Cutler-Hammer® 55 Series Photoelectric Sensors are identical to Eaton's 50 Series except without the interchangeable outputs or logic functions. They offer durability and high optical performance in a costeffective, self-contained package. The 55 Series features sensors with AC and DC operation in a single unit. A relay option is available on these models that provides a 3 Amp SPDT relay output for high current switching.

Sensors are available that in thrubeam, reflex, polarized reflex, diffuse reflective and fiber optic sensing modes. Each sensor features a built-in swivel bracket for easy mounting and to allow precise adjustment of the sensor alignment.

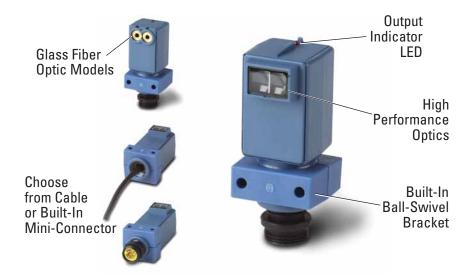

Approvals

- UL Listed
- CSA Certified

Unless otherwise noted, the products contained in this document are not designed or intended for use in human safety applications.

High Optical Performance and a Built-In Swivel Bracket for Easy and Precise Alignment

Product Features

- High optical performance includes 100-foot (30.5m) thru-beam range and 6-foot (1.8m) diffuse reflective range
- Both AC and DC operation in a single unit
- Short circuit protected solid-state outputs on AC/DC and DC-only versions (except thru-beam)
- Relay output option provides 3 Amp current switching on AC/DC models
- Thru-beam models feature an infrared sensing beam along with a visible red LED behind the lens in the source unit to aid in sensor alignment
- Fiber optic sensors operate in thru-beam or diffuse reflective mode depending on the fiber optic cable selected
- Glass fiber optic cables plug into NEMA 4 rated sockets on the front of the sensor. Sockets are leakproof even when the fiber optic cables are not plugged in
- Fully potted construction for use in areas subject to washdown, high shock and/or vibration
- Choice of pre-wired power cable or built-in mini-connector versions. Standard pre-wired cable length is 6 feet (1.8m)
- Built-in, patented, 360° rotation 10° tilt ball-swivel base

- ① Ranges based on 3-inch retroreflector for reflex sensors, 90% reflectance white card for diffuse reflective sensors.
- 2 See Excess Gain graphs on Page 4.
- ③ Polarized sensors may not operate with retroreflective tape. Test selected tape before installation.
- ${\small \textcircled{4}}$ Ranges using standard 0.125-inch diameter fiber optic cable.
- Fast turn product with typical one business day lead-time to shipment.
- Stocked product, typical order quantities guaranteed in stock.

③ See listing of compatible connector cables on Page 4.

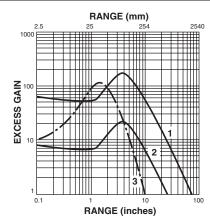

Relay output option for AC/DC Models only (built-to-order, contact factory for delivery lead times). For a 3 Amp, SPDT relay output replace **A** in Catalog Number with **R**. (AC/DC Models only — not available in Thru-Beam).

Excess Gain

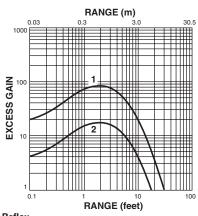

Thru-Beam

- 1. 1255A detectors using 1155A sources
- 2. 1256A detectors using 1155A sources

Diffuse Reflective (90% reflective white card)

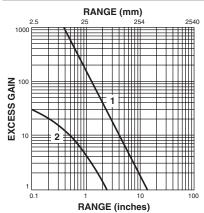

- 1. 1357A
- 2. 1356A
- 3. 1355A

Reflex

(3-inch diameter retroreflector)

- 1. 1455A
- 2.1456A

- Fiber Optic (standard 0.125-inch diameter fiber optic cable shown)
- 1. Thru-Beam mode
- 2. Diffuse reflective mode (90% reflective white card)

Specifications

	Thru-Beam			All Other Models					
	115V AC Models	230V AC Models	10 – 30V DC Models	AC/DC Models	10 – 30V DC Models				
Input Voltage	90 – 132V AC, 60 Hz 100 – 132V AC, 50 Hz		10 – 30V DC, 35 mA	20 – 264V AC, 50/60 Hz or 15 – 30V DC	10 – 30V DC, 35 mA				
Power Dissipation	2W	2W	1W	2W	1W				
Operating Temperature	-22	° to +158°F (-30° to +70)°C)	-40° to +158°F (-40° to +70°C)					
Output:	VMOS, 50 mA maximum resistive or relay- load; Off-Stage leakage is 0.1 mA maximum Sink/source/TTL, open collector transistor, 50 mA maximum load current			Standard Versions: VMOS, 300 mA max./NPN, 300 mA max. Relay Output Versions: 3A SPDT relay	NPN: 250 mA max., 1.8V drop max. PNP: 100 mA max., 2.6V drop max. (not TTL compatible) Optional Relay Models: SPDT 3A contact				
Response Times		Dark-to-Light: 5 mS Light-to-Dark: 11 mS		10 mS	1 mS				
Short Circuit Protection		_		Sensor will turn off immediately when a short or overload is detected (indicator LED will flash). Turn power OFF and back ON to reset. IMPORTANT: During installation, correct power connections must be made first to ensure fail-safe short circuit protection of the outputs.	Sensor will turn off immediately when a short or overload is detected (indicator LED will flash). Sensor will reset when short is removed.				
Sunlight Immunity	100 foot Thru-Beam models: 6,000 foot-candles All other models: 10,000 foot-candles								
Humidity	95% relative humidity, non-condensing								
Case Material	Noryl [®] (avoid exposing to chlorinated, halogenated, or aromatic hydrocarbons)								
Lens Material	Nylon								
Vibration	15g or 0.06 inch displacement, whichever is less, over 10 Hz to 2 kHz (relay models: 10g over 10 – 55 Hz)								
Shock	40g for 10 mS and 500g for 2 mS, 1/2 sine wave pulse (20g for relay models)								
Enclosure Ratings	NEMA 1, 3, 4, 6, 12 and 13 ^①								

NOTE: Our products conform to NEMA tests as indicated, however, some severe washdown applications can exceed these NEMA test specifications. If you have questions about a specific application, contact Eaton's Cutler-Hammer Sensor Applications Department at 1-800-426-9184.
