## Maestro Wireless Dimmers and Switches

The Maestro Wireless solution incorporates Maestro Wireless load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience, and ease of installation.
Maestro Wireless dimmers and switches use Lutron patented Clear Connect RF Technology, which enables wireless communication with Radio Powr Savr sensors and Pico wireless controls for light control and general switched loads.

## Features

- The Maestro Wireless solution provides dimming/ switching of multiple load types, occupancy/vacancy sensing, daylight harvesting, and high-end trim.
- Lutron patented Clear Connect RF Technology works through walls and floors.
- Incorporates advanced features such as fade ON/fade OFF, high-end trim, and rapid full-ON.
- Controls include Front Accessible Service Switch (FASS) for safe lamp replacement.
- Two-wire dimmers and switches available for retrofit applications.
- Power failure memory: If power is interrupted, the control will return to its previously set level prior to interruption.

## Ganging and Derating

When combining controls in the same wallbox, derating is required (see Load Type and Capacity tables). Only MRF2-8ANS controls have fins that need to be removed for multigang installations. No other controls have fins, but they must still be derated in multigang installations.

## Dimmer Load Type and Capacity

## Neutral Required

Do not remove outside fins on ends of ganged controls (shaded areas below)

| Control | Voltage | Load Type | Minimum Load | Maximum Load |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  | A: Not Ganged | B: End of Gang | C: Middle of Gang |
| MRF2-6ND-120 ${ }^{1,2,3}$ | $120 \mathrm{~V} \sim$ | Incandescent | 25 W | 600 W | 500 W | 400 W |
|  |  | MLV $^{2}$ | $25 \mathrm{~W} / \mathrm{VA}$ | $450 \mathrm{~W} / 600 \mathrm{VA}$ | $400 \mathrm{~W} / 500 \mathrm{VA}$ | $300 \mathrm{~W} / 400 \mathrm{VA}$ |
| MRF2-6ELV $^{1,2}$ | $120 \mathrm{~V} \sim$ | ELV $^{2}$ | 5 W | 600 W | 500 W | 400 W |
| MRF2-F6AN-DV |  |  |  |  |  |  |

## No Neutral Required

| Control | Voltage | Load Type | Minimum Load | Maximum Load |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | A: Not Ganged | B: End of Gang | C: Middle of Gang |
| MRF2-6CL ${ }^{1,2}$ | 120 V ~ | CFL/LED, Incandescent | 50 W (see lamp list) | See Mixing Lamp Types, page 4 |  |  |
|  |  | $\mathrm{MLV}^{2}$ | 50 W/VA | 450 W/600 VA | 400 W/500 VA | $300 \mathrm{~W} / 400 \mathrm{VA}$ |
| MRF2-6MLV ${ }^{1,2}$ | $120 \mathrm{~V} \sim$ | MLV ${ }^{2}$ | 50 VA | 450 W/600 VA | 400 W/500 VA | 300 W/400 VA |
| MRF2-10D-120 1,2,3 | 120 V ~ | Incandescent | 50 W | 1000 W | 800 W | 650 W |
|  |  | MLV ${ }^{2}$ | 50 W/VA | 800 W/1000 VA | 600 W/800 VA | 500 W/650 VA |

Note: do not mix ELV and MLV load types on a single control.
1 Dimmer Load Type:

- MRF2-6ND-120 is designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only. Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TVI) and legacy interfaces Hi-Power 2•4•6 Boosters (HP-2, HP-4, HP-6).
- MRF2-6MLV and MRF2-10D-120 are designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only.
- MRF2-6ELV is designed for use with permanently-installed electronic low-voltage, incandescent, or tungsten/halogen only. Do not install dimmers to control receptacles or motor-operated appliances.
- MRF2-F6AN-DV is designed for use with permanently installed 3-wire line voltage control fluorescent ballasts or LED drivers only (Hi-lume, Hi-lume Compact SE, Eco-10, and EcoSystem). Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TVI).
- MRF2-6CL is designed for use with permanently-installed incandescent, CFL, LED, magnetic low-voltage, or tungsten halogen only.

2 Low-Voltage Applications:

- Use MRF2-6ND-120, MRF2-6MLV, MRF2-6CL, and MRF2-10D-120 with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
- Use MRF2-6ELV with electronic (solid-state) low-voltage transformers only. Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
- Do not operate low-voltage circuits without operative lamps in place.
- Replace burned-out lamps as quickly as possible.
- Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.
- See Application Note \#559 for dimming low voltage LEDs.

3 BAA-compliant model numbers available. Add a "U" prefix to the model number.

## Model Numbers:

$\square$

## Dimmer Load Type and Capacity (continued)

## Mixing Lamp Types

Mixing lamp types (using a combination of CFL/LED, and Incandescent/Halogen bulbs) and ganging with other dimmers or electronic switches may reduce maximum wattage, as shown. Example: If fins from one side of dimmer are removed and you have two 24 W bulbs installed (total CFL Wattage $=48 \mathrm{~W}$ ), you may add up to 300 W of incandescent or halogen lighting.

|  | Maximum Load |  |  |
| :--- | :--- | :--- | :--- |
| Total MLV Wattage | $450 \mathrm{~W} / 600 \mathrm{VA}$ | $400 \mathrm{~W} / 500 \mathrm{VA}$ | $300 \mathrm{~W} / 400 \mathrm{VA}$ |

Example
If a dimmer is installed in location "B" above and there are two 24 W CFL bulbs installed (Total CFL Wattage $=48 \mathrm{~W}$ ), you may add up to 300 W of incandescent or halogen lighting.

1 Switch Load Type:

- MRF2-8ANS-120 is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/4 HP (5.8 A).
- MRF2-6ANS is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A).
- MRF2-8S-DV is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A, $120 \mathrm{~V} \sim$ only).

2 For loads larger than 8 A (120 V~), the MRF2-8ANS-120 switch can be used with the PHPM-SW-DV-WH power booster.
3 The LUT-MLC ensures proper function with low-wattage fluorescent, CFL, and LED load types. See page 12 for details.
4 Maximum load for double-gang application is 8 A. Triple-gang application derates maximum load to 7 A.

## Specifications

## Regulatory Approvals

- UL® Listed.
- cUL Listed (MRF2-6CL only).
- CSA Certified (except for MRF2-6CL).
- FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
- Industry Canada Certified.

## Power

Operating voltage:

- $120 \mathrm{~V} \sim 50 / 60 \mathrm{~Hz}$ (all models)
- $277 \mathrm{~V} \sim 50 / 60 \mathrm{~Hz}$ (MRF2-8S-DV, MRF2-F6AN-DV)

## Key Design Features

## Dimmers

- On a single-tap, lights fade UP or DOWN.
- On a double-tap, lights go to full ON.
- When ON, press and hold to engage 20-second fade to OFF.
- Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
- Two-wire dimmers available.

## Switches

- On a single-tap, lights turn ON or OFF.
- Two-wire switches available.

## All RF Local Controls

- Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Controls always operate locally and do not require system control.
- Power failure memory: should power be interrupted, the control will return to its previously-set level prior to the interruption when power is restored.
- Uses conventional 3-way and 4-way wiring.
- Multiple location control from Dimmer/Switch and up to nine Companion Dimmers/Switches.
- Use Lutron Designer (Claro and Satin Colors) wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately.
- Lutron Claro and Satin Colors wallplates snap on with no visible means of attachment.
- Requires a one-gang U.S. wallbox; $3^{1 ⁄ 2}$ in ( 89 mm ) deep recommended, $2^{1 / 4}$ in ( 57 mm ) deep minimum.
- Green indicator lights.

## System Communications and Capacity

- Maestro Wireless controls communicate with the Pico wireless controls and Radio Power Savr sensors through radio frequency (RF).
- Maestro Wireless local controls must be located within $60 \mathrm{ft}(18 \mathrm{~m})$ line-of-sight or $30 \mathrm{ft}(9 \mathrm{~m})$ through walls, of Radio Power Savr sensors.
- Maestro Wireless local controls must be located within $100 \mathrm{ft}(30 \mathrm{~m})$ line-of-sight or $30 \mathrm{ft}(9 \mathrm{~m})$ through walls, of a Pico wireless control.
- Up to ten Maestro Wireless controls can be configured to work together.

## Environment

- Ambient operating temperature: $32{ }^{\circ} \mathrm{F}$ to $104^{\circ} \mathrm{F}$ $\left(0^{\circ} \mathrm{C}\right.$ to $40^{\circ} \mathrm{C}$ ), $0 \%-90 \%$ humidity, non-condensing. Indoor use only.

## Maestro Wireless Dimmers and Switches

The Maestro Wireless solution incorporates Maestro Wireless load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience, and ease of installation.
Maestro Wireless dimmers and switches use Lutron patented Clear Connect RF Technology, which enables wireless communication with Radio Powr Savr sensors and Pico wireless controls for light control and general switched loads.

## Features

- The Maestro Wireless solution provides dimming/ switching of multiple load types, occupancy/vacancy sensing, daylight harvesting, and high-end trim.
- Lutron patented Clear Connect RF Technology works through walls and floors.
- Incorporates advanced features such as fade ON/fade OFF, high-end trim, and rapid full-ON.
- Controls include Front Accessible Service Switch (FASS) for safe lamp replacement.
- Two-wire dimmers and switches available for retrofit applications.
- Power failure memory: If power is interrupted, the control will return to its previously set level prior to interruption.

| MRF2-10D-120 1,2,3 | 120 V ~ | Incandescent | 50 W | 1000 W | 800 W | 650 W |
|  |  | MLV ${ }^{2}$ | 50 W/VA | 800 W/1000 VA | 600 W/800 VA | 500 W/650 VA |

Note: do not mix ELV and MLV load types on a single control.
1 Dimmer Load Type:

- MRF2-6ND-120 is designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only. Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TVI) and legacy interfaces Hi-Power 2•4•6 Boosters (HP-2, HP-4, HP-6).
- MRF2-6MLV and MRF2-10D-120 are designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only.
- MRF2-6ELV is designed for use with permanently-installed electronic low-voltage, incandescent, or tungsten/halogen only. Do not install dimmers to control receptacles or motor-operated appliances.
- MRF2-F6AN-DV is designed for use with permanently installed 3-wire line voltage control fluorescent ballasts or LED drivers only (Hi-lume, Hi-lume Compact SE, Eco-10, and EcoSystem). Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TVI).
- MRF2-6CL is designed for use with permanently-installed incandescent, CFL, LED, magnetic low-voltage, or tungsten halogen only.

2 Low-Voltage Applications:

- Use MRF2-6ND-120, MRF2-6MLV, MRF2-6CL, and MRF2-10D-120 with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
- Use MRF2-6ELV with electronic (solid-state) low-voltage transformers only. Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
- Do not operate low-voltage circuits without operative lamps in place.
- Replace burned-out lamps as quickly as possible.
- Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.
- See Application Note \#559 for dimming low voltage LEDs.

3 BAA-compliant model numbers available. Add a "U" prefix to the model number.

## Dimmer Load Type and Capacity (continued)

## Mixing Lamp Types

Mixing lamp types (using a combination of CFL/LED, and Incandescent/Halogen bulbs) and ganging with other dimmers or electronic switches may reduce maximum wattage, as shown. Example: If fins from one side of dimmer are removed and you have two 24 W bulbs installed (total CFL Wattage $=48 \mathrm{~W}$ ), you may add up to 300 W of incandescent or halogen lighting.

|  | Maximum Load |  |  |
| :--- | :--- | :--- | :--- |
| Total MLV Wattage | $450 \mathrm{~W} / 600 \mathrm{VA}$ | $400 \mathrm{~W} / 500 \mathrm{VA}$ | $300 \mathrm{~W} / 400 \mathrm{VA}$ |

Example
If a dimmer is installed in location "B" above and there are two 24 W CFL bulbs installed (Total CFL Wattage $=48 \mathrm{~W}$ ), you may add up to 300 W of incandescent or halogen lighting.

1 Switch Load Type:

- MRF2-8ANS-120 is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/4 HP (5.8 A).
- MRF2-6ANS is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A).
- MRF2-8S-DV is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A, $120 \mathrm{~V} \sim$ only).

2 For loads larger than 8 A (120 V~), the MRF2-8ANS-120 switch can be used with the PHPM-SW-DV-WH power booster.
3 The LUT-MLC ensures proper function with low-wattage fluorescent, CFL, and LED load types. See page 12 for details.
4 Maximum load for double-gang application is 8 A. Triple-gang application derates maximum load to 7 A.
5 BAA-compliant model numbers available. Add a "U" prefix to the model number.

## Specifications

## Regulatory Approvals

- UL® Listed.
- cUL Listed (MRF2-6CL only).
- CSA Certified (except for MRF2-6CL).
- FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
- Industry Canada Certified.

## Power

Operating voltage:

- $120 \mathrm{~V} \sim 50 / 60 \mathrm{~Hz}$ (all models)
- $277 \mathrm{~V} \sim 50 / 60 \mathrm{~Hz}$ (MRF2-8S-DV, MRF2-F6AN-DV)

## Key Design Features

## Dimmers

- On a single-tap, lights fade UP or DOWN.
- On a double-tap, lights go to full ON.
- When ON, press and hold to engage 20-second fade to OFF.
- Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
- Two-wire dimmers available.

## Switches

- On a single-tap, lights turn ON or OFF.
- Two-wire switches available.

## All RF Local Controls

- Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Controls always operate locally and do not require system control.
- Power failure memory: should power be interrupted, the control will return to its previously-set level prior to the interruption when power is restored.
- Uses conventional 3-way and 4-way wiring.
- Multiple location control from Dimmer/Switch and up to nine Companion Dimmers/Switches.
- Use Lutron Designer (Claro and Satin Colors) wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately.
- Lutron Claro and Satin Colors wallplates snap on with no visible means of attachment.
- Requires a one-gang U.S. wallbox; $3^{1 ⁄ 2}$ in ( 89 mm ) deep recommended, $2^{1 / 4}$ in ( 57 mm ) deep minimum.
- Green indicator lights.

## System Communications and Capacity

- Maestro Wireless controls communicate with the Pico wireless controls and Radio Power Savr sensors through radio frequency (RF).
- Maestro Wireless local controls must be located within $60 \mathrm{ft}(18 \mathrm{~m})$ line-of-sight or $30 \mathrm{ft}(9 \mathrm{~m})$ through walls, of Radio Power Savr sensors.
- Maestro Wireless local controls must be located within $100 \mathrm{ft}(30 \mathrm{~m})$ line-of-sight or $30 \mathrm{ft}(9 \mathrm{~m})$ through walls, of a Pico wireless control.
- Up to ten Maestro Wireless controls can be configured to work together.

## Environment

- Ambient operating temperature: $32{ }^{\circ} \mathrm{F}$ to $104^{\circ} \mathrm{F}$ $\left(0^{\circ} \mathrm{C}\right.$ to $40^{\circ} \mathrm{C}$ ), $0 \%-90 \%$ humidity, non-condensing. Indoor use only.

Multi-Location Switch Installation with LUT-MLC ${ }^{1,2,3}$
MRF2-8S-DV with MA-AS/MA-AS-277 or MSC-AS/MSC-AS-2774

## * Optional Procedure: <br> Using LUT-MLC with MRF2-8S-DV-XX

- Install MRF2-8S-DV-XX first without LUT-MLC to see if required. Check for problems with load.
- Problems can occur when low-wattage loads are used (< 40 W).
- Watch for flickering loads when dimmer is in electronic OFF state.
- If required, LUT-MLC can be installed between switched hot and neutral in wallbox if neutral is present, or in any fixture on the switched circuit.
