

WIRE GRABBER™

NEW!
KITS on
reverse

Hanging Support for Fixtures and More, Up to 75 lbs.

NEW
Thumb Screw
Adjustment

FLG3
Wire Grabber™

Patent pending

**Kits
available
Straight
and "Y"
with loop,
toggles
or hooks**

**Reliable hanging support
of static loads up to 75 lbs.**

Secure grip on wire

Tightening this screw engages —
six points of contact on wire

FLG3 Exploded view

Easy to use

Push wire through connector
and out the other side.
Loop wire back through
connector. Tighten screw.

Now it's easier than ever to get reliable hanging support for fixtures, fixture boxes, cable tray and other static loads requiring drop wire support!

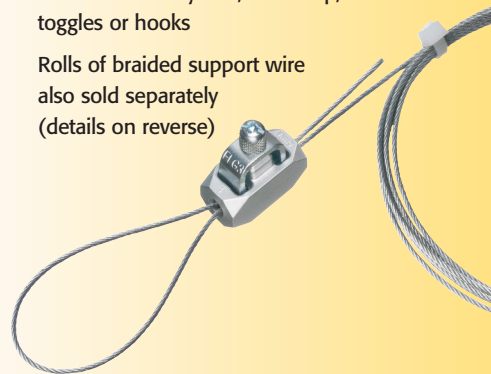

Better than traditional wire-hanging methods, **Wire Grabber™** saves time and **costs much less than competitive products.**

Perfect for dry or wet locations, Wire Grabber's hold on braided wire is unaffected by oil or grease. It holds an angular load as well as any other static load, including high bay light fixtures.

There's no internal spring. Finger tightening the new thumb screw engages six points of contact for easy length adjustment without kinking or bending the wire.

- Tighten screw with pliers or screwdriver to finish – no special tool required
- Connector ships fully assembled
- **Also available** in straight or "Y" kits with 2mm (.080") braided wire in lengths from five to thirty feet, with loop, toggles or hooks

Rolls of braided support wire also sold separately (details on reverse)
