Pneumatic Crimping Tool - Pico Series 400

The Pico Series 400 is a versatile pneumatic crimping tool designed to work with various applications, including pin and socket contacts, solder-less terminals, and a variety of custom-specific applications. Critical parts are manufactured with high-strength S-7 tool steel, ensuring lightweight and durability. Production-ready tools are widely used in aerospace, defense, transportation, and energy fields.

Key Features	Benefits
Innovative Design	Lightweight and portable ideal for shop and field environments
Reduced process time	Pin and Sockets, Solderless Terminals, Ferrules and, many Custom Applications
Crimp Styles	Crimps No. 28 thru 2/0
Low-Maintenance	No operator adjustments required
Die-Set Selection	Interchangeable, Nonadjustable Die Heads ensuring quick setups between applications
Standards	MIL-C 22520/23-01
