

Stock #: GBP-21234

Product Description:

Partitions/dividers for 2-1/2" deep multi-gang boxes with 3/4" raised device covers are used to separate low voltage and electrical power devices when they are installed next to each other in a multi-gang box. Garvin Industries' flat dividers create a shield between power and low voltage signals that prevents electrical interference and disturbance all the way up to the finished surface.

Product Specifications:

Material : Steel

Compliance : RoHS Compliant
