

**VHB LED**  
High bay luminaire

*Powering Business Worldwide*

## VHB LED high bay

The **VHB** is designed for a wide variety of applications and mounting heights with a balance of fixture performance and affordability. Precision-designed optics, multiple distributions, lumen outputs and color temperatures make the VHB ideal for industrial, commercial, manufacturing, gymnasium and other applications that utilize traditional linear fluorescent and HID high bays. The proprietary discrete, low-brightness LED module assembly offers exceptional optical performance with the enhanced benefits of LED lighting, including energy savings, extended system life, and reduced carbon footprint.

***Perfect for renovation or new construction!***

***Ideal one-for-one replacement!***

***No maintenance required!***

***Bottom line savings and industry leading performance!***

### Compact and durable construction

- Extruded aluminum and CRS construction for added durability
- Compact 15" x 18" low-profile housing
- Precision-designed, high-impact polycarbonate optics
- Suspension mountable with V-Hangers (supplied)

### Energy saving LED

- Up to 65% energy savings
- Optional sensor for added energy savings
- No relamping required
- 12' – 30' mounting heights

# Construction

| VHB high bay                                                 |
|--------------------------------------------------------------|
| Compact 15" x 18" design for ease of installation            |
| Durable extruded aluminum and CRS construction               |
| High-impact polycarbonate lens protects LEDs                 |
| Five lumen packages (9,000, 12,000, 15,000, 18,000, 24,000)  |
| Ideal for 12' - 30' mounting heights                         |
| Suspension mountable with V-Hangers (supplied)               |
| Optional single-point mounting kit reduces installation time |
| Easy one-for-one replacement                                 |
| Optional wire guard for added protection                     |

# Mounting

|                                                                                   |                                                                                    |                                                                                    |                                                                                    |                                                                                    |
