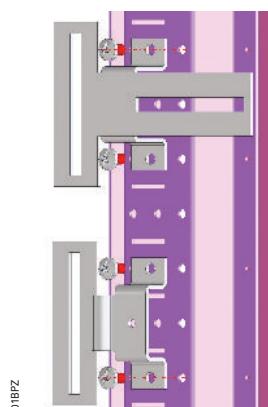

## Fixing elements BPZ-CDB equipped with cable ducts (for board of width of 400, 600 mm)

### Dimensions [mm]

Type	Fixing element height	Recommended height of the cable duct	Maximum height of the vertical cable duct	Maximum height of the horizontal cable duct
	C1	C2	C3	C4
BPZ-CDB	8	80	85	150
BPZ-CDB23	23	60	70	135
BPZ-CDB58	58	40	40	100

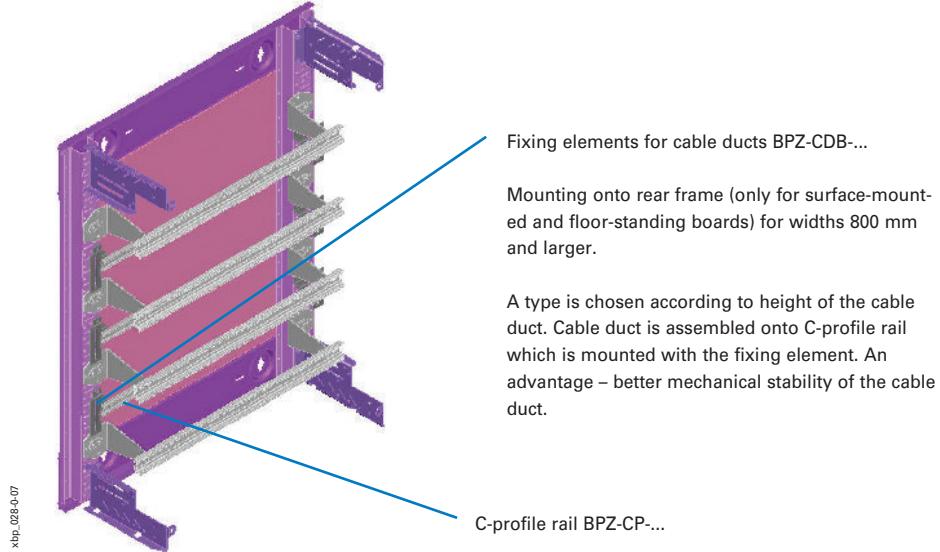

### Detail of mounting

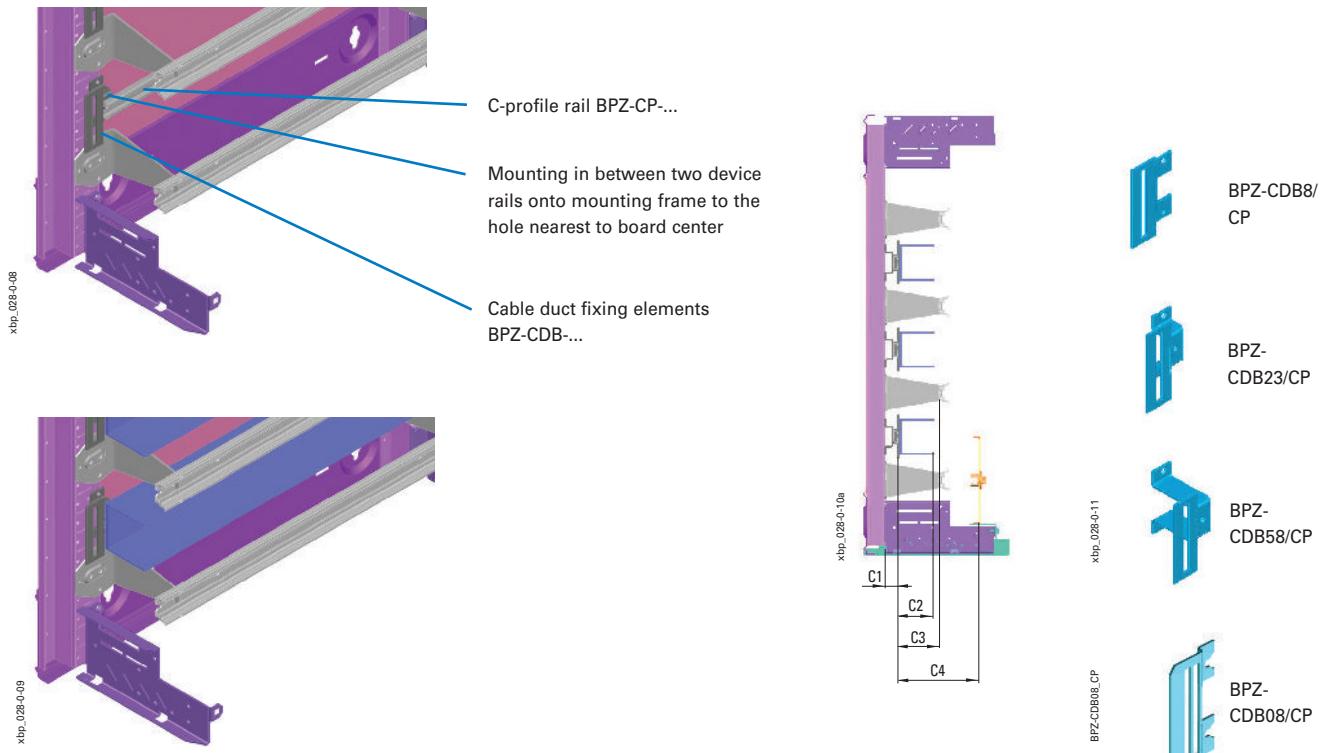

## Fixing elements for cable duct, BPZ-CDB../CP

- For mounting cable ducts featuring a depth of 80 mm (BPZ-CDB8/CP respectively BPZ-CDB08/CP), 60 mm (BPZ-CDB23/CP) or 40 mm (BPZ-CDB49/CP respectively BPZ-CDB58/CP) for surface-mounted or floor-standing distribution boards
- For board with 600 to 1200 mm
- Fixing elements are supplemented with rails BPZ-CP
- Material: sheet steel, zinc-coated
- Scope of delivery: 2 fixing elements, fixing material

### Detail of mounting and application

## Fixing elements BPZ-CDB equipped with cable ducts (for board of width of 800 to 1200 mm)

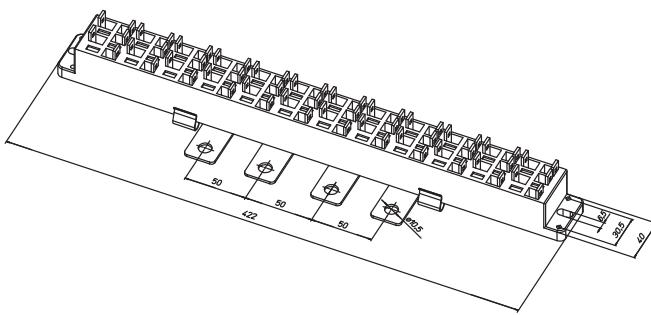

### Dimensions [mm]

Type	Fixing element height	Recommended height of the cable duct	Maximum height of the vertical cable duct	Maximum height of the horizontal cable duct
C1	C2	C3	C4	
BPZ-CDB8/CP	7	80	85	150
BPZ-CDB08/CP	8	80	85	150
BPZ-CDB23/CP	24	60	70	135
BPZ-CDB49/CP	49	40	45	105
BPZ-CDB58/CP	54	40	40	100

## 4-Phase Busbar, BPZ-KB-24/250

- It is a 250 A busbar intended to supply a row of modular devices
- Max. current rating for every output is 63 A
- Outputs: 12 outputs per phase, neutral wiring 24 outputs
- Each connector automatically locks, which guarantees high security
- No risk of direct contact, according to IP20
- Dimensions (L x W x H): 427 x 40 x 50 mm
- Scope of delivery: 1 pc. 4-Phase busbar

## Mounting Elements for 4-Phase Busbar, BPZ-BR/KB24

- For mounting a 4-phase busbar onto an NZM-mounting plate or onto mounting pillars in back
- Material: Sheet steel, zinc-coated
- Scope of delivery: 2 Mounting elements, fixing material

## Flexible Connector for 4-Phase Busbar, BPZ-P

- For connecting a 4-phase busbar
- In 6 mm<sup>2</sup> or 10 mm<sup>2</sup>
- Length: 120 or 320 mm
- Scope of delivery: 1 Flexible connector

## 1-pole terminal block BPZ-KB

### BPZ-KB

- For copper conductors
- Mounting onto device rail and/or mounting plate
- UL-listed
- Time-saving on wiring
- Saves 80 % on space used
- Modular construction allowing to build systems of 1 to 4 poles by using several blocks
- Scope of delivery: 1 1-pole terminal block

### Technical data

	Rated current	Degree of protection	Inputs (mm <sup>2</sup> )	Torque (Nm)	Outputs (mm <sup>2</sup> )	Torque (Nm)	Connection	Dimensions L x W x H (mm)

## BPZ-KB-....-ALU

- For copper as well as aluminium conductors
- Mounting onto device rail and/or mounting plate
- UL-listed
- Time-saving on wiring
- Saves 80 % on space used
- Modular construction allowing to build systems of 1 to 4 poles by using several blocks
- Scope of delivery: 1 1-pole terminal block

## Technical data

	Rated current	Degree of protection	Inputs (mm <sup>2</sup> )	Torque (Nm)	Outputs (mm <sup>2</sup> )	Torque (Nm)	Connection	Dimensions L x W x H (mm)
BPZ-KB-6/80-ALU	80 A / 63 A	IP20	1x 2.5-16	1.5-3	4x 2.5-6 2x 2.5-16	0.8-1.5 1.5-3	–	66 x 27 x 47

## Connection latch for 1-pole terminal block BPZ-CL

- BPZ-CL-65/25 suitable for BPZ-KB-11/250
- BPZ-CL-70/35 suitable for BPZ-KB-11/400
- Dimensions (L x W x H)  
BPZ-CL-65/25: 7 x 65 x 25 mm  
BPZ-CL-70/35: 9 x 70 x 30 mm
- Scope of delivery: 1 connection latch

## Connection bar 27 mm for 1-pole terminal blocks BPZ-CB

- Suitable for BPZ-KB-6/125
- Dimensions (L x W x H): 16 x 44 x 14 mm
- Scope of delivery: 1 connection bar

## 3-pole Terminal Block

### BPZ-KB-6/175

- Mounting onto DIN-rail and mounting plate
- UL-listed
- Time-saving on wiring
- Saves 80% of space used
- Modular construction allowing to build systems of 1 to 4 poles by using several blocks
- Protection class: IP20
- Max. operating voltage 1000V AC, 1500V DC
- Scope of delivery: 1 3-Pole terminal block

## Technical Data

BPZ-KB-6/175		
	torque (Nm)	
Rated current	175 A	
Input (mm <sup>2</sup> )	1 x 16-70	6-10
Outputs (mm <sup>2</sup> )	6 x 2.5-16	3-4
Connection	–	
Dimensions L x W x H (mm)	80 x 71.5 x 42.5	

### BPZ-KB-6/175-ALU

- Aluminium design
- Mounting onto DIN-rail and mounting plate
- UL-listed
- Time-saving on wiring
- Saves 80% of space used
- Modular construction allowing to build systems of 1 to 4 poles by using several blocks
- Protection class: IP20
- Max. operating voltage 1000V AC, 1500V DC
- Scope of delivery: 1 3-Pole terminal block

## Technical Data

BPZ-KB-6/175-ALU		
	torque (Nm)	
Rated current (Cu / Al)	175 A / 125 A	
Input (mm <sup>2</sup> )	1 x 16-70	6-10
Outputs (mm <sup>2</sup> )	6 x 2.5-16	3-4
Connection	–	
Dimensions L x W x H (mm)	80 x 71.5 x 42.5	

## 4-pole Terminal Blocks, BPZ-KB

- Mounting onto DIN-rail and mounting plate
- Max. operating voltage  
BPZ-KB-9/125: 690V AC/DC  
BPZ-KB-13/125: 690V AC/DC  
BPZ-KB-8/125: 1000C AC/1500V DC  
BPZ-KB-11/160: 1000C AC/1500V DC
- Scope of delivery: 1 4-Pole terminal block

### Technical Data

	BPZ-KB-8/125	BPZ-KB-9/125		BPZ-KB-13/125		BPZ-KB-11/160	
		torque (Nm)		torque (Nm)		torque (Nm)	
Rated current	125 A		125 A		125 A		160 A
Inputs per pole (mm <sup>2</sup> )	1 x 6-35	1,5	2 x 6-35	1,5	2 x 6-35	1,5	1 x 10-35 3,5-5
Outputs per pole (mm <sup>2</sup> )	3-poles x (5 x 1,5-6 / 2 x 4-16)	0,8-1,5	7 x 2,5-10	1,5	9 x 1,5-10	1,5	3 x 6-35 3,5-5
	1-pole x (4 x 1,5-10 / 6 x 4-16)	1,5			2 x 1,5-10	1,5	3 x 6-25 3,5-5
Dimensions L x W x H (mm)	74,5 x 98 x 49		102 x 89 x 48		103 x 126 x 48		87 x 162 x 50

## Lifting-Eye Bolt, BPZ-LE

- For transporting the distribution board by crane, high-lift truck, etc.
- To be mounted onto the top of the floor-standing distribution board
- Max. static tensile force: 1400 N each, total 3800 N
- Weight: approx. 0.2 kg
- Scope of delivery: 4 Lifting-eye bolts

## Flask with Brush Applicator, BPZ-CPS, PAINT-RAL

- For sanding scratches in RAL 7035, 9010 or 9016
- Scope of delivery: 1 Flask with brush applicator

## Door grounding set, BFZ-DES

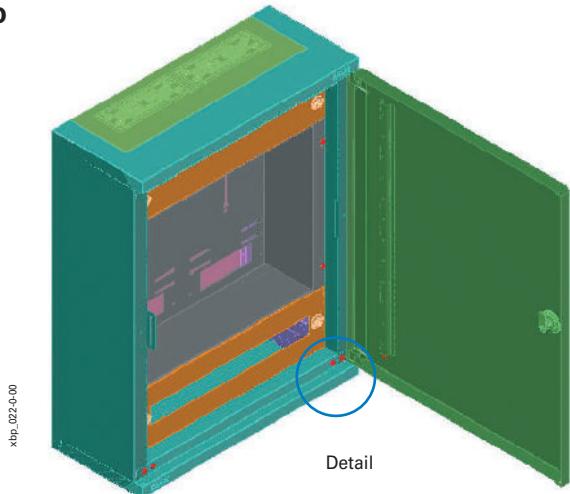

- In scope of delivery of all Profi Plus doors
- For grounding the door
- Length: 300 mm
- Cross section: 6 mm<sup>2</sup>
- Scope of delivery: 1 grounding wire with pre-fitted eyelets, fixing material

### Door grounding

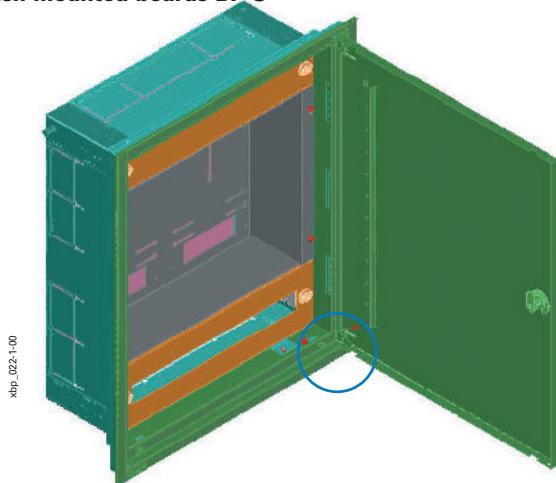

- For earthing, the threaded pin on the door and pressed nut in the frame are used. The grounding is done by connection of these points via BFZ-DES

## Surface mounted boards

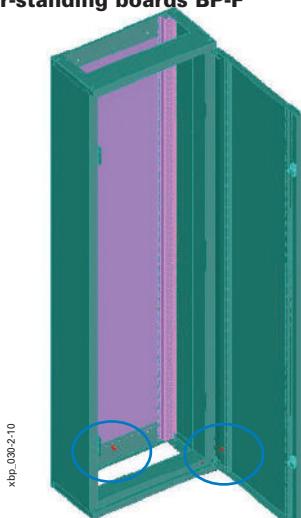

### BP-O

### Flush mounted boards BP-U

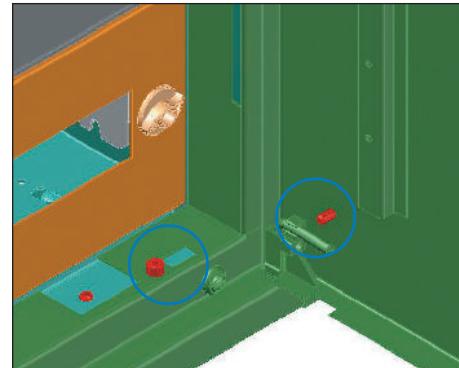

### Floor-standing boards BP-F

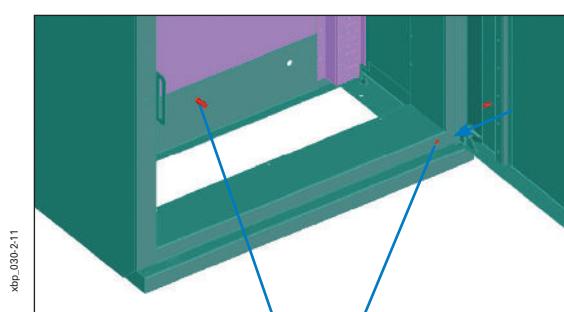

## Conductive connection of Profi Plus boards

- Side panels and top / bottom panels are connected with the base frame via self-earthing screws (in scope of delivery)
- Front plates of all designs are connected by means of self-earthing fasteners. Conductive connection of the front plates with frame is type tested
- Device rails are connected with side panels BPZ-MSW or towers via fastening elements BEL
- Meter throughs are connected with the base frame via self-earthing screws

Detail

Detail

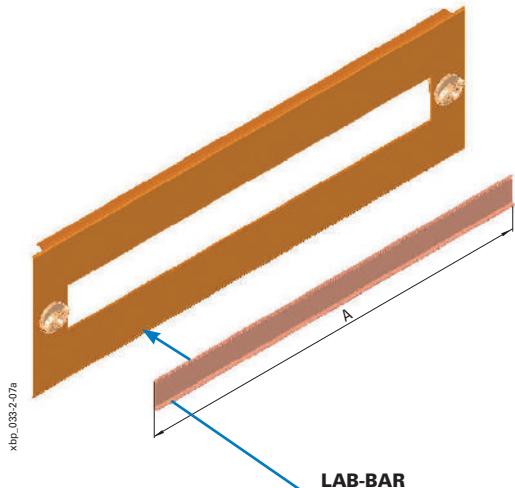

Connection of earthing set for door.  
Nut in the board frame and earthing  
screw on the door

a board

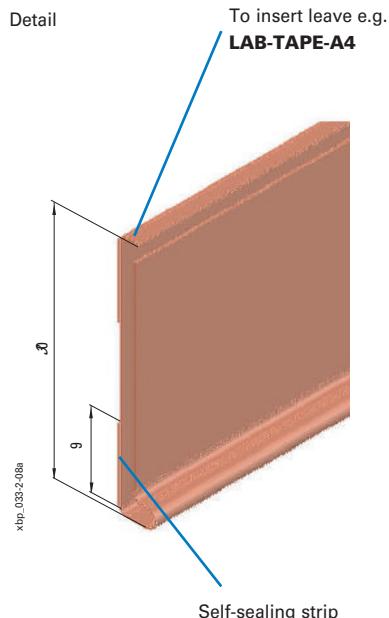

## Inscription strips, LAB-BAR

### Dimensions [mm]

Type	Number of modules MU	Length A
LAB-BAR_13TE	13	228
LAB-BAR_24TE	24	420
LAB-BAR_46TE	46	805
LAB-BAR_57TE	57	998
LAB-BAR_1000	-	1000
LAB-BAR_3000	-	3000

**LAB-BAR**  
Inscription strips.  
Mounting onto front plate by means of  
self-sealing strips.

## Enclosure leaves LAB-TAPE\_A4 for the inscription strips LAB-BAR

### Technical data

#### Empty:

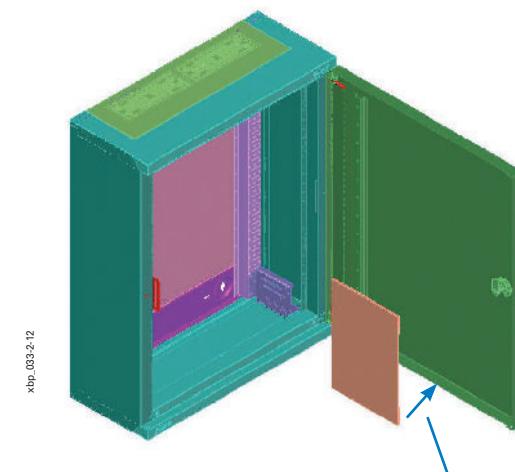

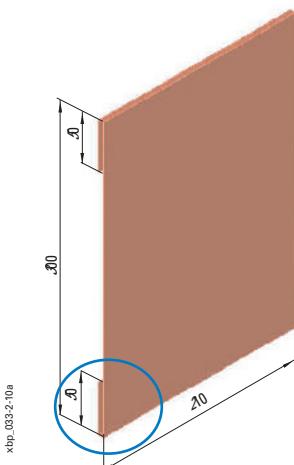

1 sheet contains 8 strips of width 27 mm and length 297 mm.  
Perforated for easy-to-remove.

#### Imprinted:

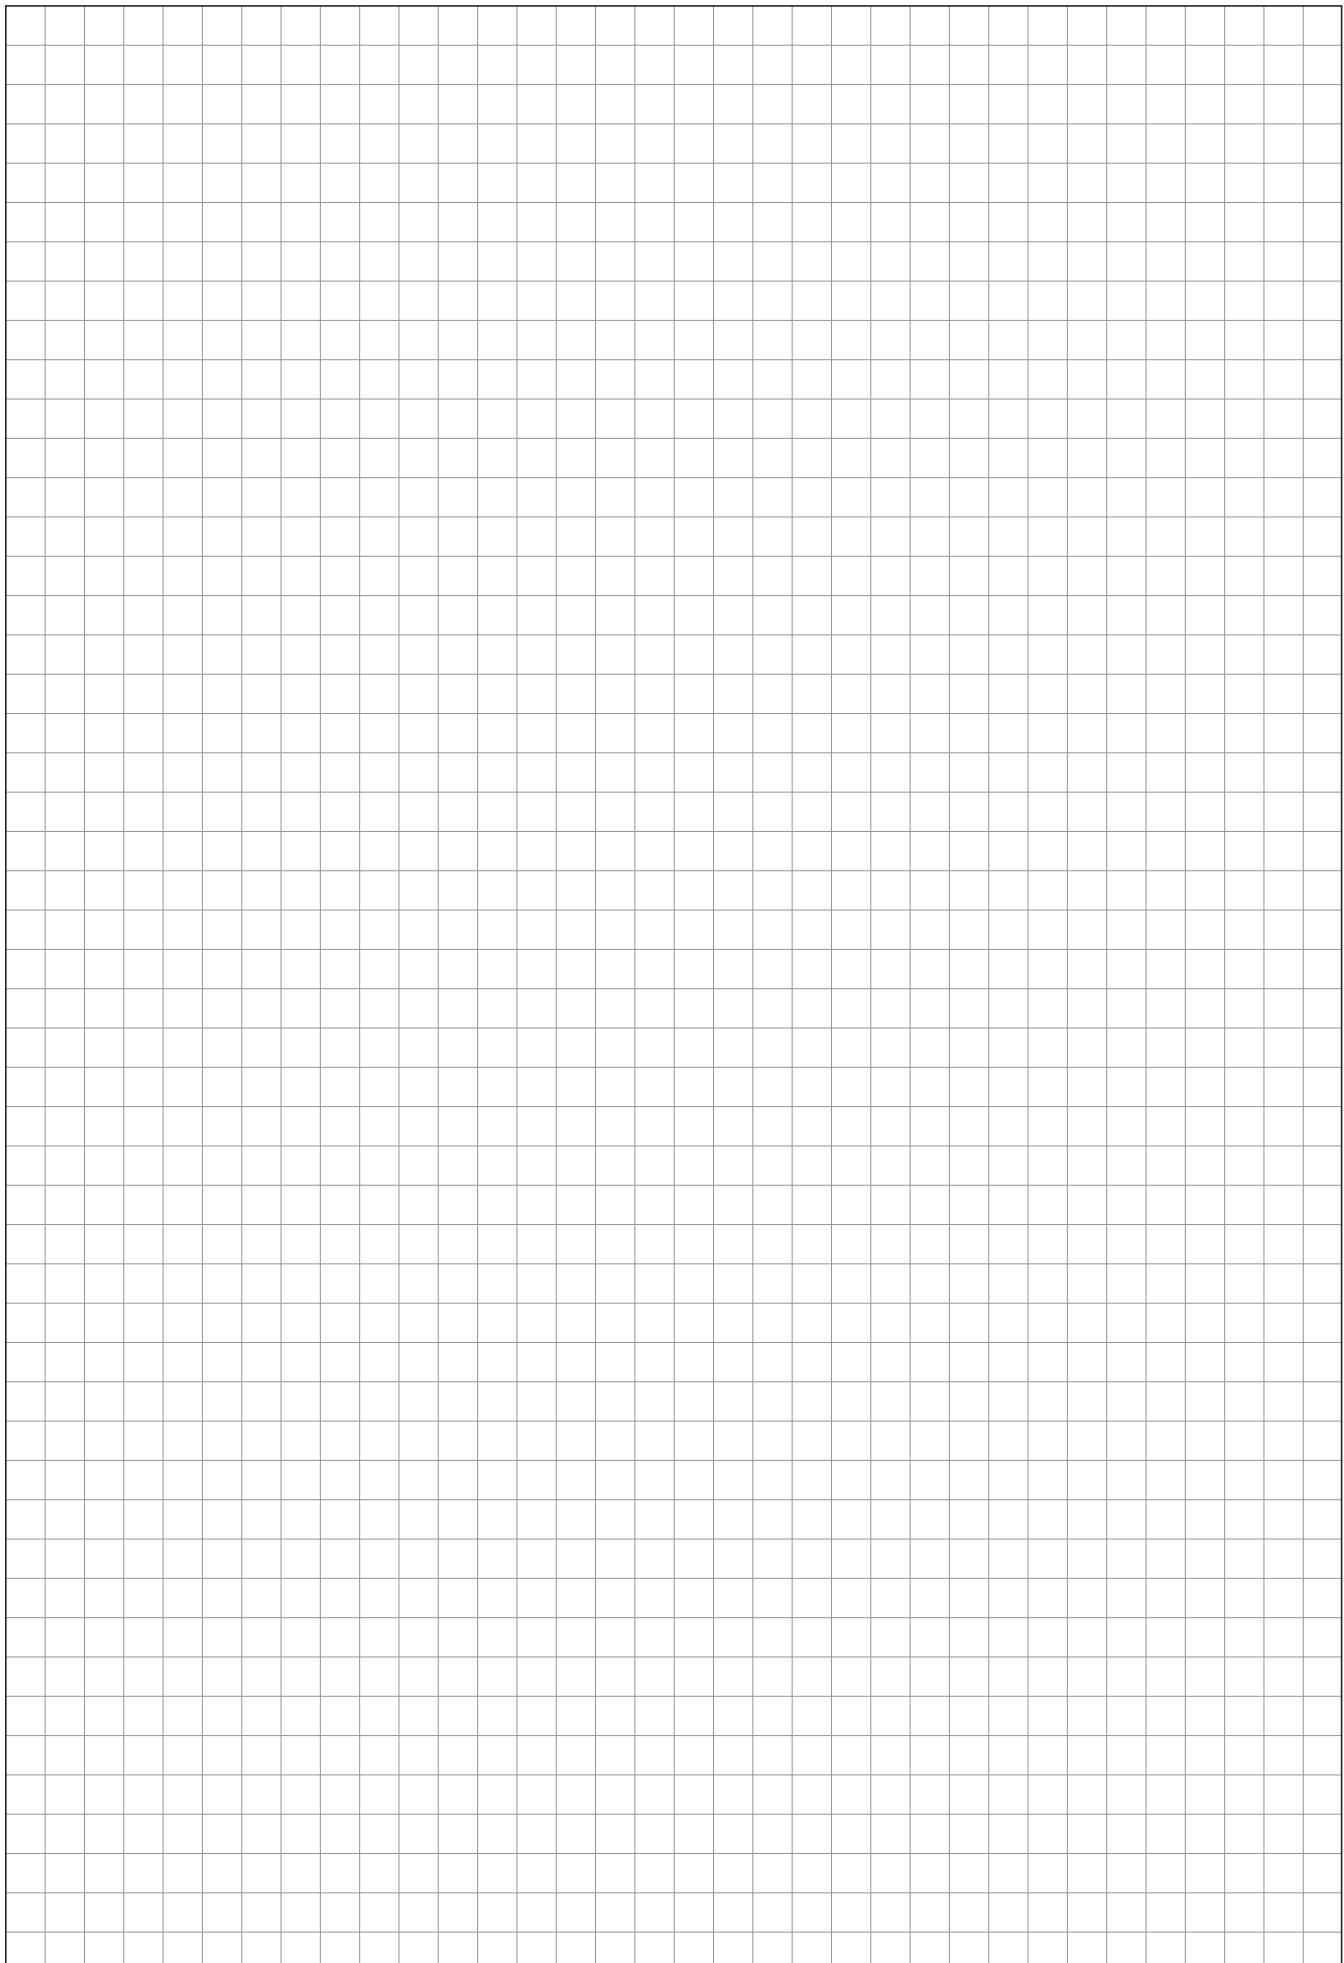

For device width	Numerical print
1,5MU	1-30
2MU	1-24
3MU	1-5
4MU	1-4

## Circuit diagram bag, LAB-BAG\_A4

### Dimensions [mm]

Circuit diagram bag LAB-BAG can be fitted onto a door via two self-sealing strips at the top and bottom

---

## Component overview for typical composition of Profi+

---

### Flush mounted board

- Wall box BPZ-WB3S-... Can be supplemented with rear panel BPZ-RP-...
- Door frame with door BP-U-S3-... for IP30, or BPM-U-3S-... for IP54
- Mounting side walls BPZ-MSW-...
- Auxiliary pawls BPZ-SNAP
- Device rails BPZ-DINR... For build-up of the mounting frame with BPZ-MSW or BPZ-MPL. It is necessary to use at least 2 pcs. DIN-rails with BPZ-MSW.
- Fastening elements BEL for fixing of device rails. Each rail has to be fixed with at least one green element BEL1 to ensure conductive connection.
- Front plates BPZ-FP-...
- Other components and accessories according to particular configuration of given board (device rails BPZ-DINR-..., mounting plates BPZ-MPL-..., terminals (KLV)-KL-..., etc.).

---

### Surface mounted board IP30, version with mounting frame BPZ-MSW

- Base frame BP-MF-...
- Top / bottom panel BP-TBP-...
- If panels BP-TBP-...-CE are used, it is necessary to supplement them with cable plates BP-FLP-...
- Side walls BPZ-SP-MSW-...
- Door BP-DS-... For widths 1000 or 1200 mm there are two-wing door, both the wings are ordered separately
- Mounting sidewalls BPZ-MSW-...
- Device rails BPZ-DINR... For build-up of the mounting frame with BPZ-MSW or BPZ-MPL. It is necessary to use at least 2 pcs. DIN-rails with BPZ-MSW.
- Fastening elements BEL for fixing of device rails. Each rail has to be fixed with at least one green element BEL1 to ensure conductive connection
- Front plates BPZ-FP-...
- Terminal support bar BPZ-TSB-...
- Other components and accessories according to particular configuration of given board (device rails BPZ-DINR-..., mounting plates BPZ-MPL-..., terminals (KLV)-KL-..., etc.).

---

### Surface mounted board IP30, version without mounting frame BPZ-MSW

- Base frame BP-MF-...
- Top / bottom panel BP-TBP-...
- If panels BP-TBP-...-CE are used, it is necessary to supplement them with cable plates BP-FLP-...
- Side walls BP-SP-...
- Door BP-DS-... For widths 1000 or 1200 mm there are two-wing door, both the wings are ordered separately
- Front plates BPZ-FP-...
- Terminal support bar BPZ-TSB-...
- Other components and accessories according to particular configuration of given board (device rails BPZ-DINR-..., mounting plates BPZ-MPL-..., terminals (KLV)-KL-..., etc.)

---

### Surface mounted board IP54, version with mounting frame BPZ-MSW

- Board BPM-O-...
- F3A flanges
- Corner tower set BPZ-CTS-L (2 pairs)
- Mounting side walls BPZ-MSW-...
- Device rails BPZ-DINR... For build-up of the mounting frame with BPZ-MSW or BPZ-MPL. It is necessary to use at least 2 pcs. DIN-rails with BPZ-MSW.
- Fastening elements BEL for fixing of device rails. Each rail has to be fixed with at least one green element BEL1 to ensure conductive connection
- Front plates BPZ-FP-...
- Terminal support bar BPZ-TSB-...
- Other components and accessories according to particular configuration of given board (device rails BPZ-DINR-..., mounting plates BPZ-MPL-..., terminals (KLV)-KL-..., etc.)

---

### Surface mounted board IP54, version without mounting frame BPZ-MSW

- Board BPM-O-...
- F3A flanges
- Front plate support BPZ-FPS-...
- Front plates BPZ-FP-...
- Terminal support bar BPZ-TSB-...
- Corner tower set BPZ-CTS-L for fixing of BPZ-TSB (1 pair)
- Other components and accessories according to particular configuration of given board (device rails BPZ-DINR-..., mounting plates BPZ-MPL-..., terminals (KLV)-KL-..., etc.).

---

### Floor-standing boards

- Board BP-F-... for IP30
- Board BPM-F-... for IP54
- Other configuration is similar to surface mounted board IP54. Floor-standing boards can be supplemented with base BPZ-SS-..., BPZ-FS-...

# Protective Devices

## Protective Devices

Compact circuit breakers,  
with diagnosis included

Circuit-Breakers  
up to 1600A

Sasy 60i  
Modular busbar system

PIFT  
Plug In Fuse Terminal

Residual Current Devices (RCDs)

Miniature Circuit Breakers (MCBs)

Surge Protection

## Protecting, Controlling and Switching

Motor and system protective  
circuit breaker

Motor-protective circuit breaker

Contactors

Signalling Devices

Control-Relay Easy

### Benefits:

- The entire distribution board solution is technically inter-coordinated
- The ideal solution for any application, both in the private and industrial sector
- Expansions and adjustments at a later point in time are always possible
- Perfect image at the end-customer's thanks to a single-source solution

Eaton is a power management company with 2016 sales of \$19.7 billion. Eaton provides energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably.

Eaton has approximately 95,000 employees and sells products to customers in more than 175 countries.
