	Division provide 40% wire fill capacity to allow uninterrupted
	runs in a conduit system. They are designed to restrict the
	passage of gases, vapors or flames from one portion of the
	electrical installation to another, limit explosions to the sealed of
	enclosure, and limit pre-compression or "pressure piling" in
	conduit systems. EYSX expanded fill sealing fittings are available
	for installation in both horizontal or vertical positions.
