Applications:
Mogul bodies are installed in conduit systems to:
• Act as pull outlets for conductors that are stiff, due to large size or type of insulation
• Provide the longer openings needed when pulling large conductors
• Prevent sharp bends and kinks in large conductors (protects insulation during installation)
• Provide ample openings for splices and taps
• Provide access to wiring for maintenance and future system changes

Features:
Mogul bodies have:
• Long openings
• Provision for easy bends
• Taper tapped hubs with integral bushings
• Stainless steel cover screws
• Covers are designed with integral gasket

Certifications and Compliances:
• UL Standard: 514B
• Fed. Spec.: W-C-586d
• CSA Standard: C22.2 No. 18

Standard Materials:
• Feraloy® iron alloy

Standard Finishes:
• Feraloy – electrogalvanized and aluminum acrylic paint

**XL Mogul Conduit Bodies and Covers are designed to ease installation, saving time and money while maintaining the quality you have come to expect from Eaton's Crouse-Hinds.**

- Larger internal volume provides additional space for bending and pulling large conductors (complies with the 6x wire bending rule)
- Rollers improve the ability to pull larger conductors and protect the insulation when the wire is being pulled, greatly reducing cut cable incidents
- Cover design takes less time to install and can be used as a solid or with the center removed for more internal volume
