

NEW PRODUCT SHOWCASE

**New Molded 8" Bell End Fitting**

The new Scepter 8" Molded Bell End fitting offers an alternative to the current fabricated design for a consistent product that is lighter and easier to use. Contractors will appreciate the new molded design that includes smooth interior lines for pulling wires in utility vaults, substations and renewable energy collectors.

Made from Schedule 40 Rigid PVC, Scepter End Bells are flared at one end to provide a smooth, rounded pulling surface preventing damage to cables.

Brand	Molded Part Number	NEW Molded Product Code	NEW Fabricated Part Number	Fabricated Product Code
Scepter®	EB80	277094	FEB80	077652
Ridgeline (OEM)	EB80	277095	FEB80	077863

\*Old Fabricated part number has been changed to FEB80

**FEATURES**

- Shorter length than fabricated end bells for easier installation in vaults
- Provides a smooth radius and transition for medium voltage cable
- Molded not fabricated for a consistent product
