## Wiring Diagram

## Description

The 250A is a 3-phase, auto-ranging, dual-range voltage monitor that protects $190-480 \mathrm{~V}$ ac, $50 / 60 \mathrm{~Hz}$ motors regardless of size from low and high voltage, unbalance/single-phase, and reversephase. The product provides a user selectable nominal voltage setpoint and the voltage monitor automatically selects between the 200 V and 400 V range. The 250 A also features adjustable or manual restart delay.
This unique microcontroller-based voltage and phase-sensing device constantly monitors the 3-phase voltages to detect harmful power line conditions. When a harmful condition is detected, the output relay is deactivated after a specified trip delay. The output relay reactivates after power line conditions return to acceptable levels. The Model 250 A includes advanced single LED diagnostics. Five different light patterns distinguish between faults and normal conditions.

## Features \& Benefits

| FEATURES | BENEFITS |
| :--- | :--- |
| Proprietary <br> microcortroller <br> based circuitry | Constant monitoring of single-phase, low <br> voltage, voltage unbalance, phase reversal, <br> harmful power line conditions. |
| Auto-sensing wide <br> voltage range | Automatically senses system voltage between <br> 140-480 V ac. Saves setup time. |
| Advanced LED <br> diagnostics | Quick visual indicator for cause of trip. LED <br> indications include: normal operation, power-up <br> restart delay, reverse-phase trip, unbalance/ <br> single-phase trip, high or low voltage trip |
| Adjustable trip delay | Prevent nuisance tripping due to rapidly <br> fluctuating power line conditions. |
| DPDT relay output | Allows for versitility to meet wide application <br> needs |
| Manual Reset | Allows for inspection of equipment before <br> system is re-energized |

## Ordering Information

|  | \% OF SETPOINT |  |  |  |  | DESCRIPTION |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| MODEL | LINE VOLTAGE | LOW <br> VOLTAGE <br> TRIP | LOW VOLTAGE RESET | HIGH VOLTAGE TRIP | HIGH VOLTAGE RESET |  |
| 250A | 190-480 V ac | $90 \%$ | 93 \% | 110 \% | 107 \% | Provides high and low voltage protection at fixed percentage of nominal voltage. |
| 250600 | $475-600 \mathrm{~V}$ ac | 90\% | $93 \%$ | 110 \% | 107 \% | Provides high and low voltage protection at fixed percentage of nominal voltage. |
| 250A-MET | 190-480 V ac | 85 \% | 88 \% | N/A | N/A | Designed for use with Fire Control Panels. Has 2 Form C contacts that operate independently. Left Form C energizes when voltage conditions are good and de-energize when a fault condition is detected. Right Form C only energizes during a reverse-phase condition. No high voltage protection. |
| 250-100-MET | $95-120 \mathrm{~V}$ ac | 85 \% | 88 \% | N/A | N/A | Designed for use with Fire Control Panels. Has 2 Form C contacts that operate independently. Left Form C energizes when voltage conditions are good and de-energize when a fault condition is detected. Right Form C only energizes during a reverse-phase condition. No high voltage protection. |

## Specifications

| Frequency | 50*/60 Hz Low Voltage |
| :---: | :---: |
| Functional Characteristics <br> Voltage Unbalance (NEMA) |  |
|  |  |
| Trip | 6 \% |
| Reset | 4.5 \% |
| Trip Delay Time |  |
| Low Voltage, High Voltage | 4 seconds |
| Unbalance, Phasing Faults | 2 seconds |
| Restart Delay Time |  |
| After a Fault or Complete |  |
| Power Loss | Manual, 2-300 seconds adj. |
| Output Characteristics |  |
| Output Contact Rating (DPDT - 2 Form C) |  |
| Pilot Duty | 480 VA @ 240 V ac |
| General Purpose | 10 A @ 240 V ac |
| Temperature Range | $-40^{\circ}$ to $70^{\circ} \mathrm{C}\left(-40^{\circ}\right.$ to $\left.158^{\circ} \mathrm{F}\right)$ |
| Trip \& Reset Accuracy | $\pm 1$ \% |
| Maximum Input Power | 5 W |
| Relative Humidity | Up to $95 \%$ non-condensing per IEC 68-2-3 |
| Terminal Torque | 7 in .-lbs. |
| Wire Size | 12-18 AWG |
| Transient Protection (Internal) | IEC 61000-4-5; $1995 \pm 6 \mathrm{kV}$ |
| Approvals |  |
| UL | UL 508 (File \#E68520) |
| CSA | CSA 22.2 No. 14 (File\#46510) |
| Dimensions | $\begin{aligned} & \text { H } 74.4 \mathrm{~mm}\left(2.93^{\prime \prime}\right) \text {; W } 133.9 \mathrm{~mm}\left(5.27^{\prime \prime}\right) \text {; } \\ & \text { D } 74.9 \mathrm{~mm}\left(2.95^{\prime \prime}\right) \end{aligned}$ |
| Weight | $1.02 \mathrm{lb} .(16.32$ oz., 462.66 g ) |
| Mounting Method | \#8 screws |

*Note: 50 Hz will increase all delay timers by $20 \%$.
