# IN BOX™ COVER KIT for Concrete Floor Box

## Recessed Cover Kit with Decorator-style Receptacle

Arlington's new **IN BOX™ COVER KITS** give installers the best way to install a receptacle in new concrete.

These new **COVER KITS** are **RECESSED** and install *into the can* so they look great! And they reduce the trip hazard caused by plugs sticking out of the box.

You can also have power and low voltage in the same box. Talk about convenience!

IN BOX Cover Kits are available with **metal flanges** in brass or nickel-plated brass. And **plastic, in five colors**: light almond, gray, caramel, black and brown.

They're easy to install into our FLBC4500 concrete floor box (*sold separately*).

Made of heavy-duty plastic, the 4.5" non-metallic FLBC4500 concrete box is a common size, that accommodates **our new IN BOX COVER and other common single-door, 4" diameter, 3-hole covers.**

### INSTALLATION INSTRUCTIONS

**1** After concrete has cured and finished floor installed, cut the installed FLBC4500 concrete box to finished floor height. *If using the low voltage divider, cut the same amount from the bottom of the divider as you removed from the can.*

**2** Secure the leveling ring assembly to the installed FLBC4500 can with PVC cement.

**3** Install the blank cover in unused boxes to avoid possible trip hazard.

**4** Remove blank cover to use receptacle.

**5** Install the slotted-in-use non-metallic plug cover and store blank cover for future use.

Available with blank metal or plastic covers in a variety of colors.
