

1000' Premium Red Barricade Tape

Keep job sites secure by using the Empire® Level® 1000-Foot x 3-Inch DANGER DO NOT ENTER Barricade Tape as a warning barrier against unwanted intrusion. The tape provides a bold three-inch wide red background for its large, two-inch black warning lettering. The Empire Level 1000-foot x 3-inch Danger Do Not Enter barricade tape consists of polyethylene fiber that remains pliant even in cold weather. The tape is 2.5 mils thick and comes in 1,000-foot rolls that provide plenty of length to secure large constructions sites. The Empire Level jobsite tough, contractor-grade barricade tape meets professional standards for the readability of its security warning, as well as construction-grade standards for durability.
